## MINING, BUSINESS AND STOCKS

## RECORD MADE BY THE CON. MERCUR.

Ores Mined and Milled Averaged \$5.05: the Extraction Amounted To \$3.84 to the Ton.

#### OURING LAST FISCAL YEAR

Total Production of Bullion Amounted To \$1,321,000.63 - Available Assets on Jan. 30, Were \$123,242.02.

It cost the Consolidated Mercur Gold Mines company \$2.88 per ton to mine and mill its cres during the fiscal year which ended on the 30th of last June Seggregated, the expense of mining was \$1.30 and that of milling, 28 cents more or \$1.58 per ton. An average of 28.861 tons per month, or a total of 345,359 tons, was mined during the year and 335,163 tons put through the milling process, at the Golden Gate plant, produced \$1,285,556.73 worth of gold bullion.

The extraction amounted to \$3:84, while the tailings averaged \$1.21, making the value of the ore milled average up to 5.65 per ton. The Mining mill was in operation a portion of the year on an old Mercur tailings dump, producing \$35,452.90 at a cost of \$27,064.42. Altogether, 55.069 tons were treated, hence the extraction was 64 cents and the expenses of same 49 cents.

#### DIVIDENDS PAID.

During the period mentioned 11 monthly dividends of \$30,000 each were monthly dividends of \$39,000 each were distributed among the shareholders, making a total of \$339,000. Dividends were suspended in May, after the payment of \$1,030,000 to the stockholders of ment of \$1,030,000 to the stockholders of the present corporation. This amount, added to what had previously been dis-bursed by the old Mercur company and De Lamar's Mercur mines, before the consolidation. \$2,380,312.97. the grand total of the dividends paid by the prop-erties of the present company is \$3,210,-\$12.97.

TAILINGS RAN TOO HIGH.

The necessity of the introduction of The necessity of the introduction of the Moore slimes process is made apparent in the report of Manager George H. Dern, which has been issued in pamphlet form, showing that the tailings have materially increased. In 1901 the average was 95 cents; in 1902, \$1.19, while up to May 1 of the present year it ran up to \$1.30. During the balance of the year, May and June, by running on a reduced tonnage and exercising greater care in mining, keepercising greater care in mining, keeping out the more slimey ores, as much as possible, the tailings ran so low, Mr Dern states, that the aver year was cut down to \$1.21. average for the

OPERATING EXPENSES REDUCED. On the other hand, a gratifying improvement was made in operating ex-penses, the same having been reduced from \$3.50 per ton, the average of the previous year, to \$2.38 this year. previous year, to \$2.38 this year.

ENGINEER'S REPORT.

Arthur H. Brown, the company's en-gineer, gave an estimate of the amount of ore in sight in the Mercur mine (not including the Golden Gate) on April 7, in which he placed the total topnage

Block B, in the Silver Incline and Fifth West Raise work

Block D. in Lower Mattle Work-

Workings, including 50 feet of thickness up to the Upper

ness up to the upper vein, largely oxidized .......231,000 (This block is on the strike of the vein with Block H. It is within the limits of Blocks H and I that the two veins come together.)

At the present time it is impossible to enter the uper workings of the Lulu and No. 27 inclines. It is safe to estimate for this and other parts of the mine not mentioned above ... 60,000

Making a total tonnage of ore in

FROM SUPT. EDWARDS. Supt. Edwards after going into de-

talls concerning developments in the Mercur mine, states that the develop-ments and reserves will compare favorably with the report of Engineer Of the Golden Gate mine, he says:

Of the Golden Gate mine, he says:
In the Golden Gate mine, the No. 1
Incline has been bulk-headed about
200 feet from its face, and filled with
waste from the bulkhead about 50 feet
up to the Viking level. The entire incline has been cleaned out and put in
shape for further use. One hundred
feet below the Viking level we recently began following a small seam of ore,
crossing the incline to the northwest. crossing the incline to the northwest, I from Warren .- Lewiston Tribune.

almost 20 feet in width, with a good many very high assays, the average being above \$10.00. We were very being above \$10.00. We were very much elated, and thought we had found a new mine, in the territory between the Golden Gate and Brickyard mines, which had never yielded any ore. Work was prosecuted with the utmost vigor, but after we had drifted in ore for about 60 feet, it pinched out, proving to be only a commantively. proving to be only a comparatively small pocket. The indications point to the deep, hence we ran a cross-cut from the bottom of No. 1 incline to a point almost directly under the above pocket of ore, where we again encoun-tered the small seam. We are now fol-lowing this to the westward, but with very poor success as to values, though the face looks promising, and we have strong hopes of breaking into fine ore

strong hopes of breaking into fine ore at any time.

In conclusion Mr. Edwards says:

We have probably done more prospecting work during the past 12 months than in any former year. This was made necessary by our determination to, explore several large tracts of new and unfamiliar ground. The foregoing paragraphs on developments indicate the measure of success that has rewarded our efforts. However, in advanced to the several description of the sever rewarded our efforts. However, in addition to the work which exposed new ore, we also did an unprecedented amount of "dead" work, meaning thereby drifts, cross-cuts, winzes and raises in new territory, which did not find ore; as well as connections between known ore-bodies, driven through barren ground. Of course,

through barren ground. Of course, where we are out-putting such a large tonnage, it is of the utmost importance to keep the prospecting well in advance of the ore reserves, and this has been our constant policy.

Prospecting in the Golden Gate is much more expensive than in the Mercur mine, because originally no advanta provision was made to hoist the waste. After the ore skips were installed, the cage was so small that it stalled, the case was so small that it will not admit a car holding over 500 pounds of waste. Hence we are great-

ly handicaped in that respect.

In his report to the stockholders, In his report to the stockholders, President John Dern says: "If the Moore slimes process proves to be all containing it at we expect, we propose installing it at the Manning mill as well, for the pur-pose of retreating the old Mercur tail-ings, which will yield a much better profit than by present methods."

#### ALPINE ORES EN ROUTE. Tonopah Mine Has Resumed Regular Shipments Again.

Two cars of Alpine ores are en route rom Tonopah and scheduled to arrive at the samplers within the next

Shipments were suspended some time Shipments were suspended some time ago, said W. P. O'Meara this morning, for the purpose of carrying out a certain plan of development. The work has completed and Mr. O'Meara says the mine is in shape to contribute two or three cars of ore to the local market regularly each week.

#### COLUMBUS CON. STRIKE. Director L. A. Jeffs Says the Vein is Hold-

ing Out Well. Director I. A. Jeffs, of the Columbus Consolidated, returned from that Alta mine last night, where he went to look over the most recent strike, which occurred in the west drift from the main tunnel. The vein is holding out well, Mr. Jeffs says, both in extent and value; it is about 10 feet wide and contains ore as rich as any ever produced in the camp in recent Shipments will be made from the

#### CONCENTRATES.

The air compressor for the St. Louis-Ontario mine is now being installed. The Yampa smelter building at Bingham is rapidly assuming form and the main roaster building will soon be un-

Manager Glen R. Bothwell and Secy. R. E. Conaughy, of the Sacramento Gold Mining company, have gone to Idaho on a brief business errand.

Manager C. H. Doolittle, of the Dixie mine and smelter, near St. George, ar-rived in the city yesterday. The smelt-cr is treating an average of 50 tons of ore dally, which is productive of about 12,000 tons of copper bullion.

The ore and bullion settlements reported late yesterday afternoon were as follows: Crude ores and concentrates, \$21,900; base bullion, \$36,100; gold bars, \$29,900. Total, \$97,900.

Manager J. L. Justice, of the Tono-pah-Utah mine, came in from Nevada yesterday with a sack full of samples from the property, which are in the hands of the assayer today. Mr. Justice will be here several days.

Preparations for the trial of the case of the Perto Mining company vs Highland Boy Consolidated, involv-ing extra lateral rights, are being made by both sides. The case comes up in he district court next month.

R. G. Wilson, president of the New York Bonanza Mining company, closed a deal yesterday whereby he came in-to possession of a control of the stock of the Rochester Mining company in Park City, whose property adjoins the St. Louis-Vassar.

Returns from the initial lot of ore shipped from Copper Contact property near Sodaville, Nevada, have been received, revealing contenst of 11 per cent copper, \$12 in gold and 1.7 ounces silver to the ton. The Copper Con-tact was recently acquired by A. J. Bettles and others.

Manager Morris R. Hunt of the Utah Queen, of Dry Canyon, is in the city. He states development work is progressing favorably at that property and the camp in general is in a prosperous condition. The Eureka-Ophir company has two cars of ore ready to be for-warded to the smelters and the Mono one car.

A copy of the articles of incorporation of the Gold Dust Mining and Milling company of Heber City, was filed in the secretary of state's office today. Its capital stock is \$25,000, divided into shares of the par value of 10 cents per share. J. R. Murdoch is president; Wilford Van Wagener, vice president; J. C. Jensen, secretary and treasurer. The company owns four claims in the Snake Creek district, Wasatch county. Creek district, Wasatch county.

The controls were received from the The controls were received from the samplers yesterday for the first car of ore shipped from the Little Chief mine in Tintle. The product did not come up to expectations, however, the lot carrying values to the amount of \$13,10 ounces silver; 31.3 per cent lead and 60 cents in gold. The management is anything but discouraged over the result, as the ore was taken out just as it was knocked down and without any sorting.

any sorting. C. O. Clark returned yesterday from C. O. Chark returned yesterday from the Big creek and Thunder Mountain districts and reports that there has been great activity in both camps during the summer. The people in the Big creek district are anxiously looking forward to the extension of the wagon road from Warren Into the cumpand will on Warren into the camp, and will en-deavor to secure its opening during the next season. It is the general desire of the campt to have a direct out-let to Grangeville and Lewiston and to secure their supplies from this way, but before this can be accomplished it will be necessary to extend the road

## LOWER MAMMOTH SEVERELY POUNDED

Stock Was Active in the Pit of The Mining Exchange During the Forenoon.

#### THE MARKET WAS SLUMPISH.

Nearly All the Traders Were Hit-May Day Under 9 Cents-Closing Quotations.

The sales of stocks on the Mining Exchange this morning amounted to 26,400 shares, which brought the sum of \$8,325. The market was in much the same condition as yesterday-slumpish. Lower Mammoth, which has been on the shelf for some time was taken down and subjected to a severe pounding in the pit, resulting in a fall to 53 cents, the closing bid. The sellers were numerous, while the buying crowd was limited :but during the two calls 1,900 shares were picked up. Carisa opened with a sale at 14 cents, which was followed by a decline of a half cent. May Day sold under 9 cents a share; Star Con. dropped to 3216 cents bid, while Tetro was bought as low as 22% cents; the stock revived, however, on the open board.

The closing quotations and sales were

REPAIRS BEING MADE.

Shipment of Refinery Slag from Con-Mercur at Smelters Today.

Manager George H. Dern returned last night from a two days' trip to the Con. Mercur mines. The accident to one of the tanks a few days ago rather upset plans for the starting of the mill equipped with the Moore slimes plant, Repairs are being made as rapidly as possible, but it will take until the first f the month to get things in running or the month to get things in running order again.

A shipment of slag from the refinery, valued at about \$8,000, has arrived at the smelter and will be sold this af-

## IMPORTANT IDAHO DEAL.

A Third Interest in Franklin Gold Mine Sold for \$100,000.

It has just been made public that a sale of a third interest in the famous Franklin mine at Pine was consumat-ed about 10 days ago, says the Boise Statesman, R. P. Chattin, who has long owned a two-tbird interest in the mine. bought the remaining third interest from his three partners Elmer C. Towne of Rocky Bar, Harry C. Wyman and Frank T. Wyman of Bolse. The conof Rocky Bar, Harry C. Wyman and Frank T. Wyman of Bolse. The consideration paid by Mr. Chattin for the Interest is not made public, but it is said to have been upwards of \$190,000, A large proportion of it, and perhaps all was spot cash. The mine has been held at \$250,000 for some time, and not long ago a purchaser was found who syreed to pay that price. He agreed to pay that price. He was un-willing, however, to meet all the condi-tions and terms of the sale as proposed by the owners, and the deal fell through.

## upon fully as large a consideration for the entire property as the deal-which failed of final consummation. The mine is quite well developed and has been upon a paying basis for several months.

WAH WAH SPRINGS.

Laying of Main Pipe Line Will Commence Tomorrow.

A. J. Bettles had M. M. Johnson of the metallurgical and exploration de-partments of the Newhouse mines, re-spectively, returned from Ecaver coun-

ty this morning.

Mr. Bettles went over to the Wah
Wah springs where he found the contractor had all of the streams under
control and the waters from all the springs, excepting two of the smaller ones, flowing into the reservoirs recently constructed. The pipe lines to the remaining two will be connected up in a few days. Among the improvements being made in that vicinity is the ferreing of the except against which fencing of the several springs, which has been done to prevent pollution by herds of livestock.

The pipe for the main line is arriving and a force of men will begin lay-

LATHAM'S NEW EQUIPMENT. Manager Moats Has Purchased a New Gasoline Hoist.

Manager George L. Moats, of the Latham Mining company, operating in the Spruce mountain, Nev., district, has purchased a 25-horse power gasoline hoist for that property, which will be shipped tomorrow. Moats will also leave for the mine tomorrow, accompanied by a party of eastern investors.

# STILL CONTINUES.

Many Stocks, Leaders and Others, Registered Further Severe Declines.

#### STEEL MADE NEW LOW RECORDS

Prominent Banking Interests Make Investigation Which Shows No Dangerous Features.

New York, Sept. 25,-Yesterday's liquidation in the stock market was very generally renewed at the opening today, and further severe declines were registred. All the United States Steel issues dropped to new low records, the common selling as low at 16%, following opening sales of 4,000 shares at from 16% to 16%. The preferred stock declined to 62% and the 5 per cent bonds were quoted at 711/2, a drop of 16 point from yesterday's low price. The market steadied soon after the opening on buying orders which seemed in the nature of support and were said to emanate from strong quarters. There was also a great deal of short covering. Reports that leading financial interests had formed an agreement to support the market today could not be verified.

Save for slight re-actions the market continued steady up to noon, at prices slightly below the top. Business showed a marked falling off from the early ac-

Shortly after noon the market again de-clined as a result of another drop in the steel stocks which carried them still low-er. The common stock soid at 16, the preer. The common stock soil at 16, the pre-ferred at 60% and the 5 per cent bonds at il. The setting of these securities was very general and unexplained. The rest of the list went down in sympathy. The neaviness of the general market was reflected on the "curb," the most noteworthy feature there being a 5 per cent decline in Interborough Rapid Tran-sit, a break of over 9 points in two days. The industrials on the "curb" were all weak.

sit, a break of over # points in two days. The industrials on the "curb" were all weak.

The Evening Post says today:
"Prominent banking interests announced today that after the close of yesterday's market they had undertaken an investigation to see whether there were any weak houses in the Wall street region. This investigation, although informal, was conducted by interests of such extensive connections as to make it unusually trustworthy. They made the unequivocal statement today that the situation had developed no dangerous features and that not a single stock exchange house was in the slightest way embarrassed. They said, nowever, that the feeling of uncertainty prevailing in most quarters had given rise to many rumbrs, all of which were without foundation so far as they related to the stability of any large interest."

The opening dealings in stocks disclosed continued weakness at some points but support was accorded at others. The result was a feverish and irregular tone. United States Steel securities were a conspictous example, all three opening at new low records. The sale of 1,500 shares of the preferred carried it is under yesterday's closing. There were 4,000 shares common Steel sold at 16% to 16%, compared with 17, last night's closing, and the second mortgings bonds sold at 14%, a decline of is. There were running sales of Atchison at 62% to 62%, compared with 17, last night's closing, and the second mortgings bonds sold at 14%, a decline of is. There were running sales of Atchison at 62% to 62%, compared with 17, last night's closing, and the second mortgings bonds sold at 14%, a decline of is. There were running sales of Atchison at 62% to 62%, compared with 15, last night. The changes otherwise were fractional and pretty evenly mixed between gailts and losses. A sale of 1,000 shares of United States Steel at 16%, the lowest ever recorded, marked the end of the opening declines. Supporting orders made their appearance in all quarters and prices were bid up rapidly on large transactions. Promment orders were bid up rapidly on large transactions. Prominent stecks rose well above yesterday's close, the improvement reaching 16142 in St. Paul. Missouri Pacific, Union Pacific, Texas & Pacific, Reading, Baltimore & Ohio, Louisville, New York Central and Amalgamated Copper, United States Steel railed to 1744, and the preferred to 6442. The support did not follow the advance far, and prices reacted, but steadied again with a quieter market. A few losses of note occurred before the railyl became effective, including 144 in General Electric, 2 in Hocking Valley and Wheeling & Lake Eric first preferred, and 3 in Wisconsin Central preferred. When it was seen that support was renewed on the reaction the bears covered freely and litted prices considerably higher. New York Central, Union Pacific, Missouri Pacific, Baltimore & Ohio and Amalgamated Copper were the largest gainers, Lake Eric & Western fell 2. International Pump 244, Jowa Central preferred 24, Pullman 342, and Linseed Oil preferred and Snuff preferred 6.

Preferred 6.

The market was slightly lower but dull and steady at noon.

A bear drive against United States Steel A bear drive against United States Steel preferred to uncover stop-loss orders broke the price to 604 and precipitated heavy liquidation in the standard stocks and specialties. United States Steel touched 16 and the second mortgage 5 per cent bonds 71. Many of the active stocks foll below the opening low price, particularly Missouri Facilic, Reading, Rock Island and St. Paul. Railrond stocks generally did not get much away from yesterday's final figures. Support appeared again in United States Steel preformed and its recovery to 62 carried the general ist up a point or more in many instances. Trading became very quiet on the raily. The market showed more stability on its last raily. The manifest buying for support in many stocks induced more general short covering and the market retraced its course to the high lovel of the forenoon. In some instances better prices were obtained but advances of a point or over were well distributed throughout the active list.

CHICAGO.

Chicago, Sept. 25.—Wheat opened firm, with prices being ½ to ¾ higher, December at 76½ to 77, and at 78½ to 75.

Cash: Wheat—No. 2 red, 79482; No. 3 red, 77478; No. 2 hard winter, 744784; No. 3 hard winter, 72½477; No. 1 northern spring, 99; No. 2 northern spring, 88489; No. 3 spring, 76278.

Corn—No. 2, 4644646; No. 3, 46446½.
Oats—No. 2, 36436½; No. 3, 35½4338.

A feeling of timidity due to weakness in Steel stocks brought out a quantity of long wheat and caused a break in December to 77½. The strength soon returned, however, on heavy foreign buying, and December closed at 77½.

Close: Wheat—September, 75½; old, 75½; December, 77½; old, 77½; May, 48; September, 50.

ber, 45.
Oats-September, 37; December, 374;
May, 37%.
Pork-September, 12.29; October, 12.25; January, 12,30. Lard-September, 10,58; October, 7,72½; December, 6,32½. Ribs-September, 9,15; October, 9,20; January, 6,57½.

ary, 6.57½. Rye—September, 56½. Flax—Cash, northwest, 1.62. Timothy—September, 3.25. Clover—October, 9.75. Barley—Cash, 48@61.

NEW YORK PRODUCE. New York, Sept. 25.—Wheat—Receipts, 12,675 bushels. Fairly active and firmer on covering of room shorts, influenced by adverse weather news and yesterday's blg export business. December, 82 13-16883, Butter—Receipts, 6,500 packages. Steadler, State dairy, 15/22); creamery, 15/221½, Eggs—Receipts, 6,500 packages, Firm. Western, 17/24.
Sugar—Raw, firm; fair refining, 3%; centrifugal, 96 test, 35/26 15-16; molasses sugar, 3½, Refined is firm; crushed, 5,50; powdered, 5,00; granulated, 4,90.
Coffee—Steady; No. 7 Rio, 5,5-16.
