

MINING, BUSINESS AND STOCKS.

EXCHANGE CALL IS QUIET TODAY

Daly-West Starts Out Well but Flattens Before Close of Call.

LOWER MAMMOTH ADVANCES

May Day Weaker-South Swansea Gains-Four Aces Down to Bedrock-An Old Day for Galena.

TODAY'S METALS:

SILVER 50
LEAD \$4.52 1/2
CASTING COPPER 15

The call on the exchange today was productive of nothing stirring. The business transacted runs below that of yesterday and some stocks show a weakening tendency. The most notable exceptions are Lower Mammoth, which started in at 60 and rose to 62 1/2 before the call closed. Eagle and Blue Bell was also stronger at 1.45, while South Swansea moved up to 1.35 1/2, the price of the last sale.

Daly West made its first sale at 12.20, but those who expected it to go higher were disappointed, for it rapidly declined to 12.05, and closed at 12.05 bid.

Four Aces was at its lowest bid today owing to the assessment becoming delinquent and several thousand shares were hung on the market at 2 1/2.

Bowers Extension shows no gains but weakened at 7 1/2, while Yankee Con. hung around 11 1/2.

May Day has lost its impetus of a few days ago and closed today at 80 bid. Galena participated at 24, while Daisy let go 50 at 13. Star Con. sold at 25 1/2, and Sunbeam responded at 55.

Jensen's Church Chronology, a chronological history of the Church from 1865 to the close of 1898. Printed in new type throughout. In any style of binding desired. Price \$1.25 \$1.50 a \$2.00. The funds derived from the sale of the book will be used for the erection of a new Latter-day Saints' Memorial Temple in this city. For sale at THE DESERET NEWS.

STOCKS GO UP IN PRICE.

Brief Depression, then Rising Figures Come Again.

Notable Firmness in Railroads-Market Gets Dull-Live Stock Steady-Prodnce Weak.

New York, Jan. 5.-The rising tendency of Americans on the London stock exchange caused sympathetic advances here at the opening throughout the list. Several of the specialties were up over a point, but were unsettled in tone. Heavy covering by shorts in sugar caused a rally to 1.23. At this level unloading broke it to 1.23 1/2. Other stocks were forced down under the drive, but only in a few cases did the losses exceed fractions. Recoveries in the general market were made later owing to a sharp rise in Brooklyn transit to above 74. Support then appeared in sugar, and tobacco was also taken freely on a rising scale. Some difficulty was experienced in holding the specialties on the rise, but the grangers, trunk lines and Pacific were notably firm. Additional gains were made by many railroad stocks, with the trunk lines and allied specialties leading. The specialties as a rule did not maintain their best level. Metropolitan street railway and Republic steel, preferred, rose 1/4 each, the latter reacting 1/2. The market was dull and easier at noon. Some of the weakness prevailed in commercial bills, but there were some scattered advances, confusing the tone.

Sugar extended its decline to 1.21 and the iron and steel stocks continued weak all around. The general market was quiet and dull, with about last night's level of prices when the decline was arrested. The closing was semi-stagnant and firm, at small net changes, except among the industrials.

THE ORE OUTPUT IS INCREASING.

The Centennial-Eureka Ships 23 Cars of Ore This Week.

GOLD DUST CONSIGNMENTS.

Hearst-Haggins Interests in Daly-West Secured-West Argent Looking Well.

The Centennial-Eureka is doing some heavy shipping these days which makes fair promises for the company doing its part in the contract with the American Smelter company. This contract calls for the shipment of 100,000 tons of ore within the next 24 years. The shipments from this bonanza during the present week amount to 23 cars of ore which, according to the values of past shipments, will net the company some where about \$17,000. This ore, it is stated, comes from the upper levels of the mine, much of it coming from the famous Oregon slope on the 400 level and the faith of the management is such that a station is being cut on the 1,600, and it is expected that the vast ore chate will be encountered at that depth. But great as is the output of 400 tons of ore weekly the Centennial will yet make its shipments foot up to over 100 tons per week or it will fall in its contract. No one who has seen the mine doubts that the management is doing its best to carry out the contract. The ore is being shipped in 23 cars a week when all the preparations now being made are completed.

THE LOWER MAMMOTH.

Discords Said to be an End-Committee will Manage Mine.

It is intimated by Simon Bamberger that peace will now prevail in the Lower Mammoth camp, and that instead of there being a hot time at the meeting next Monday the majority will then quietly vote for Adrian E. Ellis as president. H. S. Joseph as vice president, Josiah Barnett as treasurer, and Samuel J. Paul as secretary. The directors will, most likely, be Simon Bamberger, James Chipman, Josiah Barnett, C. D. Clift and Isaac Solomon. The mine will, in future, be managed by an executive committee consisting of Simon Bamberger, Col. Ellis and H. S. Joseph, the choice of manager being also provided that the mine shall always be open to the shareholders who are to be furnished with a statement of the mine's condition from time to time. The determination to run the mine in a business way without resort to subterfuge is commendable. It cannot but inspire confidence on the part of the public and it is safe to say that it would be better for mining as a business were more mines worked in the same way.

MINES OF STOCKTON.

West Argent Shipping a Good Grade of Ore-Mill Told Of.

Eleven men are employed at the West Argent of Stockton, and indications for its becoming a money maker are becoming stronger every day. Several cars of good ore have already been shipped since the present management took hold, which run about \$29 a ton. Whether this grade of ore will hold out is questionable, but it is stated that there is a good deal of ore in the mine of a lower grade that will leave a nice margin. Mr. Cowan of Montana has been figuring on building a custom mill for some time past and a number of miners in Stockton are hoping that he will succeed in doing so. It may serve to inspire greater confidence in the Stockton's future as a producer of mineral wealth.

CARBONATE HILL MINE.

Mill of 50 Tons Will be Built - Ore Runs 78 Per Cent Lead.

"The mill which it is proposed to build at the Carbonate Hill mine, near Peterson, Morgan county, will have a capacity of fifty tons per day," said Mr. A. E. Briggs today. "We propose to begin small and make additions as we need them."

A very good grade of lead ore is being shipped from this promising property. It is said to carry as high as 78 per cent lead with good silver values. The ore is being hoisted with a windlass from the workings in the old incline shaft. Work will be continued on this shaft and at the same time the lower tunnel is being pushed to the vein which, when tapped, will give over 100 feet of stopping ground. Mr. Mullens of Butte is expected here shortly, at which time the mill and other improvements will be arranged for.

BIG COPPER STRIKE.

Four-foot Vein in Newbury Claim Which Averages 28.8 Per Cent.

One of the biggest copper strikes of the year 1899 is reported from Grand Encampment as having been made a few days east of the town, says the Laramie Boomerang. The strike consists of a four-foot vein of ore averaging at the surface 28.8 per cent pure copper. The discovery was made by Woodson brothers on a location made only two months ago. At a depth of three feet they found a vein of six inches which began to widen out. Four feet below the ore was a four foot wide vein with ore worth \$100 per ton. The vein increases in width and ore values with depth. An option has been given on the property and a strong company incorporated, including five other claims on the belt and arrangements made to carry on development. A mining plant has been ordered and buildings are being erected for shaft houses and dwellings. It is expected to make shipments of ore before the close of the month.

DALY-WEST DEAL.

The Hearst-Haggins Interests Are Secured for Something Like \$500,000.

Word was received from New York yesterday afternoon by Simon Bamberger that the 7,000 shares of Daly-

Such Shoe Selling

We've never seen. At present rate of going these 55 box calf shoes we're selling for 24 will last just about the week out. To the "bargain hunter" this doesn't seem much of a reduction, but to the knowing ones, it means a great deal; means a shoe as good as any \$6 shoe on the market. A shoe that all Robinson shoe knowledge could build for \$5 selling now for \$4. Don't wait too long.

ROBINSON BROS. CO.
SHOE BUILDERS. 124 Main St.

West Mining Company's stock held under option by J. E. Bamberger had, at last, changed hands. The figure is said to be about \$500,000 which was paid the Haggins-Hearst-Tevis combination which controls the Ontario mine. It is also said that E. E. Thompson and J. E. Bamberger will be made directors. It is now considered very probable that the prediction made over a year ago that Daly-West would go to \$18 or \$20 a share is in a fair way to be fulfilled.

THE SHOEBIDGE-BONANZA.

Samples of Ore Received Today from Strike on West Drift Off 450 Level.

Samples of ore were received today by Col. H. G. Hedstrom from the west drift off the 450 level of the Shoebidge Bonanza. It was not known today how they would assay, but returns were expected this evening or tomorrow morning. The mine superintendent expected that the samples will show good values, but Col. Hedstrom states that he does not attach much importance to the strike, as the ore looks to be mainly an iron composition.

CYANIDE PRODUCT.

Chloride Point and Geyser Marion Report Today with Big Returns.

After a few days of light business the rooms of the Consolidated Kansas City Smelter and Refinery were the scene of a great deal of activity today, the centennial product of 1,400 pounds of cyanide product from Mercur and Lion Hill. Geyser-Marion contributed 800 pounds of this amount
