The child labor evil is fast reaching a degree of importance when national legislation, or at least national recog-nition, will become imperative. Laws designed to regulate or restrict the evil have been passed by almost every state legislature, but the indifference or ignorance of officials supposed to enforce the laws renders such legisla-tion prantfeally innearative. The enforce the laws renders such legisla-tion practically inoperative. The trouble has come from a lack of pub-lic interest. The people as a mass have not understood or appreciated the real danger to the nation and to the individual bound to result from the working of mere children for gain. The subject has more in it than sentiment; it almost reaches the dig-nity of a grave national peril. A ghr] sat weeping her heart away in a well known kitchen, a few days ago. Upon investigation, and much concern and sympathy, on the part of the household, the cause was learned. The girl's mother had just died. She lived up north, and had not sufficient means to reach that beloved spot she called her home. The household turned to and raised the amount of reflexad called her home. The household turned to and raised the amount of railroad fare; one of the young ladies brought forth her handsome sult case; among the numerous wardrobes sufficient black clothes were collected, that the poor girl might appear in suitable mourning and proper respect for the beloved dead. made in the house; and the family had planned a handsome Christmas for her in the way of gifts, etc., etc. Every-body's first Christmas thought was for this exceptional maid. But lo and behold! Two days before Christmas, she announced she was leaving: no, nothing could induce her to remain, yes, the family had been most kind, and she had no complaints to make: would she not stay till another maid could be secured? (Heaven only knew where one could be secured). No, she could not stay longer, as she must not break her word with the lady she had promised to go to next day. Then, a happy thought struck her. Christmas gifts. She had not thought of them. Yes she would remain till the day after Christmas, which she did. Shame that she could not have been turned out of that house without more ado. billy as to meals and the kitchen. She had, at one time, kept 15 boarders, done all the work herself, and therefore knew how to economize on time, work, and provisions. All well and good. The dinner came to an end. As she washed up the dishes, scalding every one so carefully, she told how her husband was a railroad man. The lady's eyes widened. How he made cer-tain runs every day. How sometimes his run went as far as Portland, and then at such times, she would like to ret such times, she would like to re-nain over night in the lady's house, or nith he returned, which would be sev-ral nights. The lady's eyes stretched still wider. "You'd never think my husband was ill, he is so big and robust to look at." "He brought his chum out here with him, and he came as far as this place with me, and tried to keep me from coming in."

"Who; your husband?" "No; his chum." "What had he to do with it?" "He knows that my husband does not approve of my working like this, and he naturally tries to use his in-fluence against such a step.
