Cure that cough with Gode's Pills and time coughs seldom return.

Keep your teeth and other orifices, including, in a healthy condition, by using Gode's Pills. They are the only pills that will clean the mouth, loosen the bowels, and give the system a healthy tone.

The World's Fair Tests showed no baking powder so pure or so great in leavening power as the Royal.

Take all your prescriptions to old reliable Gode's Pills Drug Store.

DESERET EVENING NEWS.

THURSDAY, JUNE 27, 1905.

WEATHER AND CROPS

Temperature Above Normal, Much Sunshine, Some Frost.

NO RAIN, FREE DRAINAGE THE WEEK.

Weather-Crop Bulletin of the Utah Weather Service, for the Week Ending June 24, 1905.

WEATHER.

The temperature, except on the 15th and 16th, has been above the normal, with an abundance of sunshine. Heavy frost occurred on the 15th, resulting in great damage to the grain and vegetable crops throughout the northern portion of the Territory. There was no precipitation reported from any section during the week.

CROPS.

The severe frosted weather at the close of the preceding week was very destructive to the grain and vegetable crops throughout the northern portion of the Territory. Potatoes, corn and all winter vegetables were frozen in the ground, grain in the field and heads out was seriously damaged, and a good deal of the fruit entirely destroyed, during which was not far enough advanced to be hurt much. In the southern portion of the Territory the crops sustained but little or no injury from the recent cold wave.

The last four days of the past week were warm and dry with plenty of sunshine but no precipitation. These conditions were favorable to all crops, especially potatoes, which are rapidly recovering from the effect of the cold wave. The first cutting of lucerne is progressing in the northern portion with light yields in many sections on account of frost and wet weather. In the southern portion a heavy crop has been harvested. Grapes and other vines are doing considerable damage to the leaves and fruit. Crops of corn, wheat and winter wheat are doing well. Several correspondents report that the streams are getting low and that there will be a scarcity of water for stock and irrigating purposes. The range begins to show signs of the need of rain.

REMARKS OF CORRESPONDENTS.

Layton.—The severe frost of the 15th did a great amount of damage to potatoes, lucerne, beans, etc. Grain is turning yellow and harvesting seems to be retarded by the laying of the grain in the field.

Box Elder.—Frost of the 15th damaged corn, potatoes and squash. Grain and fruit doing well.

Loweryville.—Potatoes and other vegetables badly damaged by frost. It is feared that some fields of grain have been seriously injured by the frost and cold.

Yeast.—Heavy snow 10th. Latter part of week good growing weather and crops begin to recover and look well.

Vernal.—Damaging frost on 17th. Tender vines, corn and potatoes from 10th to 15th many parts of the country. Native grasshoppers and other insects doing considerable damage to vegetables and fruit trees. Winter wheat doing well. First cutting of lucerne in progress.

Helix.—Night of 16th and 17th killing frost which killed beans, squash and seriously injured potatoes, corn and lucerne.

Vernal.—Frost 16th and 17th killed most of the fruit and seriously injured corn and lucerne.

Panguitch.—Lucerne being cut and some grain for feed. All soil and some spring grain grain from the effects of the frost on the 17th. Potatoes not coming out again.

Catch Junction.—Very hard frost on 16th, 17th, 18th all wheat headed out in place.

Newman.—Frost on 17th and 18th, killing gardens, potatoes, corn, headed wheat, apples, peaches and other fruit in trees.

New Harmony.—Fine weather for all crops. Lucerne all cut, no extra good crop.

Monroe.—Vegetables and garden stuff damaged. Potatoes and corn freeze black on 17th, the 18th has not been known in these parts before. Grain looks well. Frost of 16th and 17th, leaves all tender vegetables to the ground. Wheat and corn never promised better, having continued.

known in these parts before. Grain looks well. Frost of 16th and 17th, leaves all tender vegetables to the ground. Wheat and corn never promised better, having continued.

Utah.—Lucerne crop is light on account of the frost and weather which is something like the cold wave. But larger. They give the more the appearance of dying at the roots, and the blossoms do not come out.

Bluntville.—Frost, potatoes and all tender plants killed by frost the 17th. Grain is damaged. Water is getting scarce. Grasshoppers are hatching but are yet too small to do any damage.

Utah.—A killing frost destroyed almost all the tender vines during the night between Monday and Tuesday, the 16th and 17th, of this month. Potatoes will not get over it but corn, beans, melons, squashes, cucumbers and grapes are done for.

Horvathville.—The largest part of week rather cool, and the effect of the frost of the 16th very visible, and will be a drawback to the tender vines, and some loss. The latest part of week temperature fell up to the normal. With occasional rain to all crops. No reports of damage from the frost.

Butting City.—June 16, 17 and 18, very cold, night of 16th frost very hard, doing much damage to extent of our crops. Beans from 16th, 17th, 18th, and some corn and winter wheat nearly ruined. On 16th crops commenced growing again, potatoes that were frozen down are coming up again. Most of damage was done to fruit and garden work.

Wash.—Heavy frost on 17th, 18th and 19th, did great damage to beans, squash, potatoes and peas.

Canbyville.—First part of week very hot, potatoes and beans in bloom, cherries ripe, some heavy winds, frost on night of 17th.

Kanab.—First three days severe wind from southwest, last three winds from northeast, cold nights, weather very dry. All crops looking well, wheat looking well, first crop of corn nearly all in.

Center.—The 16th of June was wet with severe frost on the morning of the 17th. On the morning of the 18th corn, potatoes and all tender vines were frozen. Since then the weather has moderated with temperatures up to 80 in the shade, and a thunderstorm on the 21st.

Hampden.—Good growing week; irrigation in full blast; water is going to be scarce, winter wheat in the soil.

Helen.—Killing frost three nights in succession, slight the rest of the week. Potatoes are out down even into the ground, some I fear will not recover again. Over one-half of the fruit killed; even apples about the size of quinces are killed. Hardly vegetation growing rapidly the last few days. Thermometer in the shade. All tender vegetation is gone up, very little will survive.

Must.—Frost on the morning of June 16th, which killed squash and grape vines. Fair growing weather. Hot sun since, no frost.

16th.—The week on the whole has been good for growth. Corn is recovering from the effects of the frost; lucerne cutting in progress; beans all thrived out and looking well.

Lake Shore.—First crop of lucerne being cut, and very light; beans, potatoes and some corn was frozen very hard on the 17th; sugar beets doing well; peas are ripe; all grain crops looking good growing weather.

Hobbsville.—First part of the week damaged vegetables. Last part of the week has been warm.

Joseph.—Saturday was cold and frost; Sunday morning frost on the corn, potatoes, squash, beans and all vegetables of a sort and partly injured to the ground. The lucerne is being cut; that damaged; it is a considerable extent.

Wash.—The first part of the week very cold. Beans from out down all vegetation, even lucerne where ground was dry. The hay crop will be below the average. 21st, 22nd, 23rd and 24th very warm days. Wind has been westerly the potatoes have recovered some. Water is getting scarce in some localities; rain is getting dry.

Croydon.—Fine weather this week for all crops. Potatoes are recovering from the frost last Monday. The late

fruits have killed the cherries and damaged other small fruit. Signs of a short water supply are to be seen at this place.

Castle.—Snow on the low hills night of 16th. Beans, peas on 17th and 18th, frost potatoes and all other tender vegetation, and the leaves of oak and poplar.

Pow.—Heavy killing frost on 17th and 18th; the fourth three-fourths of an inch thick; grain and lucerne was hurt, and a great portion killed. In the ground, potatoes and all tender plants looked like a fire had been over them; cold wind the first part of the week, but warm and pleasant the last four days. Farmers are feeling blue, but hope the grain, or most of it, will recover from the damage done, although a portion seems to have been killed altogether.

J. H. SMITH, Director.
SALT LAKE CITY, June 25, 1905.

Salt Lake Temple.
The Salt Lake Temple will close on Friday evening, June 25th, and reopen on Monday, July 3rd, 1905.

Temple Notice.
The Salt Lake Temple will close on the 15th of July, and open on the 27th of August, 1905.
