In a large proportion of cases when women are weak run-down and falling off in flesh and looks, the root of the trouble can be traced to womanly diseases which undermine the general health. The stock yards company studies the prevailing. The stock yards company studies the livestock business in the west very care-fully and keeps records which are inter-esting in connection with the variations in the price of stock. The figures, in a general way, show remarkable changes in the number of animals sent to the paca-inghouse markets. For several years prior to the depression of 1883 there had been a steady increase in the shipments of stock to the packinghouse markets. In 1992 prices of livestock were going down and the general depression which spread over the whole country the year following began to be felt among the stockmen But after 1903 prices of cattle were still low, and they did not reach their mini-mum until 1895, when the receipts at the packinghouse markets were the smallest in years.

packinghouse markots were the smallest in years. Since 1855 prices went steadily upward until they reached the top last year and receipts kept on increasing. The receipts of cattle at these markets hast year were 59 per cent greater than in 1856, and this year's receipts will greatly exceed those of last year. Receipts went down to but little more than 6,009,000 cattle at the packinghouse markets in 1895. Col. Morse says it is a conservative estimate to say this year's receipts will go about 2,500,000 This year's receipts will go about 2,500,000 This year's receipts exceeded 9,000,000 more cattle on Dec. 1, than on the same date a year ago, and Kansas City, the only market that had suffered from extraordinary causes, was only 109,006 be-hind last year's figures. Every packing-house in Kansas City, as well as the stock yards, was under water a week in the flood and it took two months to get them in working order again.
