

MINING, BUSINESS AND STOCKS

CARISA CUTS IN AT SEVENTY

The Broker Who Predicted Such
Prices for This Tintic Stock
Makes Good.

LITTLE BELL LOWER AGAIN.

Daily Judge at \$11.12 1/2—Nevada Hills
Weak—Closing Quotations
And Sales.

The prediction made a week ago by a well known broker that Carisa would sell for 70 cents a share before the close of the week was made good today. The stock opened strong with a small lot going at 55 cents, which was followed by a steady rise to 65 and concluding the regular call at 65 cents, seller 10 days. On the open board, the stock began at 65 and climbed to 71 cents without the slightest hesitancy. Daily Judge did business at \$11.12 1/2 and Little Bell dropped to \$7.50. Nevada Hills failed to stir up any enthusiasm, selling down to \$2.97 1/2, while Scottish Chief sold up to 16 cents. Columbus Consolidated opened on a sale at \$7, but closed lower.

The closing quotations and sales were:

STANLEY MINING DISTRICT.

Ogdenite Learns of Strike in the Sunbeam Property.

Special Correspondence.

Ogden, Oct. 12.—A letter received by Elliott Kennedy from the Stanley Mining district, in the Salmon river, in Idaho, informs him of a good strike made this week in the Sunbeam mine.

The company has only gone down about 270 feet, with its shaft and has struck a 12-foot vein of ore which assays \$92 to the ton in gold, with fair values in the other metals. This property is adjoining the Single Gold Standard mine, which is said to be a very meritorious proposition.

A number of Ogdenites are interested in the properties in that district. Mr. Kennedy is confident that other good strikes will be made in other properties.

IN BULLION DISTRICT.

Much Activity Being Displayed in Nevada Camp.

Good reports continue to come from the Bullion Nevada district. The Reville of Austin gives the following interesting account of developments in that camp:

"Eleven different properties are now being worked by the producers in the Bullion Nevada district. The Reville of Austin gives the following interesting account of developments in that camp:

"The Utah, the property of Lakita and Colburn, is sending out its second shipment to Salt Lake, which, it is expected, will net better than \$200 in lead and silver.

"The Dutchman, owned by the Bullion Venture company, a Colorado Springs corporation, has several cars packed ready for shipment, which will be sent out in a few days.

"New and important strikes are reported almost daily. The latest is in the Moose, under lease and option to Marvin Ish of Goldfield. Probably the richest gold ore yet found in the district recently discovered by Sewell and Austin on the north slope of Goldfield mountain in Cortez canyon. The ore is alive with free gold, much of it lying in slabs in the cleavages of the rock. There seems to be a large body of it, but development is required to determine its extent.

"Building is going ahead at a lively rate in both Lander and Tenabo, the two towns of the district. The population is now several hundred. The stages from Beowawe are loaded every day, while many are coming from the south by private conveyance. Recent developments have demonstrated the richness and permanency of the ore bodies and the Bullion district may be regarded as one of the most promising in the state. The mineral area is quite extensive and there still remains good territory open to exploration and location."

CALIFORNIA COPPERS.

Deal Made Whereby Frigate Ore Will Go to Balakala Smelter.

Information comes from Boston to the effect that the Frigate Mining company of California has concluded arrangements to furnish 1,000 tons of ore daily to the new Balakala smelter in Shasta county when it is completed, the ore being of a character well adapted to the smelter, and the Frigate Mining company with that from the Balakala mine.

It is said a bid of \$15 has been made privately for some big blocks of Balakala stock, and that it was refused, while another individual bid \$16 for 30,000 shares.

There is reason to believe that some one wants all the stock that can be acquired under \$200 a share and the Boston holders of Salt Lake hold 40,000 shares, the American Smelter 100,000, Philadelphia interests 40,000 and Boston holders 100,000. The public has 160,000.

BUTTE MINING NEWS.

Importance of Settlement of Vein Controversy in That Camp.

By the final settlement of the vein controversy between the Anaconda and the Butte Coalition companies, says a Butte correspondent, the Butte Coalition at once became one of the largest and most important operating companies in the Butte district. The concessions granted to it by the Anaconda, Boston & Montana, Parrot, and Butte & Boston companies have been surprising to mining men, in view of the fight made against the Butte Coalition's predecessor, Mr. Heinze, over the same mineral territory.

By granting absolute ownership of the Nipper mine to the Red Metal, with mining rights to the Red Metal, with mining rights to the Nipper vein on its dip under the Oden, Kanuck, Adventure, Micaever and Parrot claims, and a portion of the Never Sweat, the Red Metal (Butte Coalition) becomes the owner of one of the biggest copper mines in the Butte district. It is capable of yielding 1,000 to 1,500 tons of ore a day when thoroughly opened. For years the ore bodies were tied up by litigation and injunctions. The deal practically adds to the possession of the Red Metal a property that is the equal of any other mine that Heinze owned and operated at the time he sold to the Butte Coalition company.

There is little doubt that, with the completion of repairs on the other mines now under way and the reopening of the Nipper, the Red Metal will be in condition to mine 2,500 tons of ore daily, which is more than is mined by the Boston & Montana, and the Red Metal ore has lately been increasing in average values.

NEWHOUSE HAS CENTER OF STAGE

Beaver County Mine Continues
To Look Attractive to
The Investor.

SOLD IN SALT LAKE AT \$16.50.

A Letter From Camp—What Writer
Saw at Mouth of Cactus
Tunnel.

Newhouse Cactus still has the center of the stage today in local mining circles, and the stock sold locally after the close of the forenoon sessions of the local exchange at \$16.50, and one broker had an order for 2,000 more shares at that price. The eastern market was also strong for it, although it lopped off a few points at the close. However plenty of people can be found who have even gone so far as to predict that it will reach that figure within a week.

F. M. West, one of the most active brokers of the local exchange, was in receipt of a letter from Newhouse this morning. The writer has kept in close touch with late developments and was one of the summer to get in a vision of the stock before the recent rise started, and thinks so well of it now that he sent in another order to buy at the market.

That he believes the stock is going higher is evidenced from the following, which is quoted from his letter:

"I was at the mouth of the Cactus tunnel last night for probably an hour, and while I was there I saw 12 car loads of ore come from the 600 level. Much of it, I know, would assay 20 per cent copper, while the gold and silver values are running higher than was the case of the upper levels. This I can vouch for."

"Everybody in any way connected with the mine are simply astonished at the disclosures being made, and all of them—from the chiefs down to the muckers—are trying to get some of the stock and the figures fixed by some of them as to where the stock will eventually go to would make a Salt Lake broker blush. But candidly the Cactus is a big mine and the managers themselves cannot tell what a big thing it really is. The disclosures made in the cross-cut run on the four, five and sixth levels are simply immense."

"Mining in Beaver county is picking up. New and substantial discoveries are being made and the outlook for the future of the county. The outlook has never looked as bright as it does at the present time."

SEPTEMBER SALE OF COPPER.

It is estimated that the various selling agencies and producing companies of this country says a Boston authority, sold 225,000,000 pounds of copper in September, which about \$5,000,000 pounds was for export. A representative of one of the largest producing interests estimates that the total increase in production this year will not exceed 5 per cent. The existing scarcity of labor in all of the copper districts will limit next year's increase, and when the decline in the price of copper comes it will not result from overproduction.

UTAH DIVIDENDS.

Directors Post Regular Amount of \$2,000 and an Extra of \$2,000.

At the meeting of the directors of the Utah mine at Fish Springs yesterday afternoon the regular dividend of \$2,000 was posted and an extra of \$2,000, both of which will be payable on the 15th inst.

OUTPUT OF EUREKA MINE.

The output of the United States Smelting, Refining & Mining company's mines at Eureka, Nev., is not as heavy as it otherwise would be if the ore bins at Battlement, where it is necessary to transfer from narrow to broad gauged cars, were completed.

GOSSIP OF THE CURB.

One broker reported the sale of 2,000 shares of Nevada Douglas Copper today at the subscription price, \$5 a share.

Some say Colorado Mining, one of Jesse Knight's Tintic propositions, is good for an early advance.

There has been considerable buying of the Grace stock during the past few days. Sales were made yesterday afternoon up to 21 cents a share. It is said Copper Grace is likely to become more closely allied to Ohio Copper.

CONCENTRATES.

Mines Manager Cates of the Boston Consolidated came in from camp yesterday afternoon.

Judge W. I. Snyder left this morning for the Oden property at Park City, of which he is manager.

Silver moved up another notch today, the quotation being 69 1/2 cents per ounce.

A. J. Oren, one of the directors of the Nevada Douglas Copper company, departed for Boston this afternoon.

J. W. Ball, superintendent of the Imperial Copper property in Beaver county, is in the city on a brief business trip.

Ore and bullion settlements reported late yesterday by McCormick & Co. were: Crude ore and concentrate, \$22.60; base bullion, \$75.00.

The Utah Copper company is expanding. The management has secured additional office room on the sixth floor of the McCormick building.

Satisfactory progress is being made. It is reported, with the development of the Skylark Copper mine in Beaver county.

T. A. Rickard, editor of the Mining and Scientific Press of San Francisco, is scheduled to pass through the city tomorrow on his way east.

S. C. Hazleton, superintendent of the United States smelter, who was called to Washington, D. C., on account of the death of his father, has returned home.

The management of the Honerite reports that the labor famine experienced a few weeks ago has let up and that both the mine and mill are running at full blast.

Managers H. L. Charles of the Bingham Consolidated Mining & Smelting is wearing a contented smile because of the arrival of his family from Butte. Apartments have been secured in the Emery-Holmes building for the winter.

Richard A. Reips, the well known Ely, Nev., mining man who has been in the city for a few days on business, has gone to Denver as a delegate to the American Mining congress, which is scheduled to meet there next week.

IF A WOMAN

Wishes to have an investment one of the first considerations is to find a stock reasonably sure to pay a fair dividend. I commend as such a stock, Preferred Stock in Utah Sugar Company.

The Dividend paid is 7 per cent, divided into quarterly dividends payable 1st of January, April, July and October. The preferred stock is guaranteed its 7 per cent dividend before any dividend can legally be paid on the common stock. This

is free from payment by the owners of the stock of any taxes, and is therefore net profit.

We can buy you some of this stock now a little below par, \$9.99 per share. It has sold and will again sell at \$11 per share.

Sarge McManis

Rooms 512-513 Templeton Building. We buy and sell for our customers all kinds of commercial stocks and bonds and can buy or sell anything you want in our line. Call on us or write for any information you desire.

NO STRENGTH
IN THE MARKET

Prices Opened Higher, Advanced
But Soon Took a Downward Turn.

SOME OF THE FAVORITES FELL

Inroads Soon Made on Early Gains—
Afternoon Dealings Were Dull.

New York, Oct. 12.—The stock market opened active and at higher prices. The gains were moderate in railroads but special stocks made large gains.

Prices advanced for a time on large transactions but selling overbore the demand and prices subsided. This change of front led to a cancellation of most of the advances. Union Pacific lost a point and some of the favorites, such as St. Paul and Pennsylvania fell slightly below yesterday's closing. The top figures indicated a rise of 2 points in National Biscuit and Pullman, 1 1/2 in Reeling and Chief Iron, 1 1/2 in Pacific Coast, and 1 in Southern Pacific. Northwestern preferred and People's Gas.

Prices were fast dropping at 11 o'clock and the market was dull.

The relaxation of pressure on the market was hogged and sluggish for a time after which the advance was resumed. St. Paul, Atlantic Coast Line and Lead rose 1/2, Smelting & Northern Pacific and Northwestern 3/4.

Bonds were firm.

Inroads were made on the advances that occurred just before noon. The subsequent dealings witnessed a slow ebbing away of prices in which Union Pacific was the chief sufferer. U. S. Reduction preferred lost 2 points.

Dealings in the afternoon were without interest.

The provisions market was firm in sympathy with steady prices for live hogs. January pork opened 1/2 higher at 12 1/2; lard was 1/2 at 10 1/2 and ribs were 2 1/2, 95 cents higher at 7 1/2.

The market was firm all day. December declined during the session to 49 1/2, but the close was firm with December at 49 1/2, at 7 1/2.

Corn—Prices became firmer during the last half of the session and December advanced to 42 cents. The close was firm with December 1/4 higher at 42.

Cash: Wheat—No. 2 red, 73 1/2@74 1/2; No. 3 red, 73 1/2; No. 2 hard, 73 1/2@74 1/2; No. 3 hard, 73 1/2; No. 1 northern, 74 1/2@75 1/2; No. 2 northern, 74 1/2; No. 3 spring, 74 1/2.

Corn—No. 2, 43 1/2@44 1/2; No. 3, 43 1/2@44 1/2.

Oats—No. 2, 23 1/2; No. 3, 23 1/2.
