

OUR NEIGHBORS.

OAKLEY, IDAHO.

SHOCKING GUN ACCIDENT.

Eugene Curtis Shot and Killed, Leaving a Bride of Four Months.

Special Correspondence.

Oakley, Cassia Co., Idaho, April 22.—One of the saddest accidents that has happened in this neighborhood for years past, happened this morning, resulting in the death of Eugene Curtis of this place. The particulars are as follows: Eugene Curtis left his home yesterday afternoon to go to his sheep camp, about six miles southwest of town, taking an old 45 Winchester rifle with him to kill coyotes. He spent the night with the sheepherders, his camp was in his usual good health and spirits. This morning he was moving camp, having gone to within a half mile of the place intended for his stopping place, and at a point where he had to drop his trail wagon to pull up a hill, the trail wagon was brought up to the other and during the time of coupling the wagons together, Eugene mistook a coyote or some other game, as he took the gun from the wagon, and either while doing so, or immediately after, the gun was accidentally discharged, the lead entering his jaw just under the chin, tearing away the lower part of the face and part of the roof of the mouth, inflicting a fatal wound from which he died in about half an hour. He was alone at the time, but Mr. Frank Cummings, who was herding his goats some distance away, and within sight of the Curtis wagon, heard the shot, and when he heard Brother Curtis call three times (presumably for help), then the marks of blood shows that he went and sat down on the tongue of the trail wagon, which was not yet hitched. Shortly after this Mr. Cummings saw Brother Curtis' team running away, and as the animals made a turn and came toward where he was he became interested in the affair and soon saw Brother Curtis come running after him. After reaching his team, he nearly a quarter of a mile Eugene fell to the ground from exhaustion and loss of blood and expired. It is thought that after sitting on the wagon tongue for a while that he went to the horses, which took fright from the fall of powder and blood and ran away. The team was caught by Mr. Cummings and driven back to where the body of the dead man lay, and as soon as he found that Eugene was shot and dead, Cummings rode to this place bringing the sad news. In a very few minutes Bishop H. C. Haight with several men started for the scene. These were followed by Drs. Alba and Hamburg and the county coroner. In that order, the record of the new of the accident Bishop Haight had the remains conveyed home, where an inquest was held, the jury returning a verdict of "death by a gun shot accidentally discharged, in the hands of the deceased."

Elder Curtis is the son of Patriarch Dor P. Curtis, of Oakley, 32 years of age. He was a man of most exemplary life and has been one of the home missionaries of this state for some time. He was married to Miss Julia Samuelson of this place, four months ago, and their home has been among the happiest. The bereaved young wife is prostrated with grief, and has the sympathy of a host of friends. The deceased undoubtedly had a presentiment of some such lurking evil, as when parting with his wife yesterday, he turned back three times and remarked that he never had to leave home so sad in his life. "The time of his funeral has not yet been decided upon."

Due Notice is Served
Due notice is hereby served on the public generally that DeWitt's Witch Hazel Salve is the only salve on the market that is made from the pure, unadulterated witch hazel. DeWitt's Witch Hazel Salve has cured thousands of cases of piles that would not yield to any other treatment, and this fact has brought out many worthless counterfeits. Those persons who get the genuine DeWitt's Witch Hazel Salve are never disappointed, because it cures. Z. C. M. I. Drug Store, 112-114 Main Street.

DINGLE, IDAHO.
Death of Mary Matilda Cook in Life's Springtime.
Special Correspondence.
Dingle, Bear Lake Co., Ida., April 22.—Mary Matilda Cook, who has been ill for two years and a great sufferer, passed to the great beyond on April 17, aged 16 years 4 months and 4 days. Sister Cook, though young in years, was a natural leader among the young people before she was stricken down; and has been a subject of their faith and hope during her sickness. She is the daughter of George and Alice Cook. The funeral was held from the Dingle meetinghouse, where consoling remarks were made by Bishop Humphreys, Elders J. H. Grimmer, Samson Tate and George Mate.

OXFORD, IDAHO.
Death of Grandma Hepworth in 82d Year.
Special Correspondence.
Oxford, Ida., April 22.—Sister Ann Lambert, Hepworth, for 39 years a resident of this place, calmly passed to the great beyond on Friday evening, April 17.
The deceased was 81 years old, having been born March 31, 1822, at Bately, Yorkshire, England. She was married to John Hobson in 1845 and from that union was blessed with nine children—six boys and three girls—four of whom survive her, viz: Jesse Hobson of Oxford, Ida.; Alma Hobson, California; Alice Dewey, Iowa; and Sarah Nightlinger, Philadelphia. Her grandchildren and great grandchildren living number respectively 23 and 5. Her first husband died and she was afterwards married to Joseph Hepworth, who died, leaving "grandma" for 26 years a widow. She embraced the Gospel over 50 years ago; emigrated to this country in 1873, arriving at Ogden, Utah, on the 24th of July of that year. She had a kind and loving heart, and was always been a faithful and consistent Latter-day Saint, loved and respected by all who knew her.
Millennial Star please copy.

BAKER CITY, OREGON.
DISASTROUS FIRE.
Stoddard Bros. Saw Mill Burned—Loss Estimated at \$10,000.
Special Correspondence.
Baker City, Ore., April 24.—A disastrous fire occurred this morning about 6 o'clock at the sawmill owned by the Stoddard Brothers, on the western edge

HOSTETTER'S STOMACH BITTERS
Is entitled to the highest praise as a family medicine. It you judge it by its merit and record of cures during the past fifty years. No other remedy can take its place because it is the best that science can produce as a cure for Belchings, Heartburn, Indigestion, Bilelessness, Dyspepsia, Insomnia, and Nervousness. It is also an excellent tonic and blood purifier. Don't fail to try it. It has never been known to fail.

A LINGERING COUGH

The cough that holds on in spite of all remedies needs energetic and above all thorough treatment. A mere cough mixture won't do. Root out the cold that causes the cough.

How? Scott's Emulsion. Why Scott's Emulsion? Because it stops the irritation, soothes the tissues and heals the affected membranes. When? Right away. Scott's Emulsion begins to help with the first dose.

We'll send you a sample free upon request.
SCOTT & BOWNE, 409 Pearl Street, New York.

of town. Before assistance could be got, the mill was destroyed, and about \$10,000 worth of machinery. It is thought that the fire was caused by a spark from the engine, as the yards are immediately adjoining the railroad station. No insurance was carried, because of the water system being so handy, and in fact one hydrant remained untouched until too late to check the blaze. The loss is a serious one, not only to the Stoddard Brothers, who are among the energetic builders of this city, but also to their employees, of whom about 50 will be thrown out of employment by the conflagration. Steps toward immediate rebuilding have been taken, and other mills in the city are already at work getting out timbers for the new Stoddard mill.
The mill is owned by the sons of John Stoddard, who was for many years a resident of Cache valley, prior to removing to Oregon. The father is now dead, but his son George (who is also Bishop of the Oregon Sugar company), and his sons, Joseph, Henry and William, are the brothers owning the mill. Their planing plant and box factory are uninjured.

AUBURN, WYO.
Mrs. Amelia Lehmberg Lays Down—Life's Burden.

Special Correspondence.
Auburn, Wyoming, April 21.—On Wednesday night, Mrs. Amelia Lehmberg, an old time and highly respected resident of this place laid down her life's burden. She was born in Brewholter, Germany, in 1834, and with her husband emigrated to Utah in 1869. She resided in the city of Salt Lake in Round valley, Morgan county, Utah, until 1882, when she moved to Star valley, where they have resided since that time, being the oldest permanent settlers in the valley.

BAKER CITY, OREGON.
SHOCKING ACCIDENT.
William Lewis Has Narrow Escape For His Life.

Special Correspondence.
Baker City, Ore., April 21.—What came near being a fatal accident happened to William Lewis last evening. He was working night shift at the planing mills of the Oregon Lumber company here, and at the time was attempting to adjust a set screw on a large planer, when the pulley belt caught his jumper sleeve and pulled the arm into the revolving wheel. A projection on the machine, however, prevented the arm from being drawn in very far, and his clothing was torn from his body, his head was badly battered, his arm broken in two places, and two of his ribs broken. The machinery was stopped as soon as possible, and Lewis was taken to the residence of his father, Mr. W. S. Lewis, where he received surgical aid, and is now slowly recovering from the effects of the accident. He is not thought to be badly injured internally.
About 150 pieces of rolling stock equipment for the Sumpter Valley railway arrived in this city during the week. The equipment consists of passenger, baggage and mail coaches, box cars and flat cars and engines, and formerly belonged to the Oregon Short Line narrow-gauge road in Utah.
Mr. and Mrs. John M. Leishman are rejoicing in the arrival at their home last week of a grand girl baby. All well. The mining industry in this vicinity is taking on a boom this spring. Much new machinery has been hauled into the mountains during the winter, when it could be taken in on sleds, and a season of unusual activity and prosperity is looked for.

PLEASANTVIEW, IDAHO.
LEWIS W. JONES DEAD.

Veteran and Pioneer of 74 Laid to Rest—Sheep Losses.
Special Correspondence.
Pleasantview, Oneida Co., Idaho, April 17.—Lewis W. Jones, one of the oldest residents of this place, passed away on the 12th inst., after a short illness of lung trouble. He was born in August, 1829, at Graig Farm, Merthyr-Tydvil, Glamorganshire, South Wales, and embraced the Gospel in 1851. He was an active participant in the trying experiences of the pioneers and came near losing his life a number of times, being compelled to look down the barrel of a gun on three different occasions. In March, 1853, he was married to Sarah Williams, by whom he had two sons and a daughter. He took an active interest in Church affairs until of late years when his health failed. He was ordained a Patriarch by Apostle Rudger Clawson Dec. 22, 1902. He has a wide circle of friends and acquaintances both in Idaho and Utah, who will be sorry to hear of his demise.
Spring is very backward here. Farmers are at present busily engaged putting in their grain crops.
Flockmasters are coming in from the winter ranges with their flocks and reports having had rather a hard time, as the winter was not so severe as high as 30 per cent, while others have been more fortunate.

CHEYENNE, WYO.
STOCK LOSSES IN WYOMING.

Average Sheep Losses Normal—Poor Condition of Muttons.
Special Correspondence.
Cheyenne, Wyo., April 21.—So much has been written and said relative to stock losses in Wyoming the past winter, many of the reports being greatly at variance with each other, a number of the leading stockmen and oldest residents in the state have been asked to give their opinion.
Alex. Rutledge, manager of the Swan, Land Cattle company, the largest cattle concern in the Rocky Mountain region, which ranges its stock in northern Laramie county, eastern Albany county and western Nebraska, says: "There has been more snow and bad weather than 20 years and the feed on the ranges has been very poor. As we had a lot of hay, we have come through with not more than 5 per cent loss. Some places the losses have been greater than this,

and in others less. A large amount of moisture having fallen this year our grass is at least 15 days earlier than it was last season. Cattle are thin and we have little hope of early beef."
B. B. Brooks, Casper, one of the leading western breeders of black cattle, says: "Considering the shortness of winter range, the severity of the winter, and the numberless bands of sheep driven to this section from other counties, the range sheep in Natrona county have pulled through remarkably well. Average loss 10 per cent, with sheep in poorer condition than a year ago. Some few outfits have lost heavily, while many others report no losses to speak of. Cattle on ranches in this county have required more feed than usual, and are generally thin in flesh, but no loss has occurred to speak of. Prospect for a good grass year excellent, with abundance of snow in the mountains to furnish ample water for irrigation."
N. L. Wiggins, Patrick, Laramie county, says that he has had a hard winter on stock. His loss is 27 per cent. Cattle are very weak and should we get a late storm the loss would be great."
State Treasurer H. G. Hay, treasurer of the Wyoming Stock Growers' association, Cheyenne, says:
"The range conditions during the past winter have been the worst that I have ever seen in this state, during my residence of 30 years. I have never seen so short a growth of grass as there was at that time. The winter, until the first of January, was mild in all sections of the state, but since that date it has been very severe in every locality, and not very bad in others. It seems almost miraculous that the loss of cattle and sheep has been so light. I do not think there was ever a spring when cattle came out so thin in the state as they are now, but from all sides we get reports of very light losses. In certain localities the loss of sheep is said to be from 13 to 20 per cent, and in others it does not run over 6 per cent. From all the information I can get, the loss of cattle in the state will be over 10 per cent, taking the state as a whole, and there will be no loss at all, beyond the usual death rate, among the cattle that are kept up by small ranchmen in the localities, some of whose localities, in individual cases, losses of from 20 to 30 per cent have been sustained by flockmasters, but take central and eastern Wyoming as a whole and the loss will not be more than 10 per cent, on average. The loss of sheep is not so serious, as in some localities, which is not much above the normal."
Tim. Kinney, Rock Springs, one of the largest holders of sheep in the west, and who has been on the ranges of Wyoming for over a quarter of a century, says: "The winter has been especially severe in the Red Desert country and sheep came through in much better condition than we anticipated. I should say the average loss in our country would not exceed from 5 to 7 per cent, and in some places practically no loss among cattle."

RAYMOND, CANADA.
WILL INCORPORATE TOWN.

Industrial Activity—Work on Sugar Factory—Population Augmented.
Special Correspondence.
Raymond, Alberta, Canada, April 15.—Raymond district is a very busy scene these days. All branches of work are in full blast. Planting grain has begun in earnest. The plow for five miles around is dotted with teams, turning seed to the weather, sowing grain and drilling. Many are at work preparing the soil for the reception of beet seed. There are not sufficient men and teams to supply the demand.
Work upon the big sugar factory building is being rushed, nearly 100 men at present are employed, and the force will be increased as fast as material arrives. A portion of the foundation for the main building is already in place. The steel work for the line kiln is now ready for the roof, and in a short time will be opened up for business. The grounds about the building for acres are covered with machinery, and more arriving every few days.
At a recent meeting of the village it was decided to incorporate Raymond and in a short time it will be putting on metropolitan airs.
"Johnson's army," an excursion party from Provo, Utah, chaperoned by J. F. Johnson, our assistant postmaster, arrived in Raymond last week. The crowd filled two passenger cars and consisted of 87 souls. The population of Raymond was materially increased by this addition alone. The excursionists were to have been given a reduced rate, but after having got as far as Butte the train crew got into a misunderstanding between themselves, and to settle the matter the people were all charged full fare. Mr. Johnson was quite indignant over the matter, and to say that the passengers were disappointed is putting it mild.

MAGRATH, CANADA.
BOY MEETS FRIGHTFUL FATE.

Eugene Dalton Dragged to Death by A Horse.
Special Correspondence.
Magrath, Alberta, Canada, April 22.—Eugene, the 12-year-old son of Joseph A. and Mary Dalton, met with a fatal accident on the evening of April 15.
The little boy was returning home from the pasture with the cows, and stopped at a neighbor's to take his father's saddle home. After putting the saddle on his horse, the boy, within four blocks of home when his horse stepped into a hole and fell. One of the boy's feet caught in the strap above the stirrup. The horse was gentle, but became frightened at the boy dragging and pulling. The boy's mother was one of the few persons who saw the accident; she caught the horse by the bridle as it passed the house, but it jerked away and ran to the barn. A neighbor arrived in time to help take the foot from the stirrup. The boy was terribly cut about the head and face, as the horse had come in contact with wire fences while running. A number of the bones of the head were broken, and the left arm was broken. The poor mother felt his pulse and found it had ceased to beat.
Everything was done for the bereaved family that could be, and they stood the sore trial bravely. The funeral services were held in the Magrath meetinghouse April 17. The school closed and all the students turned out to pay their respects to their departed schoolmate and beloved friend.
Eugene, like his parents, was a caring worker. His Sunday school, primary and religion class. Brother and Sister Dalton moved from Bear Lake county, Idaho in January, 1902, and settled in Magrath. From the family of eight children they have had seven children. They have only one child left, a lad of 9 years.

SILENT SOIL WORKERS.

Now that we have learned that the sila is a factory in which living creatures are as busy as in any shoe factory, woolen or cotton factory, we desire to know what kind of crops will increase the numbers of these silent workers, these bacteria, the little creatures so small that they cannot be seen except with a powerful magnifying glass. We have learned, says Green's Fruit Grower, that clover, peas, beans and other similar plants attract the bacteria, or cause them to increase in number and thus add to the fertility of the soil. Twenty years ago no one could understand fully why clover growing tended to make the soil rich. Now we know that it is caused by the presence of bacteria, gathering about the roots of red clover. Let us learn all we can about the busy workers of the soil; angleworms belong to this class. Humus is said in the soil. Too much cannot be said about the importance of humus. The larger part of the farm lands of this country contain fertility enough to bear many heavy crops, but the fertility must be liberated or put in shape so that plants can feed upon it. Thus if we are interested in the roots of red clover, or green crops, or by applying barnyard manure, we increase our crops far more than the sum total of the plant food in the humus. The application of sila in the form of five or ten bushels of more per acre often increases the growth of crops for the reason that the time looses the fertility already existing in the soil, but time does not add to the fertility. If the application of sila is too large continued the soil will become impoverished. Not so with humus. The more we increase it the richer our soil will become.

Trips Remedies in Great Demand.
When colds and grip are prevalent the quickest and surest remedies are in great demand. Mr. Joseph D. Williams, of McDuff, Va., says that he was cured of a very deep and lasting attack of the grippe by using Chamberlain's Cough Remedy after trying several other preparations with no effect. For sale by all druggists.

GREELEY SUGAR COMPANY.
A correspondent to the Best Sugar Gazette writing under date of March 10: The Greeley (Colo.) Sugar company has contracted for 7,000 acres of sugar beets, and everything is favorable for a heavy crop this year. The land is in the best condition possible to start the crop, as we had 3 1/2 inches of rain last October and November, and, besides this, we have had 18 inches of snow. The ground froze up about the 12th of December, and has not thawed out yet. With a reasonably early spring, which we think we will get, there is no reason to believe that we will not get a model crop of sugar beets this year. Through Pleasant Valley, where the Greeley Sugar company is preparing to build a spur, leaving the line of the Union Pacific three miles north of Greeley, and running east 11 miles. We have 2,500 acres of lands, which will give us 35,000 tons. We have 1,000 acres on

what is known as the Delta Plate Bottom and Godfrey Bottom that will give us 11 tons per acre, which, in round figures, will give under the conditions that now exist with plenty of moisture in the ground, and an abundance of snow in the mountains for late water, 85,500 tons of beets.

Good For Children.
The pleasant to take and harmless One Minute Cough Cure gives immediate relief in all cases of Cough, Croup and La Grippe because it does not pass immediately into the stomach, but takes effect right at the seat of the trouble. It draws out the inflammation, heals and soothes the lungs permanently by enabling the lungs to contribute pure life-giving and life-sustaining oxygen to the blood and tissues. Z. C. M. I. Drug Store, 112-114 Main Street.

USEFUL CHILDREN.

The school children of Rochester, N. Y., have by their industry succeeded in ridding the city of a pest of moths. These moths had become so destructive that the Forestry association offered a prize of \$5 to each of the children in any one school who would bring in one thousand or more of the cocoons of this insect, \$3 to the three bringing in the second largest number, \$2 to the three bringing in the third largest number. This was in 1902. The next year the amount of the prizes was increased to \$10 for the boy or girl who brought in a greater number of cocoons than were brought in by any pupil in 1902; this was 41,909. Twenty children each won a \$10 prize. The school children of Rochester have gathered from the back of trees, fences, rough places in houses almost 9,000,000 of those moth cocoons, and now the city is free from these insect pests.

Dancer of Colds and Grip.

The greatest danger from colds and grip is their resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for these diseases we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that it is a certain preventive of that dangerous disease. It will cure a cold or an attack of the grip in less time than any other treatment. It is pleasant and safe to take. For sale by all druggists.

SUGAR PRODUCTION OF THE WORLD FOR 1902-03.

According to the latest figures, gathered from various sources, the entire sugar production of the world for 1902-03 is estimated at 9,585,000 tons, as against 10,250,000 tons for 1901-02, a decrease of 1,217,000 tons. The estimated production of beet sugar for 1902-03 is 6,220,000 tons, or 1,257,000 tons less than that of the preceding year. This includes an estimate of 150,000 tons of beet sugar for the United States, as against 160,000 tons the previous year. The estimate for cane sugar is 3,365,000 tons, or 40,000 tons in excess of 1901-02. In this estimate is included 280,000 tons for Louisiana, as against 260,000 tons for 1901-02. The following countries show a decrease in the estimate of the beet sugar production: Germany, 375,000 tons; France, 300,000 tons; Austria, 251,000 tons; Belgium, 190,000 tons; the Netherlands, 100,000 tons; Sweden, 65,000 tons; Denmark, 17,000 tons; being a total decrease of 1,355,000 tons. The countries showing an increase in beet sugar production are Russia, 5,000 tons; United States, 31,000 tons, and representing a total increase of 105,000 tons, and a net decrease over 1901-02 of 1,257,000 tons.

EXTRAORDINARY FINDING.

Journalistic circles in Portugal were a few months ago thrown into a state of wild excitement by a weird warfare between the editors of two well known newspapers. When at length one of them published a statement to the effect that the other had printed an article attacking a certain politician because that gentleman refused to pay blackmail, the staff of the journal so accused were round to a frame.
Headed by the editor, it is alleged, they made their way to the office of the rival paper, which they endeavored to set on fire. The staff thus attacked, however, made a determined resistance, the fire brigade was called and presently the flames were put out without any very serious damage having been done. The editor and the whole staff, it is alleged, were then charged with incendiarism, and several of them were afterwards sentenced to terms of imprisonment—Tid Bits.
