d 178

THE MOST SUCCESSFUL REMEDY ever discovered, as it is certain in its effects and does not blister. Also excellent for human flesh. Read proof below.

FROM

COL. L. T. FOSTER,

YOUNGSTOWN, Ohio, May 10th, 1880.

DR. B. J. KENDALL & Co., Gents:—I had a very valuable Hambletonian colt that I prized very highly, he had a large bone spavin on one joint and a small one on the other which made him very lame; I had him under the charge of two veterinary surgeons which failed to cure him. I was one day reading the advertisement of Kendall's Spavin Cure in the *Chicago Express*. I determined at once to try it and got our druggists here to send for it, they ordered three bottles; I took them all and thought I would give it a thorough trial, I used it according to directions and the fourth day the colt ceased to be lame and the bunch have disappeared. I used but one bottle and the colt's limbs are as free from lumps and as smooth as any horse in the state. He is entirely cured. The cure was so remarkable that I let two of my neighbors have the remaining two bottles who are now using it. Very respectfully,

L. T. FOSTER.

Kendall's Spavin Cure

Is sure in its effects, mild in its actions as it does not blister, yet it is penetrating and powerful to reach every deep seated pain or to remove any bony growth or other enlargements, such as spavins, splints, curbs, ringbones, callous, swellings and any lameness and all enlargements of the joints or limbs, or for rheumatism in man or for any purpose for which a liniment is used for man or beast. It is now known to be the best liniment for man ever used, acting mildly and yet certainly in its effects.

Send address for illustrated circular which we think gives positive proof of its virtues. No remedy has ever met with such unqualified success to our knowledge, for beast as well as man.

Price $1. per bottle, or six bottles for $5. All Druggists have it or can get it for you, or it will be sent to any address on receipt of price by the proprietors, DR. B. J. KENDALL & Co., Enosburgh Falls, Vt.

TO BE HAD OF DRUGGISTS

ST. JACOBS OIL

No Preparation on earth equals ST. JACOBS OIL as a SAFE, SURE, SIMPLE and CHEAP External Remedy. A trial entails but the comparatively trifling outlay of 50 CENTS, and every one suffering with pain can have cheap and positive proof of its claims.

EVENING NEWS.

Tuesday, - October 10, 1882.

BRIEF TELEGRAMS.

The Governor of Eastern Siberia was murdered at Ichita.

West Street concert hall, at Brighton, England, burned, loss $45,000.

Hogan, the farmer who was shot in Ireland on Saturday, died yesterday.

In a fire at Stagg Creek, Canada, yesterday, two men named Field were burned to death.

The Sac and Fox Indians, of Iowa, had a conferance with Indian Commissioner Price, in Washington.

At a fire in a hardware factory in Paris the chief of the fire brigade was killed and several persons wounded.

The beer brewers of Chicago yesterday decided to increase the price of beer by the barrel, on account of the hop crop.

In Panama, two light shocks of earthquake have been felt in the last few days, accompanied by heavy rain and thunder storms.

The issue of standard silver dollars from the mints for the week ending October 7th was $689,498, against $595,997 for the corresponding period of last year.

In Manilla in the Phillipine Island there is an average of between 30 and 40 new cases of cholera daily, and in the vicinity of the town, an average of 12.

Overdonk, the man who was arrested in Vienna for throwing bombs, has been brought before a court martial, charged with desertion from the army and of high treason.

Last Sunday the police of New York were unusually vigilant in enforcing the excise law, and as a consequence many saloons usually in full blast on Sunday, were closed. Many arrests for violation of the law were made.

A Washington special says: One of the New York Sunday newspapers declared that Guiteau's skull was stolen from the medical museum before the skeleton had been mounted and that another skull had been put in its place.

The Pennsylvania Colonization Society has appointed a committee to confer with a committee to be appointed by Dr. Tanner, editor of the *Christian Recorder*, upon the subject of the colonization of Africa under the auspices of the society.

How She Nearly Killed the Baby.

A correspondent of the New York *Sun* writes to that paper as follows:

A short leader in the *Sun* of the 6th inst. headed, "How to Save Babies," and containing some important hints to the city fathers concerning the sewage arrangements in certain localities, has suggested to me the idea that our city mothers are responsible for imperfect sewage in another sense. I mean that directly connected with those tiny tabernacles which have been entrusted by Providence to their keeping.

Not that the mysterious labyrinth of minute drain pipes is defective. Nature has seen to it that these are perfectly adapted for their work.

But the delicate clay of which they are molded cannot bear the overwork which ignorant mothers and nurses force upon their babies. Still, nature tries, in spite of all, to keep up the drainage, until the delicate tissues become diseased and finally worn out and the cradle is empty.

Why is it that the human mother was considered complete without that instinct which should guide her unerringly in the management of at least the temporal interests of her infant?

Pussy, who but two years ago was as blind and helpless as the four mewing things by which yesterday our household was increased, apparently understands as thoroughly how to carry each kitten by the back of its neck, and, after depositing one after the other in the most comfortable spot she has been able to select after several weeks' previous searching, cuddles down beside them and administers to their wants as if for years she had been accustomed to the business, or at least had graduated from the school of trained nurses under the direction of some ancient Dr. Tom or Tabby. The pullet marches with as much dignity and self-reliance at the head of her first brood of downy balls as her own stately Brahmin mother did last summer when she headed her seventh procession. There were no consultations necessary, no calling in old Mrs. Hennypenny, Drs. Cockalorum or Quack. The young mother knows how to feed her chicks.

Alas for us poor representatives of the human maternal sisterhood. Notwithstanding we have the benefit of centuries of physiological, medical and scientific discovery, we are, so far as the death rate can prove the fact, as ignorant, and possibly more so, than was Mother Eve when she handled her naughty little Cain.

Just here a short chapter from my own experience may not be inapropos. Last year I fed my baby, as was recommended by my phisician, who is considered one of our best, upon condensed milk and oatmeal gruel.

All went well until July, when she was three months old. At that time teething commenced, and the usual symptoms of summer complaint soon manifested themselves. The stereotyped advice from doctors, sisters, cousins and aunts was: "Keep up with his usual food—that is, the milk, drop the oatmeal, give her medicine, and take her to the country." I was told that when calves were allowed to have all the milk they would become sleek and fat, and that the correct inference must be that the poor little baby, now anything but "sleek and fat," must, to become so, have milk every time she cried, every time she went to sleep, every time she awakened, every time she was thirsty; in short, at all times, day and night. My energies were all bent in one direction—viz.: towards stimulating and coaxing the already unnatural appetite for milk and oatmeal, which I have no doubt was simply caused by thirst. I took her to the country, and during the five weeks we remained there I did not know what it was to have an hour's rest, day or night—crying, moaning, vomiting, and all the rest of it, poor baby, whose fault it was not; poor mamma, whose fault it was. I continued to gorge the child in this way to the extent of an entire can every twenty-four hours. No hardened wretch ever more zealously stuffed the unfortunate goose, destined for pate de foie gras. I brought her home from the country, took her to Coney Island, but sea air could do nothing for the poor innocent, who still, notwithstanding weakness and emaciation, continued to ply the bottle as constantly as ever! Autumn weather came to our rescue, and she did not get to Heaven after all.

The proverbially much-to-be-dreaded second summer, with its array of woes in the shape of back teeth, eye teeth and stomach teeth, was dawning upon us.

Meanwhile mamma had, for the second time, cut her own wisdom teeth, and concluded to experiment in the use of the limited amount of reason with which her Maker had endowed her. I saw that all I had succeeded in doing last year had been to nearly kill the baby, and altered my entire course the very moment the first symptoms of summer complaint appeared, which was in June.

Every morning I boiled three tablespoonfuls of fine oatmeal in a quart of slightly salted water one hour. After straining and thinning it somewhat with cold water, I added a heaping teaspoonful of condensed milk and a tablespoonful of sugar. I placed it in the refrigerator, and gave it only when I knew the child was really hungry. At other times I gave her cold water (not iced) as much and as frequently as she wished it. Once during the night and in the morning before the gruel was ready I gave two teaspoonfuls of milk in a bottle of cold water. This course has been thoroughly successful, and I gave the baby no other food excepting a little bread and butter occasionally. If she is thirsty in the night I fill the bottle with fresh water, put it by her in her crib, and she satisfies her thirst and falls asleep over it. Furthermore, she has not been even in a horse-car this summer, but has become as sleek and fat as any little bovine, and 10,000 times sweeter and better tempered, notwithstanding she is spending her second summer in that city whose atmosphere we have been wont to consider as deadly to infantile human life at this season of the year as the climate of India.

No earthly reason exists for suffering with rheumatism. St. Jacobs Oil has reversed the order of things.

Statement of Facts!

A CARD TO THE UTAH COMMISSIONERS,

AND THE PUBLIC GENERALLY.

Although I do not pretend to Sell Goods at Cost, I am bold to say that no person will Sell Goods any Cheaper during the Fall Season than I will. I intend to lead in Low Prices, in the following lines:—

In **FRAMES** of every kind, Wood, Plush and Velvet.

In **BOOKS** for Holidays, or any other day.

In **STATIONERY,** Staple and Fancy.

In **OIL PAINTINGS, ENGRAVINGS, CHROMOS** and Novelties for home decoration.

In **ALBUMS,** Photographic and Autographic, from 50 cents, of guaranteed style and finish, direct from the Manufacturer.

I claim to have sold the cheapest **DOLLS** ever seen in Utah, and will strive hard to keep up my reputation this season.

In other articles of taste and refinement I do not intend to be behind my competitors, either in variety of styles, or price, and don't you forget it.

C. R. SAVAGE,

ART BAZAR,

SALT LAKE CITY, UTAH.

This standard article is compounded with the greatest care.

Its effects are as wonderful and satisfactory as ever.

It restores gray or faded hair to its youthful color.

It removes all eruptions, itching and dandruff, and the scalp by its use becomes white and clean.

By its tonic properties it restores the capillary glands to their normal vigor, preventing baldness, and making the hair grow thick and strong.

As a dressing nothing has been found so effectual, or desirable.

Dr. A. A. Hayes, State Assayer of Massachusetts, says of it: "I consider it the best preparation for its intended purposes."

BUCKINGHAM'S DYE,

For the Whiskers.

This elegant preparation may be relied on to change the color of the beard from gray or any other undesirable shade, to brown or black, at discretion. It is easily applied, being in one preparation, and quickly and effectually produces a permanent color which will neither rub nor wash off.

THE CASE AGITATOR

Ahead of all Other Competitors!

SALT LAKE CITY, August 12th, 1882.

J. W. Lowell, Esq.,

Dear Sir.—The J. I. Case Agitator we bought of you last season is the best machine we ever saw or used; it will thresh more grain and thresh it better and cleaner than any other machine we have ever seen, and we can confidently recommend it to any persons wishing to purchase a good Thresher.

Yours, etc.,
G. W. LUFKIN,
W. A. BARRON.

ASHLEY'S FORK, UINTAH Co., Feb. 26th, 1882.

John W. Lowell,

Dear Sir.—The Agitato Separator and Woodbury Power that we bought of you, we can truly say give entire satisfaction. It beats anything that we ever saw to thresh and clean. We have run seven different kinds of machines, but this is the champion. The cleaning and the separating are perfect. We have not had a man find fault with it yet, and we believe that the people here will testify to our statement as being the truth. It comes as near being perfect as it is possible for a machine to be. We cannot tell you upon paper all its superior qualities or how much we think of it, but can say this, that could we not get another like it, no money would buy it.

Yours truly,
GEORGE BROWN,
S. J. CAMPBELL,
WM. P. REYNOLDS,
ROBERT BODILY.

CEDAR CITY, Sep. 23rd, 1881.

John W. Lowell,

Dear Sir.—Our machine, Agitator, is doing excellent work. Cleans the best and threshes faster than any Thresher we ever saw.

We remain,
CORRY & HUNTER.

LEHI, Utah County, February 7th, 1882.

To John W. Lowell, Esq.,

Dear Sir.—As our opinions have often been asked about the merits of the Agitator Threshing Machine we purchased from you last fall, we take pleasure in sending you the following as our experience with it. To answer the numerous inquiries, and perhaps others who would like to know, we recommend the following points of superiority over all other machines we are acquainted with—

1st.—Lightness of draft. Our team of five span of average native horses and mules, being fully equal to the work, and without crowding or hurrying them, they gave us all the speed and power we needed.

2nd.—Thorough threshing and cleaning, and that *without extra effort* on our part; such a thing as the sieves being crowded or clogged, or requiring the attendance of one person at the tail end of machine having never occurred or been needed.

3rd.—Lightness of wear. After having threshed 18000 bushels of grain, lucern seed, etc., the general wear on the machine being scarcely perceptible.

4th.—Lightness of running expenses. By comparing notes with our friends of other machines, we find ours have not exceeded half of theirs.

We also consider the capacity for threshing in quantity, superior to other makes of machines. Although the farms here are small, necessitating a great deal of moving, and often to distant points, yet we threshed as high as 800 bushels per day.

We also consider the Straw Stacker, End Shake, Elevator principle and many other points are *all* worthy of notice and examination of any and all persons who may contemplate purchasing a machine.

A. J. EVANS,
M. T. WOODHOUSE,
H. M. ROYAL,
M. B. BUSHMAN.

I have helped wear out four machines of other kinds, and I heartily endorse all of the foregoing points.

A. D. RHODES, Jr.

CEDAR CITY, March 18th, 1882.

Mr. J. W. Lowell.

We bought one of the J. I. Case 32 inch Agitator Threshers last year and consider it by far the best Thresher ever brought to this country. It runs very light, saves all the grain and is a very durable machine. We threshed grain at the rate 2½ bushels per minute.

Yours, etc.,
CORRY & HUNTER.

I also take the liberty to refer thresher men to the following reliable people who have purchased the Agitator Machines:

Messrs. Robbins & Simmons, Kaysville.
