

MINING, BUSINESS AND STOCKS.

DEVELOPMENTS AT MONTE CRISTO

Railroad Men's Mine, Located in Beaver County, is Showing Up Very Encouragingly.

GETTING CLOSE TO ORE BODY.

Followed a Fissure with Gratifying Results—Vein is Filled with Manganese—Stringers of Lead.

Late reports from the Monte Cristo Copper mine in Beaver county indicate that the stockholders who have stayed with the proposition so persistently in the past, for more than two years, and put up their assessments from time to time are about to receive their reward. Several months ago the management decided to follow a small fissure, apparently barren, but which bore evidences of leading to an ore body. At any rate the men employed in the mine were set to work on the fissure.

Secy. Wardlaw, who is stationed at Milford, has written local officials of the company that the fissure has increased in size and a filling of manganese with stringers of lead has come in. This news is at least encouraging and leads those interested to believe that a large body of ore is not far off. The mine is located about two miles from the Harrington-Hickory mine in which the Majestic Copper company recently made one of the most important strikes in the history of mining in Beaver county.

The stock of the Monte Cristo company is held almost entirely by railroad employees, men holding salaried positions and who have kept work going by each paying assessments into the treasury of the company from time to time. The property has been economically and judiciously managed and the project is deserving of success.

J. L. Craig, local agent of the Oregon Short Line, and an extensive shareholder, departed for the south last night to make an inspection of the property.

ON THE STOCK EXCHANGE.

Several of the High Priced Leaders Participated in Forenoon Transactions.

A number of the higher priced stocks participated in the sales made during the session of the Salt Lake Stock and Mining Exchange this forenoon. Daily West remained firm at yesterday's quotations but Daily Judge and Consolidated Mercury were both lower, the former going down at \$3.50 for future delivery. Lower Mammoth displayed a slight tendency to improve, while May Day pulled through the forenoon practically unchanged. Considerable interest was centered on Silver Shield for a time, but this was on account of several brokers filling their shorts. Considerable bidding was indulged in for Star Consolidated.

The sales of the early calls were as follows:

PROSPEROUS CHERRY CREEK. Work Being Rushed at the Grand Deposit Mine—The Siegel Consolidated.

The boardinghouse at the Grand Deposit copper company's properties is nearly completed and the work on other buildings is being rushed as fast as the delayed arrival of lumber permits. Harold Siegel, secretary and treasurer of the Siegel Consolidated Mining company, passed through camp last week en route from his mines to Salt Lake. He was accompanied by R. H. Brown, a well known Salt Lake mining engineer, who has just completed the survey of the Siegel mines for patents. George E. McMurray, a Cripple

Creek mine operator, is in camp looking over the rich mines of this district and is about closing a deal for a 1000 bond on the Little Johnny free gold mine in Cocomingo district five miles south of Cherry creek. He expects to begin developing the claim immediately and will have his ore located at the local mill. The property is owned by M. McAlulay, Tom Davis, Postmaster Collins and Ben Harrison, and has been a pay proposition from grass roots for years. Manager J. H. Cannon of the Old Imperial Mining company, is rushing development work on the drifts at the 250-foot level of the New Century mine in this district. They are taking out high grade gold-silver ore, the full width of both drifts and will make another shipment to Salt Lake at an early date. A blast and fan are now supplying fresh air in the drifts. Eighteen men are at present employed on this claim and a new assay office has been added to the surface improvements—Miner.

SUMMIT PLACER COMPANY. Files Articles of Incorporation at Provo—Operating Ozokerite Mines.

Special Correspondence. Provo, Aug. 26.—The Summit Placer Mining company, organized under the laws of New York, has filed copies of its articles of incorporation and by-laws with the county clerk. The officers are: S. L. Butler, president; B. A. Frank, secretary; Frank M. Clute, Richard H. Jagers and William C. Crane, directors. The capital stock is \$50,000, divided into shares of \$100 each. Provo is named as the principal place of business in the State of Utah, and J. R. Kroupa is designated as the person to whom all notices may be served. The company is operating ozokerite mines at Soldier Summit, of which Mr. Kroupa is manager.

AN OPAL DISCOVERY. Find Made on the Property of the Lemhi Mining Company, in Idaho.

Advises received from Salmon City, Idaho, state that W. H. Goss, who has just come out from Silver Creek, reports a valuable discovery on the property of the Lemhi Mining company of which W. P. Carter is superintendent. The main ledge of the Le Sieur Opal company crosses this ground, and it has been opened up to a width of 15 feet, and it may be even wider. Mr. Goss regards this a most valuable revelation and says the opal developments will pay the owners handsomely. He brought with him several specimens of the shining amorphous crystals and left a few at this office on exhibition. There is not doubt the ledge contains precious opal in large quantities including both the harlequin and the fire opal.

Victor Con. Extracting Ore.

Special Correspondence. Mammoth, Utah, Aug. 25.—The management of the Victor Con. is extracting high grade ore from the 500-foot level at a point directly under the winze where ore was encountered recently at a depth of 60 feet below the 400 level. The vein shows every indication of being permanent.

THE FORT HALL COMPANY. Stockholders Choose New Officers and Authorize Additional Equipment.

Special Correspondence. Pocatello, Idaho, Aug. 25.—The stockholders of the Fort Hall Mining and Milling company, held their annual meeting last night. L. A. West was re-elected president, and Geo. E. Ford was re-elected treasurer, with the following board of directors: L. A. West, W. A. Hyde, O. J. Bell, Geo. E. Ford and Wm. C. Petersen.

The stockholders feel encouraged with the prospects in sight, in that the 825 feet long, two veins have been crossed one 19 feet and the other 35 feet wide, the ore being copper bearing and showing some silver and gold. An assessment of one-half cent per share was levied, and instructions were given the management to place an order for an air compressor and drills.

NEW BOARDING HOUSE.

Utah Copper Company Will Build One in Bingham to Accommodate 150 Men. Among the improvements to be made at the properties of the Utah Copper company, the new boarding house which already ranks among the big ones of Bingham, and the boarding house and dormitory which will be constructed on the dimensions sufficient to comfortably provide quarters for 150 persons. Manager D. C. Jackling has given orders for the drawing of plans for this structure and the company's draughtsmen will proceed with them at once.

COLUMBIA COPPER ORE.

Winze is Being Dropped into a Fine Vein of High Grade Product.

Manager Frank B. Cook, of the Columbia mine, returned last night and reports that the winze from the tunnel level is penetrating a fine vein of high grade ore. When he left the mine during the forenoon he had been cut into the extent of three feet and the bottom was still in ore. He believes this will prove to be one of the most important disclosures ever made in the property.

CONCENTRATES.

Judge W. L. Snyder has returned from a trip to California.

Manager Jacobson of the Columbus Con. is in Alta today.

Captain Duncan McVie has returned from a trip to the camps.

Simon Bamberger departed last night for the Bamberger De Lamar mines in Nevada.

Dr. P. A. H. Franklin has gone to the southern part of the state on mining business.

W. B. Andrew has returned from a trip of several weeks' duration on the Pacific coast.

Joseph Dederich departed last night for the properties of the Cactus mine in Beaver county.

Mr. Hamilton has gone to Deep Creek to put a force of men to work on the Dewey property.

The Centennial-Eureka shaft has been completed to the sixteenth level, a depth of 1,500 feet. A station will be cut at this point.

Thomas J. Lynch, the Tonopah bonanza king, will arrive from Chicago this afternoon. M. J. O'Meara, who shares the title with him, will reach here tomorrow.

J. W. Cairns, formerly manager of the Eureka-Ophir mine in Dry canyon, Tooele county, expects to leave for California in a few days.

The ore and bullion settlements reported yesterday were as follows: Crude ore and concentrates, \$50,500; base bullion, \$28,200; gold bars, \$24,000. Total, \$102,700.

Broker L. P. Marx returned yesterday afternoon from a six weeks' trip to

PLEASED WITH BEAVER COUNTY.

A Los Angeles Mining Engineer Sees a Great Future for That Portion of the State.

VISITED THE MAJESTIC MINES.

Harrington & Hickory, He Says, Can Supply Smelter with 100 Tons Of Ore Daily for a Year.

Mr. S. C. Wood, a well known mining and consulting engineer of Los Angeles has returned from making an inspection of the Majestic properties in Beaver county and has taken his departure for home. Like many others who have visited the great copper belt in the south, he sees a great future for that part of the state and in a letter to Manager Alexander, written on the train after leaving Salt Lake for the west, he expressed himself as being enthusiastic over what he had seen within Majestic territory.

After making an inspection of the new smelter near Milford, which has capacity for the treatment of 100 tons of lead and 500 tons of copper ores daily and which is to be "blown in" within the next 10 days, the visitor was conducted to the Harrington-Hickory mines, of which he says:

"These mines are a silver-lead proposition, with considerable gold values, and in all of the various workings I found ample confirmation of the state, mines heretofore made by your officers and managers concerning great quantities of silver and gold. They are proved to my mind to have been clear and conservative. I was much interested in the new developments which have appeared in what you call the dome shaft. This shaft, now over 350 feet down, is already 32 feet in ore, which seems to be a great fat vein, and the bottom is not yet reached. The greater part of this ore consists of lead carbonate, but carrying considerable galena, and good values in silver. I think it safe to say that one-half of this ore body will show 25 per cent of lead, or better, with 20 or 30 ounces of silver, and the balance, of very good but somewhat smaller percentages. In this mine you have clearly defined ore beds and backs that will furnish 100 tons or more per day for at least a year to come, without further developments."

Of the O. K. mine Mr. Wood said: "I found here that a great amount of development work had been done, in a very intelligent and systematic manner, consisting of several thousand feet of drifts, tunnels, crosscuts, etc., with a finely equipped main shaft connecting three levels, and a well equipped incline reaching directly with the 25 to 60, and in one case over 100 feet in width, and of good average grade. Much of the ore is exceptionally good in copper value, and carries both silver and gold. As soon as the shaft is completed, the ore body will show 25 per cent of lead, or better, with 20 or 30 ounces of silver, and the balance, of very good but somewhat smaller percentages. In this mine you have clearly defined ore beds and backs that will furnish 100 tons or more per day for at least a year to come, without further developments."

At the Old Hickory mine Mr. Wood states that he found different conditions prevailing, but the vein matter, as developed, has shown heavy iron carbonates, carrying copper, silver and gold, and good values in silver. The ore bodies are in contact between porphyry and limestone. The surface indications are American. Shuff jumped 7, St. Paul, Ste Marie rose 1 1/2 and "Frisco second preferred 1 1/2. Inactive stocks furnished the only fluctuations during the noon hour. Iowa Central preferred rose 1/2 while Consolidated Gas 1 and St. Joseph and Grand Island 2 1/2.

Philadelphia and Pittsburgh, where he has been on mining business.

David Evans has returned from a trip to the northwest and is again giving his attention to mining affairs. He states that the shaft at the Black Rock mine has reached the depth of 1,170 feet.

The Little Eddis Gold & Copper Mining company, organized in this city with a capitalization of \$50,000, has filed articles of incorporation in the office of the county clerk. The officers are: E. McCurric, president, in this case, A. H. Page, vice president, and J. McCurric, secretary. The company's properties are situated in Bingham.

Managing Director E. O. Lee of the Dexter mine at Tuscarora, Nev., returned from that property yesterday. He states that the mill equipped with the Moore mines process will go into commission early next month.

Manager Snow of the May Day Mining company, announces that stoping was commenced today on the 300 level of that mine.

The Carls ore channel has again been opened in the Victor, this time on the 500 foot level, 600 feet south of the big raise that was made to the surface during the controversy with the Boss Trust. A drift which was being extended to connect with a winze from the 400 smashed into the channel, which reveals a full breast of 10 per cent copper containing 12 ounces of silver. This winze, which set 120 feet away, was sunk from the 400 in ore, which assures the management of a fine stoping area.—Tintic Miner.

Wednesday's shift at the May Day made connection with the ore body on the 300 level, and the ore is now passing directly to the shaft, with large stoping areas extending to the 200 level above and about the same distance south on an incline. There is considerable ore of a shipping grade exposed in this stoping, but the most of it will be run through the jig. The men have received their June pay, and the July money will be out, it is expected, tonight or tomorrow.—Tintic Miner.

Rumor had it this week that the King mill was entirely without water, owing to the fact that the fissure which supplies them with water has been cut in the Alliance tunnel. We are informed, however, that while water is very scarce, the mill has kept running right along. The fact is that the water being bulkheaded and contained to keep the water back, but for fear this will not hold it the advisability of putting in a pump to keep the mill supplied has been considered. As soon as the Keith-Kearns mill starts up the demand for water will be much greater.—Park City Miner.

SPECULATORS HOLDING OFF.

Dealings in Stocks Continue to be Light and at Quite Unsteady Prices.

OPENED A LITTLE FIRMER.

This was Because London Sent Higher Quotations for Americans, There Being a General Setback.

New York, Aug. 26.—London sent higher prices for American stocks again this morning and the opening was firm in response, but on a very light volume of business. Missouri Pacific rose 1/2. Union Pacific declined 1/4. The opening movement was not well maintained, offerings of the western stocks causing a general setback. St. Paul and Missouri Pacific reacted a point each, and the active list generally fell a small fraction below yesterday's close. Colorado Fuel exceptionally advanced 3 points and Canadian Pacific, Wabash preferred and National Railroad of Mexico preferred by 1 point. Business became very dull by 11 o'clock, but the undertone of the market was better.

The market gravitated to a lower level from sheer inattention. St. Paul, New York Central, Kansas City southern and Brooklyn Transit got a point under last night's action. American Snuff jumped 7, St. Paul, Ste Marie rose 1 1/2 and "Frisco second preferred 1 1/2. Inactive stocks furnished the only fluctuations during the noon hour. Iowa Central preferred rose 1/2 while Consolidated Gas 1 and St. Joseph and Grand Island 2 1/2.
