

MINING, BUSINESS AND STOCKS

TINTIC MINES TO
PAY DIVIDENDS.

South Swansea Has a Surplus
And the Belief is Expressed it
Will Pay Again in July.

MAMMOTH ALSO IN THE LIST.

Next Month Promises to be a Record
Breaker—Nine Mines Can be Counted
on for \$866,000.

The South Swansea Mining company is making good profit out of the shipment of its iron ores to the valley smelters and it is said the treasury of the company contains a very neat surplus at the present time and, with the earnings of the remainder of the month to be added, it will be brought up to the point where another dividend will be among the possibilities for the month of July.

The officers of another Tintic mine—the Mammoth, have also announced that this old time producer will again appear in the dividend list next month. This move was decided at a meeting of the directors held yesterday afternoon, when President McIntyre made the most pleasing announcement that the Mammoth was not only in a much better physical condition than it had been for some time, but that the finances of the corporation were in a much better shape as well. The corporation's indebtedness has not only been wiped out, but the treasury contains a surplus which would justify the payment of a dividend. Some of the directors were willing that one should be paid forthwith, but after mature deliberation it was decided to wait until next month to make the payment.

The month of July will truly be a record breaker in the way of dividends, and it is already forecasted that approximately \$866,000 will be paid out as broad money from the mines of Utah. Among those likely to be heard from, and their respective amounts, are: Utah Consolidated, \$400,000; United States, \$200,000; Silver King, \$100,000; Daly-West, \$72,000; Grand Central, \$25,000; Annie Laurie, \$12,500; Century, \$3,000; Salvator, \$2,500; Utah, \$1,000. These nine mines will bring the aggregate up to \$866,000.

WEEK'S STOCK SALES.

Several of the Active Tonopah Stocks
Furnished a Feature.

The week recorded sales of mining stocks on the local exchange to the extent of 99,972 shares, for which was paid \$2,301,415.

Probably the main feature of the week's events was the listing of several more of the most active Tonopah stocks. While they have recorded no great sales, there has been a lively interest taken in them. Undoubtedly the Nevadaans will become popular with the talent and cut an important figure in the future transactions of the exchange. Mammoth is decidedly stronger than it was a week ago. The announcement that a dividend would be forthcoming again next month had the effect of causing considerable inquiry and the consequent lifting in the price of the stock. Montana-Tonopah shows a marked improvement. A week ago the stock sold under \$2 a share; today it went at \$2.13. Sacramento is slightly firmer, while Tintic sold with an inclination to become weaker. Tintic left off at about where it started in. Century ended the week several points lower. May day was offered at sacrifice prices. The stock has come down to practically nothing. Martha Washington was dumped into the pit in large quantities and taken up at a fraction of a cent. Yankee Consolidated passed the week at a stationary point.
