

TINTIC ORE SHIPMENTS.

A Total of 134 Carloads Sent to Smelter This Week.

The ore shipments from the Tintic mining district this week reached a total of 134 car loads, the Centenniai Eureka and Gemini taking the lead. The contributing mines and respective amounts were:

11.20

"Leaving in the treasury: 280.473 shares preferred stock. 399,525 shares common stock. "There hav been expended since Jan-uary 1, 1906, in the purchase of interests David Taylor of the Taylor & Brun-ton Sampling company, has returned from a vacation spent very pleasantly in Colorado and eastern Utah. He has been up in the mountains where hunting for big game is good.

State Coal Mine Inspector Gomer Thomas expects to leave tomorrow for Denver, he being a delegate to the American Mining congress. Mr. Thom-as will prepare to advocate some im-portant changes in the existing United States coal land laws.

road into the Builfrog district and has announced a round trip rate of \$25.

The Ohlo-Kentucky Mining company, under the able management of James Earles, is installing a new Falrbanks, Morse & Co. 25-horsepower gasoline hoise on its property in Pioche. Mr. Earls states that the new equipment will be installed and ready for business in a very few days .- Pioche Record.

Joe Barboglio and W. M. Nichols of Utah have purchased, respectively, the old Neshitt warehouse on the corner of Main and Lacour streets and the Stein saloon building and cellar on Main street. The price paid was \$1,000 cash for the Neshitt building. These gen-tlemen, are business men and expect to improve and build. The investments improve and build. The investments are among the best made here for a number of years and the deal was made by the Pioche Realty & Brokerage company-Pioche Record.

Mr. Morrison is inclined to believe that the statements made about the

recent disclosures made in the Cac-tus have not been overestimated and has expressed the opinion that it will has expressed the opinion that is the turn out as important a figure in the mining world as any of the mines of Bingham. He says the new ore body in the Cactus carries very satisfactory values in gold and silver.

THE MARKET CONDITIONS.

Stocks This Week.

Market conditions are discussed in-terestingly today by William H. Tib-bals, the well known broker, who closes with a word of warning to those investors, who are apt to allow their enthusiasm to override their best judgment

The course of the stock market The course of the stock matter, "has confirmed the optimistic predic-iion made on several occasions dur-ing the past few weeks. The market has been strong and all offerings of copper stocks have been quickly tak-

"The demand being keen, prices have rapidly advanced in many cases from 50 per cent to 200 per cent. There seems to be no indication of a let up in the demand for these securi-

ties. "The demand for copper is so great that those, who are best informed, express a very positive opinion that the price of this metal will be main-tained during the coming year. "With such prices for metal all the copper producers of Utah are making enormous profits. The great demand for conner and copper stocks is stimu-

enormous profits. The great demand for copper and copper stocks is stimu-lating the development of the mines and every week there are reports of important discoveries. "The purchase by the government this week of 600,000 ounces of silver at \$69.11 cents per ounce gives en-couragement to the owners of silver mines. The good prices paid for lead mines. The good prices paid for lead and silver as well as the high price for copper have a stimulating effect on the development and production of the mines of Park City, Tintle and Beaver

county. "A word of caution is needed. It is not safe to sell short many of the stocks listed on our board. Investors should also remember the lessons of 1901 and should buy only what they can pay for. The disastrous results of buying heavily on margin in that memorable year are fresh in the minds of many. Verbum sat saplenti.

WEEK ON EXCHANGE.

Almost a Quarter Million Dollars Worth of Stocks Sold.

Aimost a quarter of a million dollars worth of stocks were sold on the floor of the Salt Lake Stock & Mining exchange this week, and this total does not rep-resent the heavy trading done in New-house, which is not one of the listed stocks. Trading has been brisk right from the beginning and several of the stocks called have made sensational advances. Carisa has been one of them, the stock selling above 70 cents, giving many of the local holders to take down some profit. Daly Judge has remained firm, the highest price paid for it be-ing \$11.25 and the lowest \$11. Columbus nsolidated weakened, but afterwards

May Day is livening up again: so is Emeraid, Colorado and Victor Con., and it begins to look as if Tintle stocks are

scheduled for a big move forward. Scottish Chief has been in popular de-mand and has made progress on the friength of recent developments in that property, which is situated at the head of Big Cottonwood canyon.

"The managing director, Mr. Holden, reports that more ore is being devel-oped in the United States mines at Bingham, in the Centennial-Eureka mine at Tintic and in the Mammoth mine at Tintic and in the Mammoth mine in California, than is being ex-tracted. The Richmond-Eureka mine has begun production, but several months must elapse before any sub-stantial amount of ore can be shipped therefrom. Development is progress-ing satisfactorily both at this mine and at the Real del Monte mines in Mexico, but the mills at the latter mines will probably not be ready for operation bedon, 2@212.

CON	CENTRA	TES.

L. A. Jeffs is in Alta today looking after mining interests.

William Hatfield, manager of the Albion mine at Alta, was in the city from Provo yesterday afternoon.

Herman W. Horne has returned from a trip to Ramsey and other west, ern and southern Nevada camps. Anthony Godbe has gone to the prop-

erty of the Utah Antimony company in Garfield county on an inspection trip. The Kepau Mining and Milling com. pany of Provo filed a copy of its ar-ticles of incorporation with the secre-tary of state today.

Capt, Duncan MacVichie, managing director of the Bingham Consolidated Mining ad Smeltig compay, is in Bingham today.

Frank B. Cook has gone to British Columbia and will look over some of the big copper mines of the Boundary district before returning.

William M. Wantland, manager of the Consolidated Flagstaff mine at Alta, re-turned from camp this morning and ex-pects to depart for Ely, Nevada, tonight.

E. E. Abercromble, the Boston mining man, is at the Knutsford on a reg-ular trip. He is interested in the Majestic and the New England Gold & Copper mines.

The ore and builion settlements re-ported late yesterdaw by McCornick & Co., were: Crude ore and concen-trates, \$100,500; base builton, \$54,600; gold builton, \$9,200.

Sugar

at the Real del Monte mines in Mexico, but the mills at the latter mines will probably not be ready for operation be-fore next summer. The lead smeller in Utah has been doubled in size and should be ready for full operation be-fore the 1st of January, 1907. Needed additions are being made to the converting plant at the copper smeller in Utah, which, how-ever, will not be completed before next summer. Additions are also be-ing made at the Mammoth smelter at Kennett, but these will not be completed before next summer. The lead refinery near Chicago should begin operations in the near future, and the additions to the copper refinerv in New Jersey are well along toward completion. The improrvements in your mines and the increases of custom ores in the market will probably require in the future fur-ther additions."

FROM THE CACTUS.

L. N. Morrison, manager of the Lel-

****** ANOTHER MILL FOR BINGHAM.

Bingham is to have another mill. At the offices of the Utali Apex and Utah Development companies today it was announc-ed that the breaking of ground vanoonanananananananana. ed that the breaking of ground had actually commenced, and that the contract for equipment would be let today. The plant will be erected on the site of the old Red Wing mill, which was destroyed by fire sec. which was destroyed by fire sev-eral years ago, near the mouth of Markham gulch. The initial capacity of the plant will be 200 tons of ore per day, and will be equipted with such devices as 200 1 be as are best applicable to the concen-tration of the ore from the above named mines. The excavations for the new

building were begun yesterday, under the direction of A. L. Pearce, consulting engineer.
