Exchange at Good Prices.

Lower Mammoth Weaker - Little Chief Higher-Anchor Active-Daly* West Wanted.

Business closed on the mining exchange this morning with the sale of \$3,935 shares for \$44,313. May Day and Yankee Con. were the chief attractions and both of them maintained the advance made yesterday afternoon. The former was very active as high as \$1.13%, though a slight weakening was manifested at the close, when the stock was offered at \$1.12%. Over 13,000 shares changed hands during the call. it weakened to \$4.30, after selling at \$4.35 at the outset. Mammoth loosened up 160 shares at \$2.421/2, while Boss Tweed sold down to 20%. Tesora was traded in at 72%. Ben Butler changed hands at 8%. Silver Shield sold up to 4, while Tetro dropped 1,000 at 12. Anchor was active for the first time in weeks. Sales were recorded as high as \$2.14, while Daly West was traded in between \$29.50 and \$39.60. Star Con, weakened to 42½. Little Chief moved up to 1712. Closing quotations were posted as

YANKEE CON. VERY STEONG PECULIAR DIXIE STRIKE.

ported in Lower Drift.

Big Body of Pyritine Found on Lower Levels San Bafael Oll Company-Lower Bammoth Meeting.

Manager C. S. Scheu of the Honorine, came in from Stockton last evening with fine looking samples of ore from the latest developments in the old bonanza. The ore is apparently a fine smelting property carrying a great deal of cube galena, interspersed with chalcopyrite and pyrites of Iron. The ore carries a good percentage of copper in addition to its other values and what is more encouraging, there is a big body of it. For Some distance, nearly 150 feet, the pres-ent management has been running on ore which occurs on the foot wall of the van an offering at \$1.31½ at the close. Lower Manmoth also received consid-erable attention from the talent,though the was not provided at \$4.50 and closed ore which occurs on the foot wall of the velo. The ore has been growing wider as the drifting progressed, but the man-management was not propagated for the management was been growing wider as the drifting progressed, but the man-management was not propagated for the management was been growing wider as the drifting progressed, but the management was not prepared for the sudden change which oc-curred last week, when the full face of the 7-foot drift was found to be in ore. Neither wall is now in sight, and as the ore is of fine ship-ping outly. We chuck more who have ping quality, the plucky men who have undertaken the deep development of the mine are to be congratulated. The water flow remains about the same. big pump is handing about 1,000 gallons per minute.

NEW FIND IN THE DIXIE.

Body of Iron Pyrites Exposed on the Lower Level.

A peculiar strike has just been made In the Dixle Copper mine near St. George, it consists of a large body of fine grained iron yprites closely sembling pyritine. It was doubtful from its appearance whether the stuff carried copper or not, but tests at the mine failed to disclose any red metal, Samples were then forwarded to Salt Lake for tests as to gold and silver. These were being made this afternoon. The find was made on the lower levels of the mine but far above the water line and the discovery is something entirely new and unexpected.

OIL EXHIBITION.

a Spring in Emery County.

forty feet. Then they crosscut sixty feet on the vein without finding the other side wall. The free milling ore taken from the mine assays about \$400 to the ton. Just before I left, and to the ton. Just before I left, and within six weeks after the boys had bought the prospect, they had refused \$350,000 cash for it. That is a pretiy good record, I think. The father of the boy who had the money died a couple of weeks ago, leaving his son enough money to develop the mine. They are going to sink 300 feet on the yein, and then erect a mill suitable to character of the ore."-Denver Post.

Oil as a Fuel in Texas.

The interest which is taken in the oil discoveries of Texas is shown by the fact that the officers at Chicago of the Atchison, Topeka & Santa Fe railroad are seriously contemplating the substi-tution of oil for coal on their Texas lines. The American Mining News says their experience with oil on locomo tives in California has been satisfactory in the past few years, and as oil is so plentiful in Texas and coal is so expen-sive that it cuts a big figure in oper-ating expenses on all Texas lines, the using of oll will greatly reduce the cost of fuel. The Santa Fe burned oll in its of fuel. The santa Pe burned of in its locomotives in California when it cost \$1 a barrel, but coal was \$7 a ton. Oil is now materially cheaper. Oil is much cleaner on passenger trains, as it does away with the smoke and cinders which have always been objectionable. President Ripley, of the Santa Fe, pre-dicts that within eighteen months all

the roads in Texas will be using oil on their locomotives.

MINING NOTES.

The Opher Hill had nine cars of ore on the market today. P. L. Kimberley was expected to

reach the city this afternoon. Five cars of ore from the Bullion-Beck were on the market today.

A car of ore was marketed today Seven Gallons Per Day Secured from from the Louise S., of Bingham.

E. J. Witcher left for Scattle this

states that "perhaps no article of diet reports of an accident in the company's power house and ralled 2 points on the next two transactions. Tobacco fell off 2 from the highest. Denver common was bought considerably and rose to 53. of animal origin is more commonly eaten in all countries or served in a great-er variety of ways than are eggs. Hen's eggs are most common, although the eggs of ducks, geese and guinea fowls The market continued very irregular on large dealings. Strength was limit-ed to special stocks and realizing conare used to a greater or less extent. More rarely turkeys' eggs are eaten, but they are generally of greater value for hatching." tinued in the general list. Atchison went to 9912, and there were recoveries in other leading stocks which had been Judged by available statistics, eggs weak earlier, including Rock Island, which rallied to 2%, and New York Central, 1½. Low stocks were in good demand. Southern Pacific rallied to

Sterriter

compared favorably with the more com-mon animal foods, and it is shown that the high food value of eggs is appreci-ated and that they constitute one of the very important articles of diet in the American household. In many of the dietary studies made in the United States

in the United States data were record-ed of the cost of different foods and the relative amount of nutritive material contributed by each in proportion to the total cost. Compared with oth-er foods at the usual prices eggs at 12 cents per dozen were found to be a cheap source of nutriments, at 16 cents per dozen they were fairly expensive, and at 25 cents per dozen and over

they were very expansive. Eggs are also valuable for giving variety to the diet and for furnishing a light, easily digested nitrogenous food especially guitable for breakfast or other light meal, an important item for those of sedentary habits.

The statements so frequently made by housekeepers that eggs at 25 cents per dozen are cheaper than meat is true in one sense-not, of course, with refer-ence to the total amount of nutrients obtained for the money expended, but because a smaller amount of money is needed to furnish the meal; that is to say, whereas at least one and one-quarter pounds of beefsteak, costing 25 cents, at 20 cents per pound, would be necessary to serve five adults, in many families five eggs, costing 10 cents, at 25 cents per dozen, would serve the same number, and probably satisfy If the appetites of the family are such as to demand two eggs per person, Chicago, June 5.-July wheat opened at 7667634, declined to 7534, rallied to 76 and finally dropped to 74%, closing doubling the cost, the cost is still 20 per cent less than that of the steak.

General Agent, 79 West Second South Street, Salt

Samples of Emery county oil attracted much attention today in W. H. Clark's office on Second South street. A minlature pump was arranged in the window with a trestle which attracted general notice from passers by. Mr. Clark says the San Rafael company owns about 2,000 acres of oil lands in Emery county, which it proposes to develop. The samples of oll shown today were taken from a spring where oll and water gushes from the ground. About seven or eight gallons per day is caught by having the oil settle on the top of the water in a tank from which the water is drained. The oll is said to be of specially good quality for lubri-cating purposes, and is being used at the Knutsford and Troy laundry with much success.

MINING MEETINGS.

Big Hill Co. Elects Officers-Big Indian Transact Business.

Special Correspondence, Provo, June 5,-The Big Hill Mining company held a meeting here yesterday and elected the following officers: Sam

A. King, president; John Bestlemeyer, vice president: Catherine Bestlemeyer, O. H. Bushnell and August Blumenthal, directors: Grant C. Bagley, secretary and treasurer

The company owns fourteen claims in the Tintic district across the guich from the Sloux and Godiva ground and joining the Lily mine, and the property is considered very promising. Devel-opment work will be commenced at

The Big Indian directors held a meet-Ing here yesterday and decided to make a thorough test of the ore with the apparatus invented by Col, Warren

oose, and if it proves successful, to ect large works at the mine for treat-

ng the ores. There is scarcely any loubt about the success of the machine. is it has already been tested sufficiently to prove its adaptability for treating the Big Indian ore; but the est now to be made will be on a larger cale, and botter results are expected. Col. Loose is now having a large ma-chine made and exepects it to be comdeted in about two weeks, when the

est will be made here. The Elig Indian property is situated in San Juan county, and there is said to be millions of dollars' worth of ore a sight. The property is owned by ". E. Loose, Senator Kearns, Governor Wells, Lester Taylor and other promi-

morning on his way to Alaska. The regular monthly dividend of \$45. 000 will be paid by the Daly-West on the 15th inst.

The Red Wing, of Bingham, reached the market today with three cars of ore. Three cars of slag from the old Pas-

coe dump near Stockton were on the market today. The Century of Park Valley will market its first car of concentrates tomor-

The Utah of Fish Springs will have a car of high grade ore on the market tomorrow.

An assessment of ½ a cent a share has been levied by the May Flower Mining company. Manager P. T. Farnsworth, of the Horn Silver, arrived home today from

an inspection of the famous bonanza near Frisco.

A fine bar of gold buillon weighing over 100 ounces, was received at the Utah Commercial and Savings bank yesterday from the Century, of Park Valley. A lot of cyanides was also re-ceived from the mine ceived from the mine.

The Taylor-Brunton sampler reported six cars of ore from Bingham, twelve from Stockton, five from Tintic. one from Marysvale, and one from Park

Valley today. A car of gold concentrates reached the market today from the Dalton mine near Marysvale. The lot weighs some-thing over twenty tons and is expected The mill, which was operated by leas-ers is now closed down.

Arthur Buckbee, who is down from Idaho, reports the resumption of work on the property of the American Mines company in that state of which he is president. At present the company is driving a tunnel on the vein on a twofoot streak of gold ore of very fine milling quality.

Manager F. H. Lathrop stated today that his company expected to start the machinery in the Winnamuck mill moving tomorrow. The old Bingham mill, which has been remodeled somewhat, will be started up on the second class ores of the Tiewaukee. A small force is also developing the Winnamuck property under an option but thus far no changes are reported.
