This machine is the harvest gathering of twenty years experience in the manufacture of Agricultural Machinery, and takes rank with the Printing Press, Engine Lathe and Locometive in the qualities of precision staunchness and durability.

Its foundation is a single piece of solid iron, of shape to resist all possible strains.

Its gearing is shaped to standard gauge and each cut out of solid iron with mathematical executees.

matical exactness.

The working parts are permanently fixed and fully protected from water, dust, grass, and all other external causes of disturbance. By these means we reduce friction to the lowest point—stop the self-destruction common to all rough east machines—avoid breakages in harvest—secure easy draft and the same durability which pertains to cut gear in other kinds of machinery. The World has been tested four years in the hands of the most intelligent and reliable farmers in the land, who units in deciaring that, comparatively,

comparatively, "THERE IS NO OTHER HARVESTER."
