

LOCAL AND OTHER MATTERS.

THEATRE.—There was a pretty good house last night to witness the play of "Victorine, or I'll sleep in it" and "The Duchman's Ghost." The performance went tolerably lively. The efforts of Messrs. McKenzies, Margrets and Graham, and Misses Adams and Platt were commendable. Mr. W. T. Harris, as Hans Barth, created much amusement, being the life of the last piece.

FATAL ACCIDENT.—An inquest was held yesterday on the body of a gentleman named Martin Winch, who, on the evening previous, had fallen down a flight of stairs in the Omaha House where he was a guest. He died from the effects of the fall in a few hours after the occurrence. The Coroner's jury returned a verdict in accordance with these facts. Mr. Winch was lately from Massachusetts.

DISTRICT COURT.—The case of Englebrecht & Co., against Jeter Clinton and others is still proceeding.

ACADEMY.—In company with Presidents B. Young, Geo. A. Smith, Professor A. Carrington and Elders B. Young, Jr., and John W. Young, we lately visited the Academy kept by Miss Mary E. Cook, assisted by her sister Miss Ida I. Cook, in the lower story of the Social Hall. We remained while the classes were exercised in reading and in geography, and were much gratified at the manner in which the lessons were conducted. The reading especially was excellent, and Miss Cook's method of training cannot fail to develop the qualities of her pupils as readers and elocutionists; particular pains being taken to impress upon them the necessity of entering into the spirit of what they read, and of expressing it naturally and in tones adapted to convey the full force of the sentiment to the listener. We judge that as teachers these ladies will be very successful. They come here highly recommended. Miss Mary E. Cook has had several years' experience as a teacher in a first-class Academy at St. Louis. We understand that she declined an advantageous offer of salary to come here. Her sister, Miss Ida I. Cook, after receiving a training in an Academy and a Grammar School at St. Louis, graduated at Oswego (New York) Normal College, having enjoyed every advantage which one of the best training colleges in the country affords, to prepare her for the profession of her choice—teaching. From the satisfaction which we have heard has been expressed by parents at the progress of the pupils placed in their Academy we conclude that it will not be long until their classes will contain all the scholars which they can conveniently teach.

PROFESSOR BOSCO.—We witnessed some of the amazing feats of this celebrated illusionist yesterday. His skill is most marvellous. It is no wonder that he gained such great celebrity, in his profession, in England and on the Continent of Europe. Parents who wish to provide their children with a couple of hours harmless amusement cannot do better than send them to the Museum, that they may "get ten cents worth of fun." The tricks of the Professor are comical as well as clever, and keep the audience on the edge of their seats in perpetual laughter. Good humor is excellent medicine for children and they should have suitable recreation that they may "laugh and grow fat." We understand that the Professor's engagement terminates on Saturday, so now is the time to see his wonderful performances.

WIRE FENCE.—The following will doubtless prove valuable to many of our subscribers:

Editor Evening News.—I beg to thank you for the following process of making wire fence, taken from an Eastern paper:

"Red cedar posts were set 8 feet apart. Holes were bored through the posts 8, 8, and 12 inches apart. The lower wire one foot from the ground, the next two feet six inches apart, another eight inches above and one twelve inches above that. The ends of the posts were large and firmly set. One end of each wire was put through one hole in the post at one end, wound around the post once and twisted to fasten it. Then the wire was passed through each post to the other end, and where it was wound twice or three around a horizontal capstan, consisting of a round block of hard wood three inches in diameter, through one of which was inserted a short lever with which to turn it. This capstan was laid against the side of the end post under the wire which is wound two or three times about it to get purchase.

One man takes hold of the wire and another of the lever at the capstan, and the entire line is then tightened till perfectly taut. Pine or Cedar half inch plugs, soaked in oil, were then driven into the holes beside and above the wire on each side of each post, thus dividing the strain among the posts, and protecting the wires from water. After these plugs were driven, the wire was wound about the capstan and wound about and fastened to the end post. The wires were then painted and were warranted to last 20 years without repair. No. 9 wire was used.

Respectfully,
A. MILTON MUSSER.

THE SWISS AND ITALIAN MISSION.—We are in receipt of a letter dated Neuchâtel, Switzerland, Sept. 30th, from Elder Chas. W. West, who is on mission in that country. He states that the gospel is spreading in that region, and frequent additions are being made to the church. He and Elder Schofield were, at date of writing, traveling in company. Brother West is blessed with a strong faith and a deep sense of his mission. He has made sufficient progress in acquiring the German language, to be able to address the people in public meetings.

IN A STRAIT.—The Editor of the Ely Record is in a very bad way. He is exceedingly indignant because he has heard that Mr. Parkinson, who was lately engaged in surveying the boundary line between Utah and Nevada, had an interview with President Young, who offered him (Mr. Parkinson) every assistance in his power and gave him valuable information. The Record man is evidently on the lookout for something to say about the "Mormons." He says that he blushes to think Mr. Parkinson should apply to a Mormon source for information. We would advise him to keep his blushes until he becomes conscious of his own folly and ignorance and then blush for himself.

NEW ADVERTISEMENTS.

Life Assurance Society,
Of the UNITED STATES.

ASSETS, - - - \$12,000,000.00.

The Leading Insurance Company of the World.

IN 1860 the EQUITABLE was the 9th Company in new business for the year; in 1861, it was the 8th; in 1862 and 1863, the 7th; in 1864 and 1865, the 6th; in 1866, the 4th; in 1867, the 3d; in 1868, the 2d, and

IN 1869 IT WAS THE FIRST.

The volume of new business for the past year exceeded that of the 3d Company (Central Life, of New York), by over Thirteen Million Dollars, and was greater in amount than that of any other Company in the world.

Sum Assured, New Business, 1869:
\$51,021,141.00.

The distinctive features of the EQUITABLE and its successful management of doing business, which have rendered it the choice of all thinking business men, will be fully explained to any who contemplate investing their money by endorsement, for the benefit of themselves or in Life Policies for the assured independence of their families, by

CHARLES S. HAMNER, Agent,
SALT LAKE CITY.

THE FOLLOWING STATEMENT made by the FIRST PURCHASERS of FOLSOM'S SEWING MACHINES on the Pacific Coast, including all those who have purchased since, is a conclusive evidence of the great superiority and unrivaled excellence of the FOLSOM'S Sewing Machine, and is a most valuable and reliable recommendation, given in favor of any Sewing Machine.

Statement made May, 1870:

"Our Machines are as well known, and as good for use in every respect, as they were when purchased, and we have never had any of them give us ANYTHING FOR REPAIRS. We recommend the FOLSOM'S as being without exception the very best, most reliable and least complicated Sewing Machine now in use."

SINGER'S
New Improved Silent
FAMILY SEWING MACHINES
The Best in the World.

Because all of them are in constant use, while a very large proportion of other makes are not used, owing to their being partially or utterly impracticable.

THE SINGER
NEW FAMILY MACHINE
Has been brought to perfection, regardless of time, labor or expense, and is now incomparably the best Sewing Machine in existence.

It is simple, compact, durable, beautiful, quiet, light-running and capable of performing a range and variety of work never before attempted upon a single machine; using either Silk, Twist, Linen or Cotton Thread, and sewing with equal facility the very finest and coarsest materials, or anything between the two extremes, in the most beautiful and substantial manner.

The New Improved Attachments for Hemming, (any width) Braiding, Embroidering, Magic Ruffling, Gathering and sewing on (at the same time) Self-Sewing, Cording, Tucking, Quilting, Felling, Trimming, Binding, etc., are novel and practical, and have been invented and adjusted especially for this Machine.

Folding Tops and Cabinet Cases.
New design of the unique, useful and popular Folding-Tops and Cabinet Cases, peculiar to the Singer Machine, are in every variety of Wood, such as black Walnut, Mahogany, Rosewood, Saitwood, and from the plainest to the most elaborate pattern and finish. The Machines themselves are plain or highly ornamented with pearl and gold to correspond with their tables or cabinets.

In the Singer the work is fed or passed through the Machine in the natural direction, namely, from the operator, permitting her to sit in a healthy and healthy position. In many other Machines the work passes from right to left, or the reverse, compelling the operator to sit in a cramped and unhealthy position, and thus causing weakness of the back, etc.

The Singer uses a **SHORT STRAIGHT NEEDLE**, which is not liable to break or miss the stitch. Many other Machines use a long curved needle, which is liable to break and to miss the stitch.

In the Singer Machine the Shuttle is carried, thus avoiding nearly all wear. It requires no oil, and does not soil the thread or goods. Other Machines drive the Shuttle, in a way causing great wear, and requiring oil, soiling the thread and goods.

On the Singer, the Tension on both the upper and lower threads is absolutely under the ready control of the operator, thus rendering the Machine always available for good sewing, which is not the case with any other. Many so-called Sewing Machines are really workable and severe many of their new peculiarities and supposed advantages.

THE SINGER is the
Oldest Practical Sewing Machine.

Being about twenty years in the market, having been constantly improved by the employment of the most skilled ingenuity of the age and unlimited capital, it is now diversified with all the latest inventions and improvements, and is the only Machine sold on Honest Claims, as all its parts are Practical and will do all that is claimed for them. Some other Machines are Greatly Complicated, to do Useless and Silly things, and thus are rendered liable to Constant Derangement. The Singer Machine is Never gives trouble, but is readily and easily managed by those who utterly fail in other Machines.

WILL ARRIVE IN A FEW DAYS.

They will consist of the Different Varieties made by the Singer Manufacturing Company, and we shall sell at Eastern Prices, with addition of Freight only. To accommodate parties who cannot pay all down, we will sell on

EASY MONTHLY INSTALLMENTS

So that all may possess one of these Blessings.

For the convenience of our Patrons we have engaged the services of a gentleman who has had twenty years experience and is one of the most skillful experts in the world in repairing and adjusting Sewing Machines. He will put each Machine in complete and practical running order before it leaves the Institution and will also impart to purchasers all useful instructions, so that they can at once command work.

We resort to no trickery whatever to sell Sewing Machines, but sell what we know to be Merits as recommended them. We can do this, as the demand for them is so great that although the Singer Company make more than all other Sewing Machines combined, they cannot nearly fill their orders, and are compelled to still extend their Gigantic Works.

We have been so fortunate as to secure the General Central Agency,

to the territory, we extend a cordial invitation to all to come and see the Machines, whether they wish to buy or not. See all others, but do not buy without your examining the Singer.

THE SINGER
BUTTON-HOLE MACHINE.
