FOUR O'CLOCK MAT TED AND BUBLISHED BY THE DESERET NEWS COMPANY. CHARLES W. PENROSE, EDITOR. Sept. 14, 1880

EVENING NEWS.

CINCISHED DAILY, SUNDAYS EXCEPTED, AT

THE R. LEWIS CO.

EDITORIAL NOTES.

Registration is in progress in lively style. Don't forget that this week gives the last chance for the unregistered. The Assessor will attend in person or by deputy every day this week at the County Court House.

The census returns of the population of the United States will be compiled and ready in the course of a few weeks. But it is calculated that it will take four years to arrange all the statistics embodied in the reports and prepare them for publication.

Modern Greece embraces an area of 19,941 square miles, and has a population of 1,679,776 souls. Ath ens, the capital, has about 46,000 inhabitants. Of 16,000,000 acres of arable land in the kingdom, but 6,-000,000 are under cultivation. The nominal strength of the army was reported in the budget estimates for the year 1879 at 14,061, but this does not include militia.

A movement is on foot among German professors to abolish the use in this country of the German alpha bet, substituting the Roman letters in common use. - This would greatly facilitate the learning of the German language in other nationalities and if successfully inaugurated would be likely to pave the way for the adoption of one alphabet by all the civilized world, "a consummation devoutly to be wished."

The Denver Tribune remarks "Utals is considerably exercised over the fact that no Mormons were placed upon the committee which re ceived President Hayes." Quite a mistake. Utah is not exercised over the matter at all, and the "Mormons" are perfectly satisfied with the Presidential visit and its results.

Edison's name, but a short time ago so closely associated with this subject, is now the signal for incred-1,000 and a majority of 500. The re-publicans claim the First District by 125, and the democrats concede it by subject, is now the signal for incred-95. being overcome, is to get an engine business. The workingmen have renomisuited for the purpose. Such ennated Kalloch for mayor. gines, are being built, and when The Oregon legislature has effected completed, Mr. Wilber says, "will an organization by chosing Solomon Hirsch, president of the senate, and be the last link necessary to complete in detail the Edison theory."

This report we give for what it is worth. Edison's announcements have come to be like the fabled cry of "Wolf! Wolf!" and still like the finale in the fable, the "wolf" or the perfected light may come in very deed when not expected.

We have confidence that time and thought and perseverance, which the work such great wonders, will some Sarah D. Curtis and her counselors day develop in their might and beauty the hidden forces and latent effulgence of the electric element and science will handle them as fa- 10 a.m., when recitations, songs, esmilar things for the benefit and pro- says, etc., occupied the time till about gress of the children of men. But the hour and the day have not yet come. all present.

THE TIDINGS FROM MAINE. THE tidings from Maine will sound discordant on the Republican ear, ciety, and Elders Robert Davis and THE tidings from Maine will sound and will be surprising to all parties. l'hat Maine, Blaine's State, and the land of Frye, should go over to the 'enemy" is something quite unexnected. It is a Democratic victory, although partly by indirection. One if not two Congressmen elected are Democrats, and the Governor is the Fusionist candidate, elected by a combination of Democrats and Greenbackers. It is a victory also for the Democrats in that it is a sad defeat for the Republicans, and just at this juncture is ominous. It will doubtless have an effect upon the Indiana election, and should that State go Democratic the influence progress of their children. The use will be very favorable for Hancock of tobacco in its debasing effects and English in November. The upon both body and mind were

On the stand were Bishop Charles D. Evans and wife, President Sarah

D. Curtis and her counselors Laura L. Jones and Jarmelia Taylor, Eliza James J. Davis. Short and pithy speeches were made by a number of he foregoing which included the following topics: The strict observ-ance of the Babbath day, the necesity of cultivation, by the society, f pleasing address and refinement n manners. The importance of early attention to prayer as pointing the soul upwards, and establishing a devotional spirit in youth that the ares of riper years may not obliterate. The habit of profanity indulged n by some, was severely censured and its downward tendencies clearly pointed out. Punctual attendance by he members was strongly urged, and parents were instructed that their hearty and prompt co-operation was a necessity to the moral and religious

Utah affairs never are understood outside, and of all the country the press manifests the profoundest igngrance concerning them. The "Mormons" did all the "receiving" on that occasion that they could ask for. Try again, Trib.

THE NEW ILLUMINATOR.

THE electric light exhibition in this city has naturally led to the discussion of the merits and demerits of this new illuminator; new to the century, if not to the immediate present. Experiments with elecfor the Democracy. tricity as a lighting medium have

been made for many years, with varying success, and the outcome to-day is the demonstration that it can be utilized for large spaces, but

many: In the first place, although it ap-American Ferk, 1.300 Brigham City, 1.857 Bingham, - 1.055 Beaver. - 1,470 pears to be cheaper than gas, yet

when all the expenses are taken into account, including the wear and tear and contingencies happening to machinery, it has been in practice found not to be comparatively economical. In the second place the flickering noticeable here has been a feature of its exhibition at other places and at different periods and this has been rightly considered a serious defect. In the third place accident to the engine furnishing the necessary motive power means sudden darkness. In the fourth place, the shadow cast by obstructions is as proportionately dense as the illumination is brilliant, and thus trees and tall buildings make an umbra deep and disagreeable by contrast. In the fifth place the distribution of the light into lamps, as in the case of gas, to avoid the shadow objection by exposing the light nearer to the ground, has

not yet been effected. Sixth, the sparks and sputtering observable ner denies that he shall vote for here have not yet been fully overcome anywhere.

It may be thought that in giving place to these objections we are oppossid to the project of lighting by reported elected. Happily Frye has electricity. But this is not so.
