

The rise in the foreign market has kept pace with the advance in the do-mestic market, or rather has set the pace. Within the last month, especial-ly, it has been the unusual advances which have pushed up the domestic market. As a matter of fact, however, the same conditions have ruled both markets and have set the domestic and foreign prices skyward together Though many brokers still contend that the present unusual advances are due to speculation in London, none of them state that the general advance from a year ago is due to that reason There is absolutely no doubt but that the intrinsic value has gained immense-ly, and is still on the increase. The ly, and is still on the increase. The matter of the present advance, though possibly due to speculation, cannot atfect the general tone of the market: the tendency is upward and most brok-

The tendency is upward and most of a ers say it will continue upward for many months at the very least. It is predicted that copper will go to 25 cents a pound during the winter. Considering the extreme jumps recentthis seems not far from conservaabout \$40 over the present quotation.

NATURAL CAUSE FOR RISE.

That there has been a natural cause for the advancement of copper can be readily proved by statistics of the year 1905 and estimates of experienced deals in the year 1906. According to the statistics of the gov-

ernment, the production of copper in 1995 was 901,907,843 pounds. Extreme estimates for 1906 reach only 1,000.000,-000 pounds, or but about 10 per cent increase. Conservative estimates place the increase in production at about 5 per cent. The most conservative estimate of the increase in consumption is 20 per cent, while many estimates run to 30 and 35 per cent. It can easily be seen with this enormous increase of consumption over production prices are bound to rise. This growth in pro-duction is due to the greater use of copper as a substitute for other metals. The extra amount of copper produced comes largely from the Lake Superior districts, especially fro mthe Calumet & Hecla and the Champion properties; the Montana district, from the North Butte company; and the Arizona belt. from the Old Dominion and Copper Queen properties. Alaska also shows an increased production and is becom-ing a factor in the copper world. Utah, Tennessee Nevada and California are also producing more copper and will

produce more in the years to come. Estimates of copper nien show that in the past year the English consumption has grown 32 per cent, that of France 19 per cent and Germany 25 per cent. This has been a big drain on the copper supply, and is a decided factor pushing up prices.

In pushing up prices. When top prices will be reached there is no telling. But with continued in-crease in consumption over production, as seems probable, there is likely to be a continued advance in prices. Ther will be temporary slumps, of course There but the general trend in prices, according to all brokers, will be upward, unthere is some financial crisis or e unforeseen event to check the general prosperity.

A LITTLE BIT LATE.

Government Report on Value of 1905 Metal Output Just Issued.

Washington, Dec. 24 .- The total value of the mineral production in the United States in 1905 amounted to \$1,638,877,-127, being an increase over 1904 or over \$260,000,000, acording to a statement issued Saturday by the Geo The value of iron in 1905 was \$382,-450,000. During the same period there was a total production of over 300,000,000

asurer. A copy of the articles of incorporation

A copy of the articles of incorporation of the Copper-Apex Mining company of Park City was filed in the secretary of state's office today. Its capital stock is \$500,000, divided into shares of the par value of \$1 each. L. B. Wight is president, D. H. Scott, vice president; A. A. Pike, secretary: Sherman Fargo, treasurer. The company owns a num-ber of claims in the Uintah and Big Cottonwood mining districts.

ANACONDA DIVIDEND.

New York, Dec. 24 .- The directors of the Anaconda Copper company to-day declared a quarterly dividend of \$1.75 per share

The dividend declared is an increase of 25 cents a share over the dividend last pai. As the par value of the stock is \$25 a share, this makes the quarterly dividend paid today equal to seven per cent or at the paid today equal to seven per cent, or at the rate of 28 per cent annually.

WILL USE ELECTRICITY.

Telluride Power Company to Supply Energy for Bingham Mines.

The Boston Consolidated Mining company has completed the installation of necessary electrical equipment and on next Thursday will abandon steam power in the operation of its Bingham mines. Some time ago Manager La-fayette Hanchett concluded arrangements with the Teiluride Power company to supply not only the mines of the company but also the new mill now building at Garfield with electrical en-ergy and the change noted is in ac-cordonce with that contract. The big compressor plant hereafter will be electrically driven. The steam shovels and trains used in connection with them, however, will

continue with steam power.

NEWHOUSE MILL.

Fuel Situation Relieved and Plant Will Resume Tomorrow.

The fuel situation at Newhouse is so much relieved today that General Manager Hanchett has given orders to place the mill in operation again tomorrow night. Work in the mine will resume before the end of the week.

CONCENTRATES.

Charles H. Scheu has gone to Los Angeles to remain until after New Years.

Sidney M. Bamberger expects to leave for New York tomorrow. He will be absent several weeks. John A. Kirby has returned from a business trip to Nevada. He expects to remain after the holidays.

Ed H. Mead, who has been in Nevada for several months has returned to be with his family, during the holidays.

D. C. McDonald of the McDonald Ely Copper company has returned to camp after a conference with local in-

terests. O. Wiser, manager of the properties of the White Pine Gold Mining com-pany located between Ely and Cherry Creek, is in the city to spend the holi-

days. William M. Wantland, manager of the Emma Copper company, has gone to Pasadena, California to spend Christ-mas with Mrs. Wantland and son who have been spending the winter there.

The Bingham Bulletin is authority for the statement that the Miner's union of Bingham is about to make a demand on operators for another advance in wages. The men were recently granted a voluntary raise of 25 cents per day.

The condition of Mike Hennessy, the weil known mining engineer, who re-cently underwent an operation at St. Mark's hospital, is reported serious. However, his physician ay his chanc-es of recovery are favorable.
