WANT WATER FOR POWER PROJECTS.

Music Teacher Has Scheme to Divert Water from Green River For Electric Plant.

WASATCH MAKES APPLICATION

Lorenzo Lyman of Vernal Wants to Conserve Water for Irrigation Purposes.

Now that the Utah lands have been open long enough for men to enter and locate points of diversion for water channels, things are beginning to reach the office of State Engineer Caleb W. Tanner in large numbers. Water is wanted for irrigation schemes, for power plants, and making electric energy.

A claim that reached the office yesterday afternoon is from J. A. Anderson, a music teacher, who wants 400 second feet from the Green river and the junction of the North and West Forks of the Duchesne is named as the point of diversion. The application states that the water is to be used to make electric energy for distribution in Salt Lake and Utah counties. The water is to be taken out through a canal 500 feet in length, and then sent over six 40-inch Elton wheels, producing a horsepower of 20,000. The power plant is to be located near the center of the south line of section 30, township 1 south, range 7 west, Utah meridian and 100 feet.

Another extensive filing on water was that of the Wasatch Development company, which asks for five different allotments.

The first is for 20 second feet between April 1 and Oct. 15, to be taken through a canal five miles long, diverted at a point 15 chains south 40 degrees west from northeast corner of section 1, township 3 south, range 5 west. The water is for irrigating purposes, and will be distributed through lateral canals. The second application of this company is to divert 10 second feet for irrigation purposes, through a main canal six miles long, point of diversion by north bend of the Duchesne river. A third application is to take 200 second feet for power purposes to make electric energy and power for cities to grow along the Duchesne. The channel of diversion is to be 24,000 feet long, and the water will develop 2,500 horsepower. The two final applications are for 80 second feet, and 25 second feet to be diverted from the Duchesne for irrigating purposes.

OTHER WATER SCHEMES. In addition to these six applications three more came in yesterday afternoon, swelling the total for the day to nine filings. Lorenzo B. Lyman of Vernal asks for 70 second feet to be diverted out of Rock creek, a fork of the Duchesne. His is an irrigating company scheme, the farmers who care to settle under the canal to be charged a reasonable fee for the water. It is to be taken out where the Utah special base meridian passes Rock creek. The second of Rock creek water is 11.5 second feet from the Green river to irrigate lands in Wasatch county. His canal he proposes to make 18,169 feet long, and during the winter months use only 40 second feet. This is to be used for culinary purposes. He is to take his water from Lake canyon, the dividing water to consist of dams with automatic head gates.

Frederick T. Burrall of 203 south State street is also after water, his desire being to get possession of the desert amount of three-eighths of one second foot that rises in a Lake canyon spring and at present disappears into the ground. He wishes to build a reservoir to collect the water for distribution.

A warning to Mothers. Too much care cannot be used with small children during the hot weather of the summer months to guard against bowel troubles. As a rule it is only necessary to give the child a dose of castor oil to correct any disorder of the bowels. Do not use any of the so-called "candy" castor oil, and see that it is fresh, as rancid oil nauseates and has a tendency to grip. If it is fresh, the bowels give Chamberlain's Colic, Cholera and Diarrhoea Remedy and then a dose of castor oil, and the discomfort will be checked in the infidelity and all danger avoided. The castor oil and this remedy can be procured in any drug store kept ready for instant use as soon as the first indication of any bowel trouble appears. This is the most sure and certain remedy known and may be relied upon with implicit confidence in the case of cholera infantum. For sale by all druggists.

POWER OF TOWN BOARDS.

Attorney General Says They Should Protect Streams From Pollutants.

The attorney general gives the following opinion in reply to a query from Secretary Beatty of the state board of health, relative to the jurisdiction of town boards in the use of water for domestic purposes: "Under the provisions of subdivision 13, section 302, Revised Statutes of 1929, as amended by chapter 92, Session Laws of 1933, the town board is vested with power and jurisdiction over the stream for the purpose of protecting the water which is used for culinary and domestic purposes for 10 miles above the point from which it is taken from the natural stream. "If, as stated in your communication, certain parties have been and are polluting the waters of Bear river which are used by the inhabitants of Bear River city, in defiance of the health and wishes of said inhabitants, the health officer or any other citizen of the town is authorized to make complaint before the town justice and have such parties

brought before him to be dealt with according to law. "The health and happiness of the citizen is paramount, and all legal means to preserve and enhance this condition should be vigorously exercised."
