Proposed Submission to Voters of California of Question Very Unwise-Schmitz's Action Endorsed.

Sacramento, Cal., March 12.-Shortly before the adjournment of the legislature today Gov. Gillette transmitted the following telegraphic correspondence on the Japanese question between himself and President Roose velt:

GOVERNOR TO ASSEMBLY.

"To the assembly of the state of California: I have the honor to advise your honorable body that yester. day I forwarded to the president of the United States a telegram, of which th following is a copy:

"Sacramento, Cal., March 14, 1907, --Hon, Theodore Roosevelt, President of the United States, Washington, D.

of the Chief Shies, transferent 2 "A bill is now pending in our leg-islature to submit to the voters two years from now the question as to whether or not Japanese labor shall be excluded from this country. Will the passage of this bill interfere with any of your plans or make it more difficult for you to accomplish what you have undertaken to do in the way of Japanese exitusion? Please answer at once as our legislature is desirous of knowing concerning it. (Figned) "JAMES N. GILLETTE. "Governor of California."

"In reply to this thread in the president the following message: "Hon, James Gillette, governor of California—I thank you for your sind and prompt attention to my bequest. Passage of a bill for submission to voters of California whether Japanese laborers shall be excluded would in-terfere with my plans and make it more difficult for me to accomplish, through the national government, yapanese labor exclusion. "The assumption of power by the viors of California to settle this ques-tion, if asserted to by the national government, would immediately end all my negotiations with Japan for friendly adjustment, because to nego-tion a settlement we must have power to settle, while on the other hand calornia cannot negative a treaty un-cate the Constitution. "It is said, however, to be perfectly the national government can settle the mational government can settle the mational government can settle."

"It is said, however, to be perfectly clear that under the Constitution only the national government can settle the question of exclusion, and such a vote of California as is proposed would have to be treated as entirely nugatory, while it would probably be regarded by those opposed to exclu-sion as a threat to ignore the consti-utional power of the United States and exclude Japanese in definince of their treaty rights to come in. "I carnesity deprecate the passage of any legislation affecting the Japan-cse. The national government now has the matter in hand and can in all human probability secure the results that California desires, while at the same time preserving unbroken the triendly relations between the United States and Japa. "I have the interest of California most deeply at heart. I shall strive to accomplish for California, as for phyer states or sections of this com-try, everything that can conserve its honor and its interest. to Japanese, before President Roose-velt interfered through his protest to Gov. Gillette. The assurance from Cali-formla officials that these measures un-favorable to Japanese will not become law has not relieved the anxiety of the administration entirely, as it is feared that the effect of the California sen-ate's action on pending negotiations be-tween Japan and the United States will be decidedly unfavorable. The San Francisco school board has not as yet rescinded its order requir-ing Japanese pupils to attend separate schools, and consequently Japan had not been asked to formally consider the terms of a treaty to settle the points of alference between the two ma-tions, the exchanges up to this time having been entirely formal. **TWO SISTERS HAVE** Two Illinois Girls Suffer from Scalp

Washington: March 12.—After the se-organization of the isthmian canal com-mission, with Col. Goethals as chair-man, it is believed that all seven of the canal commissioners will live upon the isthmus and the commission will become more of an adinistrative body than it was under Mr. Shonts. Under

They were consulted on engineering problems and in some cases on admin-istrative policy, but the authority to direct affairs was largely centered in the chairman. It is probable that the reorganiza-tion of the commission will not be completed until after Seey. Taft's visit to the isthmus late this month. With-out initimate knowledge of exact condi-tions upon the isthmus it is difficult to dicternine how the commission can work to the best advantage and the secretary of war has no desire to outwork to the best atracting, and the secretary of war has no desire to dit-line the policy definitely until Col. Shows That Government Ammunition Is Not Very Closely Gnarded.

Is Not Very Closely Guarded. Wishington, March 12.—That am-munition used in infantry rifles is not guarded as closely as has been claimed by discharged negro soldiers, and that it is possible for soldiers to obtain extra ammunition, was brought out in the Brownsville inquiry today before the senate committee on mili-tary affairs. This testimony was given by Capt. D. W. Kilburn of the Twen-ty-sixth infantry, which regiment pre-ceded the negro soldiers of the Twenty-fifth infantry at Fort Brown.

fifth infantry at Fort Brown. The same witness declared that citi-zens of Brownsville made threats that they would run negro troops out of town if they were brought there to supplant white troops, and on this point he was corroborated by Lieut Edwin Thompson, who was quartermaster of the same regiment at Fora Brown. Testimony also was given concerning the bullets taken from the walls of houses in Brownsville after the affray, and it was developed that these bullets might have been army ammunition intended for Syringfield riftes and fired by Mauser riftes, which,

"I like the way in which the mayor and school board of San Francisco went to Washington and acted with the pres-ident in bringing about a happy solu-tion of the Japanese question. It was diplomatic. It appears to me that the conference resulted in finding a good way out of the difficulty. Of course, San Francisco people object to having adult Japanese in the schools with their children. It should not be allowed, Make other arrangements for adult as would in the case of the dult French, Germans or peoples of a European ma-tionality."

He declared that if the present railroad agitation is kept up all the railroads are threatened with bankruptcy and that in 1606 hundreds of thousands of men will be thrown out of employment.
The great unrest in the financial world. President Stickney said, is not due to the policy of President Roosevelt, but is brought about by "hostile legislation by the various state legislatures."
Mr. Stickney contended that the only solution of the railroad problem is to grant all the power to regulate the roads to the federal government. He urged the establishment of a department of interstate commerce commission, its head to be a member of the cabinet and he asserted the present interstate commerce on mains is placed in the hand of ico many men. He said he believed far better results could be had if the entire matter was placed in the hands of one man.
President Stickney's visit here at this time, following so closely that of E. H. Harriman and the hurried trip of J. P. Morgan caused much comment in official circles tonight.
