

GOV. STEUBENBERG ASSASSINATED.

Idaho's Former Executive Killed
By a Bomb at His Own
Gate.

BOTH LEGS WERE BLOWN OFF.

Crime Charged to Some Member of
The Famous "Inner Circle" of the
Coeur d'Alene Dynamiters.

Boise, Jan. 30.—Frank Steunenberg, former governor of the state, was killed at 6:40 this evening at his home in the suburbs of Caldwell. A dynamite bomb had been placed at his front gate with some contrivance by which it was exploded as he entered. Both legs were blown off, and he lived but 20 minutes. There is no known reason for the outrage, but it is charged to some member of the famous "inner circle" of the Coeur d'Alene dynamiters whom he prosecuted so relentlessly in 1899 while he was governor. Gov. Gooding is in communication with the authorities of that county and is prepared to put the full support of the state behind the officials there in running down the perpetrator of the crime. It is thought probable that a leading detective agency of the county will be asked to send some of their best men to the scene, and the state will offer as great a reward as the governor may find he has power to propose. Deceased was governor of the state from 1897 to 1900, having been twice elected. He was born in Iowa 41 years ago and had been in Idaho since 1887. He leaves a wife and three children.

BOISE DREADFULLY SHOCKED.

Boise, Ida., Dec. 30.—The news of the assassination of Frank Steunenberg came as a dreadful shock to the people of this city, where he was almost as well known and as well beloved as in the town where he made his home. It seemed impossible that such a crime could be true, and men have walked the streets wondering how it could be that such a man could be stricken down in that manner.

For years he lived in the capital as governor, and won the confidence of all classes. He was never intrusive, one of his many distinguishing characteristics being his modesty. While he was in office he struggled always to keep out of print, this being most marked in connection with matters which reflected the greatest credit upon him. He was thoroughly democratic in all habits, of sterling honesty in all things and a power in any cause in which his energies were enlisted. Because of his modesty the people became acquainted with him gradually, but when they came to know him they became earnest admirers.

STORY OF THE TROUBLE.

Part Played by Gov. Steunenberg in
Coeur d'Alene Insurrection.

The residence of the late Frank Steunenberg, former governor of Idaho, would be the last place one would select as the scene of such a dastardly crime as started America Sunday morning. It is a typical country home, nestled among young trees on the outskirts of Caldwell, one of the flourishing little towns on the main line of the Oregon Short Line in western Idaho. On one hand lies the town, on the other stretches an expanse of cultivated lands. Save for the lowing of kine and the cackle of poultry all is bucolic peace. In the confusion following the explosion of an internal machine it would be the easiest matter in the world for an assassin to escape from the immediate vicinity.

In a great measure the home of the assassinated man was a reflex of its owner. Frank Steunenberg was a quiet man of simple tastes. While he made for himself many enemies during his administration none will gainsay that he was brave, honest and courteous to all with whom he came in contact. No matter if he had been dragged from his bed after midnight for an interview on a distasteful topic, or was interrupted during the press of business, he was always the same, kindly and courteous. Whatever he deemed his duty he would carry through to the bitter end without weighing the consequences.

A Live Wire

Every nerve is a live wire connecting some part of the body with the brain. They are so numerous that if you penetrate the skin with the point of a needle you will touch a nerve and receive a shock—pain it is called. Aches and pains come from a pressure, strain or injury to a nerve; the more prominent the nerve the greater the pain. When the pain comes from a large nerve it is called

Neuralgia
whether it be the facial nerves, or the heart, stomach, sciatic or other prominent nerve branch. To stop pain, then, you must relieve the strain or pressure upon the nerves. Dr. Miles' Anti-Pain Pills do this.

"I suffered intense pain, caused by neuralgia. I doctored and used various medicines without getting relief until I began taking Dr. Miles' Anti-Pain Pills. They did me more good than all the medicines I ever used. They never fail to cure my headaches, and I feel like never leaving my bed after-effects."

W. M. BECKMAN,
327 W. 4th St., Erie, Pa.
Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. New York: Miles Medical Co., Elkhart, Ind.

AFTER DIGESTION—WHAT?

It's not enough to digest your food, and reduce it to pulp or liquid inside you, but it must also be properly absorbed, carried to the proper organs, filtered, purified, and carried by your blood to the various parts of your body which are worn out and stand in need of repair.

This is a system of complicated machinery, engineering, chemistry and physics, before which all of man's most wonderful achievements of the world began, pale into insignificance. And, when you come to think of it, next to the marvel of any complicated piece of machinery itself, is the man who, when it has broken down, can repair it and make it go again.

Stuart's Dyspepsia Tablets. Really, the most marvelous achievement in the vast field of man's manifold endeavors.

A perfect medicine, which never fails to cure, or set in running order again, the complicated mechanism of man's internal digestive arrangements.

The secret of the great success of Stuart's Dyspepsia Tablets, is simply this: they have been prepared upon the firm foundation of the most thorough research into the real origin and cause of all disorders, due to the improper digestion and absorption of food.

Knowing the cause, further research led to the knowledge of how to relieve and cure the trouble. Stuart's Dyspepsia Tablets are the only medicine founded upon certain scientific rules of treatment, which make success a certainty.

They penetrate into all the channels of your being, into the minutest arteries, the finest lymphatics, the faintest traces of nerve tissue, and renew, build up, refresh, and restore to health, every disorder which improper food, poor digestion, or incomplete absorption has caused, in any portion of your anatomy.

No need to consult a physician. At the least sign of distress after eating, take Stuart's Dyspepsia Tablets. On the least pain or discomfort in stomach, liver, back, or bowels, take Stuart's Dyspepsia Tablets.

For any craving for improper food, continual hunger, constipation, thirst, or loss of appetite in greater or lesser form, take Stuart's Dyspepsia Tablets. By following these simple rules, you can rid yourself much pain, suffering and discomfort, and will add greatly to your span of life.

Stuart's Dyspepsia Tablets will make you feel strong and happy. Try them.

Book on Dyspepsia free. Address F. A. Stuart Co., Marshall, Mich.

The name of Frank Steunenberg will always be associated with the effectual stamping out of the reign of anarchy and terror in the Coeur d'Alene mining district in 1899. Called upon to act, he did it without flinching. Thanks to his prompt measures—measures which raised the law throughout the country—this section was elevated from one of the worst gangs of desperadoes and cut-throats that in the name of organized crime had terrorized capitalists and working men alike.

GOVERNOR UPHELD.

Despite the protests that went up throughout the country the course of Gov. Steunenberg and of the United States troops who were sent into the Coeur d'Alene district by President McKinley, was upheld by the congressional committee appointed to investigate the matter and the stern measures necessary to cope with lawlessness were vindicated.

An effort was made to shift the responsibility on to the shoulders of the McKinley administration, but with the manliness which was characteristic of the martyr in the cause of law and order Gov. Steunenberg took the whole burden. He affirmed that had the same conditions come up again he would do the same things, as he believed he had done the only thing possible under the circumstances.

It was this open avowal that apparently sealed his fate with the gang of anarchists who accomplished the foul crime of Saturday night.

WIKEN TROUBLE BEGAN.
Frank Steunenberg was elected governor of Idaho in 1898, when the Populists and Democrats united. He was re-elected two years later. It was in April, 1899, that the trouble which had been brewing in the Coeur d'Alene broke out at Wardner, when the Bunker Hill & Sullivan mine was destroyed by dynamite and several men were killed.

The miners who did the deed then stole a train and rode up the canyon. Before this happened there had been a regular reign of terror in the district, and several of the superintendents had been driven out of the country. As is generally the case the troubles had their origin in the demands for higher wages and the recognition of the union.

GOVERNOR STEPS IN.

Matters grew from bad to worse. Murders were of frequent occurrence and finally in May of the same year Steunenberg declared the district to be in a state of insurrection and established martial law.

In his proclamation the governor cited the fact that the peace officers were both unwilling and unable to cope with the situation; in fact, they were in sympathy with the mob. One of the first acts of the military was to remove the sheriff. Following his proclamation the governor called on President McKinley for troops to co-operate with the state militia.

"BULL PEN" ESTABLISHED.
Then was inaugurated the famous "bull pen." Men suspected of complicity with the mob, miners overheard to express sympathy toward the lawless and those suspected were thrown inside the stockade. Paul Corcoran, secretary of the miners' union at Burke, Ida., was indicted for murder as were a number of others.

This had a great effect in clearing the country of agitators who rather than be confined in the "bull pen" fled the country. From first to last there were 1,300 men imprisoned there, including the editor of a paper at Mullan, Ida., who undertook to print criticisms of the administration and the military.

The town of Burke, whence came the rioters who blew up the Bunker Hill & Sullivan mine, was practically stripped of its male population by General Merriam and the suspects one and all were taken into the stockade. In vain were petitions for writs of habeas corpus applied for. The courts decided that in the face of martial law the writ of habeas corpus had been suspended.

THE PERMIT SYSTEM.

Another feature to be introduced was the "permit system." General Merriam and State Auditor Sinclair, the latter representing Governor Steunenberg, promulgated a regulation that no miner should be employed in any mine in the district unless he had secured a permit. Coroner Hugh France of Shoshone county, who had been placed in charge of the deceased sheriff's office, was the man selected to issue these permits. He was invested with arbitrary powers. Under the oaths taken before a permit was issued, unionism in the district was effectually smashed for the time being.

This rigorous policy had the effect of establishing peace in the blood-stained district which has prevailed up to this time.

CORCORAN CONVICTED.

In the meantime Paul Corcoran was placed on trial for murder in the first degree before Judge George H. Stewart of Boise, who was sent to Coeur d'Alene by Governor Steunenberg to replace the regular district judge there. The case was prosecuted by W. E. Borah, now candidate for the United States Senate, James H. Hawley, a prominent Democrat and until recently mayor of Boise, and Col. J. W. Forney of Moscow, who was United States district at-

torney for Idaho during the Cleveland administration. The best legal talent available in Washington and California was obtained for the accused man. There was a vast amount of conflicting testimony introduced and finally the jury brought in a verdict of guilty of murder in the second degree, and he was sentenced to serve 17 years in the state penitentiary. Corcoran, however, only served two years, for he was pardoned by Governor Frank W. Hunt, who succeeded Frank Steunenberg.

OFFICERS THINK THEY MAY HAVE THE ASSASSIN.

Boise, Ida., Dec. 31.—A man has been arrested at Caldwell whom the officers think may be the assassin of former Gov. Frank Steunenberg. His name has not been reported. Five men in all have been detained on trivial charges in order that their whereabouts may be looked up.

When daylight dawned on the scene of the tragedy it was found that the dynamite had been exploded by pulling a wire. Pieces of wire and waxed fast-line were found in the trees on the lawn. Further, it is believed that two bombs were used, to make certain of carrying out the purpose of the assassins. They seem to have been together, both being pulled at once. It was quite definitely determined during the night that the mine was fired by a wire. The explosive was placed against the post against which the gate closed, and on the inside of the fence. That post was the victim's left as he entered, but the force of the explosion caught him on the right, showing he turned partially in closing the gate.

Had the mine been set to go off from movement of the gate the explosion would have occurred as he went in, and it is, therefore, certain the mine was fired by a wire, and not by a button, knowing his habit of making the trip to close the gate, waited until he had turned.

Shoshone county has offered a reward of \$10,000 for the apprehension of the murderers and has sent its sheriff to assist in the search. It was in that county, in the northern end of the state, that the Coeur d'Alene riots occurred in 1899. Steunenberg, then governor, overthrew the secret organization by which the unions were controlled, and the district has since enjoyed peace and prosperity ever since.

TWO SUSPECTS ARRESTED.

Portland, Or., Dec. 31.—An Oregonian special from Weiser, Ida., says: Two men answering the description of the men who it is thought arranged the internal machine at Caldwell by which ex-Gov. Steunenberg was killed, were arrested in this city today. One has a large scar on his face similar to the one on the face of the man who is suspected of having fired the dynamite to the gate. The men stated that they are miners, and one of them, who gave his name as Campbell, was unable to give a clear account of his whereabouts during the past few days. He stated he had been working at Emmett, Idaho, and had been over his denunciation and made threats of retaliation against the officers. A telegram was sent to Caldwell and instructions were telegraphed back to hold the prisoner for further investigation.

SUSPECTS ARRESTED.

From Weiser, in northern Idaho, the report comes that two suspects are under arrest, and that the authorities there have been instructed to hold them until a complete investigation can be made. The men claim to be miners, and one of them gave his name as Caldwell, declaring that he had been working at Emmett. His description tallies with that of the man who fired the internal machine to the gate of Gov. Steunenberg's residence.

TO NORT POLE IN AN AIRSHIP.

Walter Willman Commissioned by
Frank B. Noyes to Undertake Task.

BELIEVES CHANCES ARE GOOD.
Ship Will Be Built in Paris and Largest One Ever Made—To Report by Wireless Telegraph.

Chicago, Dec. 30.—"Build an airship, go find the North Pole and report by wireless telegraph and submarine cables the progress of your efforts." This was the startling assignment given a few days ago to Walter Willman, Washington correspondent of the Chicago Record-Herald by Frank B. Noyes, editor in chief of the paper, and the commission has been accepted by Mr. Willman. As an assistant of this daring expedition Mr. Willman will have the services of Santos-Dumont, editor of the paper, who will have charge of the construction of the airship and will act as aeronautic director and pilot of the ship on its voyage toward the north pole.

The airship, the order for which has been given, will be built by Louis Goddard of Paris under the supervision of M. Santos-Dumont and will be completed by the end of next April. No definite date has yet been decided upon when the explorers will start on their journey but it is expected that everything will be in readiness to get away next July or early in August. After completion the airship will have several trials in or about Paris and all the paraphernalia for the journey will be assembled in Spitzbergen where the explorers will await a favorable opportunity for the dash to the pole which, according to Mr. Willman, should be reached with a good run of luck should be reached in less than a week.

In announcing his acceptance tonight of the proposed expedition, Mr. Willman said: "If I did not believe that the chances of success were greater than those of failure I should not accept the commission."

"Mr. Noyes acted upon no sudden whim or impulse when he gave me the order to try and locate the much-sought North Pole, as he had before him a report which I had submitted to him as the outcome of two visits to the inner polar regions; of years of study of the problem of the pole; of many months of special investigation of airship construction and navigation; the wind and climatic conditions to be encountered, and all the multitudinous mechanical and meteorological factors involved. In this investigation scores of eminent experts and specialists were consulted, and the most complete, symmetrical and at least promising project was evolved by me representing a seemingly practicable combination of the latest development of many of the arts for accomplishing the result in view."

"The problem of reaching the pole by means of an airship does not require high speed, and the present state of the art of aerial navigation by gas-buoyed

TO NORT POLE IN AN AIRSHIP.

No definite date has yet been decided upon when the explorers will start on their journey but it is expected that everything will be in readiness to get away next July or early in August. After completion the airship will have several trials in or about Paris and all the paraphernalia for the journey will be assembled in Spitzbergen where the explorers will await a favorable opportunity for the dash to the pole which, according to Mr. Willman, should be reached with a good run of luck should be reached in less than a week.

In announcing his acceptance tonight of the proposed expedition, Mr. Willman said: "If I did not believe that the chances of success were greater than those of failure I should not accept the commission."

"Mr. Noyes acted upon no sudden whim or impulse when he gave me the order to try and locate the much-sought North Pole, as he had before him a report which I had submitted to him as the outcome of two visits to the inner polar regions; of years of study of the problem of the pole; of many months of special investigation of airship construction and navigation; the wind and climatic conditions to be encountered, and all the multitudinous mechanical and meteorological factors involved. In this investigation scores of eminent experts and specialists were consulted, and the most complete, symmetrical and at least promising project was evolved by me representing a seemingly practicable combination of the latest development of many of the arts for accomplishing the result in view."

"The problem of reaching the pole by means of an airship does not require high speed, and the present state of the art of aerial navigation by gas-buoyed

and motor-driven ships is ample for that purpose. From an easily reached base of operations in northern Spitzbergen we have but 550 geographical miles to go to the pole and a like distance for the return voyage. If we take the whole at 1,200 miles it means but 100 hours of motoring at 12 miles an hour. Santos-Dumont has repeatedly made from 19 to 23 miles an hour with a small airship equipped with relatively small motors."

"The airship in which we purpose to attain the north pole will be the largest practicable airship ever built. It will be 150 feet long and its greatest diameter will be 45 feet. Its surface will measure 22,000 square feet and its volume will be 225,000 cubic feet. Inflated with hydrogen it will have a total ascensional force of 15,000 pounds. Seven thousand pounds will be the weight of the ship and its equipment complete, leaving 8,000 pounds for cargo. The ship will be provided with three motors, with a combined output of 70 horse power. If the winds hinder no more than they help and there are no delays this ship can motor from north Spitzbergen to the pole in 45 hours."

"The airship will have an endurance capacity in buoyancy sufficient to enable it to remain 25 or 30 days in the air. It will carry 5,500 pounds of gasoline and its distance capacity during calm weather will be 18 miles, more than equal to the distance from Spitzbergen straight across the pole and the whole Arctic ocean to Alaska. As our airship will be constructed it will be able to make headway against two-thirds of all the winds that blow over though squarely adverse, and it is part of our project to motor only with favorable winds. It will be anchored to the ice by means of a 5,500 pound force of velocity exceeding one-half the normal speed of our craft. The ship will be subject to the will and hand of the navigator just like a steamship upon the ocean. Besides the 5,500 pounds of fuel mentioned, the ship will carry also five men, and a comfortable car to live in (which is also a boat in case of need). Food and supplies for 75 days, sledges to draw them over the ice, and in fact, a completely organized and equipped sledging party, ready at any moment to abandon the airship and take to the ice if at the worst our ship of the air carries us only to the vicinity of the pole, or two-thirds of the way to it, we have an alternative method of travel by which we may reasonably hope to complete our task and make our return to land in safety."

"At no time will our airship be out of touch with the surface of the earth. A guide rope, so called, but in our case a smooth, tapering line of steel, is to draw its lower end over the ice to keep the ship at a fairly stable height (150 to 200 feet, the altitudes most favorable to wireless telegraphy), and maintain under ordinary conditions the vertical stability of the craft."

"Wireless telegraph stations will be established at Spitzbergen and at Hammerfest, Norway, 600 miles distant. Further than this, a wireless equipment will be carried in our airship, and it will be our effort to send frequent and if possible daily dispatches to the outside world throughout all the time the expedition is in the Arctic regions, even from the pole itself, should we be successful in reaching it."

"The grounds comprise seventy-five acres of beautiful lawns, and flower gardens, and a very fine golf course. The hotel has 275 rooms and 125 bathrooms. It overlooks the whole San Gabriel Valley, with a magnificent view of the Sierra Madre mountains.
