While the largest two consumers were not in the market for silver, the pro-duction of the metal has been greater than before, owing to the increased production of the Canadian mines. The Anaconda mine, which is one of the largest silver producers in the country, has not been shipping the metal for several months, but despite this the accumulation has increased both here and in London. The United States has been a moderately large shipper of sil-ver to London, from which center the China and India demands are satisfied, but the stores of the metal there have reached enormous proportions, ac-cording to late advices from experts.

creached enormous proportions, ac-cording to late advices from experts. "Baron Sawell, vice president of the American Smelters Securities company yesterday stated that the decrease in the price of silver had cut deeply into the profits of the American Smelling company. He also stated that business had fallen off as compared with that

YUKON GOLD FIASCO.

Something That May Interest a Few Local Lawson Followers.

An Ottawa, Ontario, dispatch says about Yukon gold: T. W. Lawson's venture in Yukon Gold was the cause of a series of answers to a number of questions put by Claude Macdonell in the heurs of commons Mr. Oliver the house of commons. Mr. Oliver, minister of the interior, said that the minister of the interior, said that the attention of the government had not been called to the advertisement by T. W. Lawson with respect to placing on the market the shares of the Yu-kon Gold company, of which Daniel Guggenheim was represented to be president and Isaac Guggenheim secre-

iary. In reply to a question as to what is the extent of the company's holdings, the minister stated that many of the claims held by the company have not been surveyed, and they vary in size according to the regulations under which they were acquired the total area cannot be computed. The government had no communica-tion of any kind with T. W. Lawson or with any member of the Guggenheim syndicate, with reference to the pur-

or with any member of the Guggenneim syndicate, with reference to the pur-chase or acquisition of the claims. In reply to the question: Is the gov-ernment aware that the Yukon Gold company is capitalized at \$17,500,000, and that the public has subscribed for shares therein on the faith and basis of the statements contained in the said description of the sheadbard aware to the sheadbard aware to the statements contained in the said advertisement as to the absolute ownadvertisement as to the absolute own-ership of the Yukon Gold company, of the aforesaid claims? the answer was: As the company appears to be oper-ating under local ordinance, no doubt, a statement as to the amount of capi-talization has been filed with territorial government. This government has, however, no information.

DEPRESSION IN SILVER

Lowest Price in Ten Years Reached During Last Week.

When silver dropped to 52 cents last week it reached the lowest point and in discussing the subject the New York mercial say:

Commercial says: "This drop in the price of silver not only makes a new low record for this year, but also for the last 10 years. In the early part of 1907 bar silver in New York sold at 71 cents. Since that time it has shown a downward tendency, but several times since has advanced particular.

hut several times since has advanced materially. "The great drop is due directly to the fact that the Indian bazars, which are the chief consumers of the metal, have not been in the market for six months. China, also a large consumer has not participated to the extent that it had for the several preceding years.

AJAX MAY SHIP AGAIN.

Directors Discussed Matter of Resump. tion at Yesterday's Meeting.

It is likely that the Ajax mine in Tintic will resume operations again soon. The matter was discussed at a meet-ing of directors yesterday and the man-agement was authorized to consult with the smelters with reference to treat-ment charges. Manager Thomas Weir expects to

visit the mine during the week to ascertain just what is required to be done at the mine to get it in shape to pro-

duce regularly. The bins at the mine are filled, hence shipments could begin right away if satisfactory terms can be made with the smelters.
