In his 30 years' war with the whites, from 1845 to 1876, Red Cloud became known as the fiercest and boldest of the bioux leaders, and it was during those years that he gradually worked his way forward until he was recognized as the big chief of all Sloux bands and tribes. The old man is still vigorously opposed to the new idea. of the government in cutting off the rations of the younger Indians and forcing them to work for their living. Two months ago he sent out letters to the sub-chiefs instructing them to pre-vent the young men from working, and saying that the government working, and see them starve; that the government owed them rations forever. Their fighting days are over. They must not quietly accept this situation and become prac-tically slaves, working by the day for a master, when they should be forever supported by a government which has taken their hunting grounds from them.

"Therefore, the Sloux must refuse to work, and the white people everywhere will see the justice of their cause and will see the fusice of their cause and will see that they are taken care of. And I would advise Indians of other tribes and nations to do likewise. "Should all Indians refuse to accept should they will remain as Indians, but should they follow in the paths of the whites in years to come there will be no Indians, but instead will be a lot of
