

## FOR PROTECTION OF ORCHARDS

### State Board of Horticulture Issues Rules and Formulas.

### COUNTY INSPECTORS' DUTIES

### Duties of Fruit Growers and Nurserymen Defined Under New Horticultural Law.

In accordance with section 6 of an enactment of the Fifth Legislative Assembly of the State of Utah, entitled, "An act creating a state board of horticulture, providing for county boards of horticulture, defining their duties, providing for the publication and distribution of their reports, and repealing all of title 28 of the Revised Statutes of Utah, and chapter 47 of the session laws of the Legislature of Utah for 1899," approved March 12, 1903, and in force on and after May 12, 1903, a meeting of the state board of horticulture was held in Salt Lake City June 1, 1903, when the rules and regulations given below were adopted and promulgated for the disinfection of orchards, nurseries, etc., and are therefore binding upon all fruit growers, fruit dealers, nurserymen and importers of fruit or ornamental trees, shrubs or vines, and upon every owner, possessor or occupier of any orchard or land where trees are grown within this state.

In submitting the regulations, remedies and formulas adopted by the state board of horticulture, it is the intention of the board to protect the fruit industry of the state from the importation and spread of insects and diseases detrimental to the horticultural interests of the state, the operation of all persons interested is solicited in carrying out the important work required to combat the insect and diseases that menace the fruit industry of the state.

### RULES AND REGULATIONS.

Rule 1—It shall be the duty of every owner, possessor or occupier of an orchard or land where trees, vines or shrubs are grown within this state, to remove from said land and destroy by burning all diseased or decayed branches, rubbish and debris harboring insects or fungus growth; also to remove from the orchard all diseased and fallen fruit at least once each week.

Rule 2—The owner or owners of any nursery or nurseries shall disinfect all their nursery stock of insects or diseases injurious to fruit or trees before the removal of the same from their premises for sale, gift, distribution or transportation.

Rule 3—No trees, shrubs or vines shall be imported into this state by nurserymen, corporations or private individuals unless properly certified as having been fumigated by hydrocyanic gas before shipment. Importations of trees or shrubs unaccompanied by such certificate of fumigation shall be held in quarantine at owner's risk until so fumigated at the cost of the importer to the satisfaction of the county horticultural commission.

Rule 4—No certificate shall be given by any member of state or county boards of horticulture, or by any county inspector or deputy inspector, stating that any nursery stock is free from insects or diseases; provided, that any other named in the rule may give a certificate to the effect that any nursery stock has been subjected to treatment with hydrocyanic gas (formula No. 4) when it shall be proved to the satisfaction of such officer that the said stock has been so treated.

Note—Rules 3 and 4 are promulgated because of the undoubted fact that scale insects may infest nursery stock and easily escape any inspection that is practicable to make. The hydrocyanic gas is both insecticide and fungicide, and although fumigation does not give a guarantee against all insects and fungus diseases.

Formula No. 4—Wholesale Oil Soap for Nursery Stock—For each gallon of water take three-fourths of a pound of oil soap. Keep the solution at a temperature of 90 to 100 degrees. Dip the entire tree in the solution and allow it to remain at least two minutes.

Note—For all forms of aphids this treatment will suffice.

RECOMMENDATIONS.

The board makes the following recommendations:

In the preparation of the Bordeaux mixture care should be taken to use either an earthen or wooden vessel. The mixture will run in a vessel of metal. Satisfactory results in spraying depend upon the careful performance of the work. Carelessness will result in disintegration. A good pump and plenty of hose, extension pipe and line nozzle are essential.

The most experienced and successful spraymen in Utah are unanimous in the opinion that the spraying should be continued through July and at least up to August 25.

Cleanliness is the first step toward disinfection. All diseased trees are sources of great production of worms and fungus. Spraying is one of the best disinfectants.

In order to catch all early insects it is recommended that all fruit trees be sprayed once with a combination of Bordeaux mixture and Paris green before blossoming.

It is especially recommended that all trees be sprayed at least once before buds open with formula No. 5 (lime, sulphur and Paris green) as a precautionary measure against San Jose scale and as an effective remedy for the red spider, wooly aphid and every form of insect that the spray may reach.

An excess of lime in the Paris green solution will prove beneficial rather than otherwise.

The following regarding the use of white arsenic as a substitute for Paris green is taken from a bulletin by Prof. C. P. Close at the Utah Agricultural college and is fully endorsed by this board: White arsenic, one pound, soda (washing soda) four pounds, water two gallons.

Put the white arsenic, salt soda and water in an iron kettle and boil for 15 or 20 minutes when the arsenic should be dissolved. Same water "be" by boiling, so enough more must be added.

DOCTORS ENDORSE HERPICIDE

Because Its Formula Is Submitted to Them.

Alexander McMillan, M. D., a prominent physician of Lansing, Michigan, writes: "On three cases I have tested Herpicide for dandruff and the result has been all that could be desired."

Herpicide is made upon an entirely new principle, that is, that dandruff and falling hair are caused from a microbe that infests the hair bulb, and by destroying the microbe one's hair is bound to grow luxuriantly. Herpicide is the only hair remedy that claims to, and really does destroy the dandruff germ.

Sold by leading druggists. Send 10 stamps for sample to The Herpicide Co., Detroit, Mich. For sale at Z. C. M. I. Drug Dept.

to replace the amount lost. Two quarts of this stock solution with two to four pounds of freshly-slaked lime will be sufficient for 100 gallons of water.

Before spraying or applying any of the remedies here suggested, the board strongly urges the importance of arborists knowing exactly what they are spraying for, and using the proper remedies. Paris green or the other arsenical solutions are to be used in combating sucking insects, such as the caterpillars, commonly called worms, whether hairy or naked; all of the so-called scales, the grasshoppers, beetles, potato beetles, leaf rollers, the codling moths, etc. Kerosene emulsion is effective against sucking insects, which include plant lice, scale flies, aphids, thrips, leaf hoppers, squash bugs, plant feeding insects, etc.

For the pear tree and cherry tree slugs and rose slugs, while hellebore is recommended, the Bordeaux mixture thoroughly drenched over the tree, is also an effective remedy.

For the colony and leaf-feeding caterpillars growing on the foliage, the following warm soap suds will exterminate them.

Upon motion the above rules, regulations, formulas and recommendations were adopted and ordered printed in pamphlet form and published as required by law.

JOSEPH HYRIM PABRY, Secretary.

SOCIAL AND PERSONAL.

Mrs. J. E. Ravilins has issued invitations to a card party to be given next week.

The Author's club will give a lawn party on Monday night at the home of Mrs. Nellie C. Little.

Mrs. Ruby C. Gothe left yesterday with her children for Pacific Grove to spend the summer.

Mrs. H. M. Wells will leave shortly to spend the summer in California.

Mrs. T. G. Webber and Miss Webber will entertain at tea on Friday, June 12.

An event which will be of interest to many Salt Lake residents is the marriage of Miss Ida May Frye of Pocatello, the wedding having taken place at the latter place on June 1. Both are well known in this city, the bride having formerly filled the position of teacher of English literature in the High School here, and the groom being a long time resident. They will make their home in Salt Lake and will be at home to their friends after July 1, at 653 Third street.

Mrs. I. C. Glose has gone to New York and will shortly sail for Europe, to be absent during the summer.

CHLOROFORMED AND ROBBED

Prominent Seattle Woman Loses Nineteen Hundred Dollars.

Seattle, Wash., June 4.—Mrs. Robert Seater, wife of a prominent furniture dealer, was chloroformed and robbed of about \$1,900 in her apartments in the McCombs block, on Pike street, shortly before noon today. Two men entered the room, and Mrs. Seater, thinking they had come to pay a bill, walked to the opposite side of the room to get an account book. While

she was looking for a name one of the men had given, she was seized and a gag was placed in her mouth. Mrs. Seater tried to summon assistance, but was overpowered and a cloth saturated with chloroform placed to her nostrils. In very few seconds she was unconscious, in which condition she was found by her husband about an hour later.

Mrs. Seater says that the robbers were strangers to her and that when they entered the room she did not suspect them. They seemed to be aware that a large sum of money was in the house, and probably were advised that the money was kept on Mrs. Seater's person. After being revived by her husband it was discovered that the robbers had torn open the front of her dress and removed the money from a small cloth, in which she had kept it sewed up. Several buttons were lying about the floor, which showed that she had struggled with her assailants before the drug had taken effect.

NEW MILITIA LAW.

Judge Advocate General Davis Construes It.

Washington, June 5.—Judge Advocate General Davis has sent to the secretary of war an opinion relative to various disputed matters of construction of the new militia law. The opinion relates to whether section 14 of the militia act, relating to expenditure of money for the militia, was not in conflict with the federal constitution, the contention being that a large sum of money was in the house, and probably were advised that the money was kept on Mrs. Seater's person. After being revived by her husband it was discovered that the robbers had torn open the front of her dress and removed the money from a small cloth, in which she had kept it sewed up. Several buttons were lying about the floor, which showed that she had struggled with her assailants before the drug had taken effect.

Gen. Davis points out that the new militia law does not differ materially from the present law, and that all that will be necessary is a change in the forms for accounting to be made to the treasury department. A more important point raised concerns section 15, which provides for the payment of the militia in several states in maneuvers and field instructions of the regular army, but with a further proviso that the command of military post or camp, and of the officers and troops of the United States stationed where such maneuvers occur, shall remain with the regular command of the post without regard to the rank of the commanding or other officers of the militia temporarily encamped there.
