

MINING, BUSINESS AND STOCKS

COPPER CAMP IN BEAVER COUNTY

New One Ten Miles East of Pine Grove Receiving Some Attention.

WHAT J. F. YOUNGER SAYS

Has Opened Ledge Between Lime and Porphyry—Obtaining Good Assays.

A new copper camp in Beaver county may attract attention of the mining fraternity in the near future. It certainly will if the hopes of J. F. Younger are fully realized.

Mr. Younger has been prospecting in an unnamed mining district situated 25 miles south of Newhouse and about 10 miles east of Pine Grove, where he has located an attractive group of claims—in all upon which he has just completed this year's assessment work.

"My property is in the Blue Mountain," said Mr. Younger to the "News" today, "and I am confident that development work conducted along systematic lines will result in opening a good producing mine. The geological conditions are favorable, and all in all the situation is most promising. I have shafted a short 30 feet on a ledge, 4½ feet wide, lying between lime and porphyry, and have obtained assays ranging from 19.8 per cent copper. There is a heavy iron capping to it, and I am told that when the Horn Silver Mining company used to operate a smelter at Frisco, Mathew Culen supplied it with iron ore from this vicinity. The ore contains some silver, lead and gold, but with depth I am of the opinion copper will figure conspicuously."

Mr. Younger is endeavoring to get others interested in the district, men who are willing to spend some money in development.

ON MINING EXCHANGE.

Week Ends With Business Brisk—Closing Quotations.

The week closed with brisk trading on the mining exchange today with Stouk Consolidated, Seven Troughs, Iron Blossom and Victor Consolidated as the leaders.

Among the unlisted were: Ohio Copper at \$3.45; Cedar at 10½; and Mineral Flat at 15½, 16 and 17. The closing quotations and sales were:

SIOUX CON. CAN PAY DIVIDEND

Eureka Shareholders Anticipate Receiving Five Cents a Share In September.

ORE TO TINTIC SMELTER.

General Summary of News Happenings in Mines of Great Juan County Camp.

(Special to the "News.")

Eureka, Aug. 22.—It is believed here that the Sioux Consolidated company will post its initial dividend next month and that the amount will be 5 cents a share. Extraction of ore was resumed on Friday and from now on regular shipments will be in order.

The Crown Point mine is still in a state of idleness and no time has been set for a resumption of development work there. As soon as the new company takes over the property it will be placed in operation. It is believed attention will be paid to the Crown Point again.

The Tintic smelter received the following consignments of ore this week:

Cars.

*Beck Tunnel (Tintic) 8
*Swanson Con. (Tintic) 7
*Sutherland lease (Swanson) (Tintic) 2
Lower Mammoth (Tintic) 9
Grand Central (Tintic) 6
Horn Silver (Frisco) 6
Silver Shield (Bingham) 1
Argo (Rox City, Ida.) 1

Small 20-ton cars, all others being the regulation 50-ton carload lots.

VICTORIA STRIKE.

A strike of importance is reported to have been made on the 1,000 level in the Victoria mine. This mine is said to have been opened up a long time ago, before the property was closed down last fall, in a winze 100 feet above the 900 level.

The two shifts now engaged in sinking the shaft at the Godiva are making good headway, having reached a point about 75 feet below the 900, where a complete change in the formation of the rock has taken place. The bottom of the shaft is in a mineralized lime.

Lessers are developing a part of the Godiva workings, about six blocks of ground being under their handling.

GEMINI SHIPMENTS.

The Gemini will probably resume the shipment of ore about the first of next month, or as soon as the two new electric hoists are in position for use on the upper levels. The big pump is in operation, lifting water from the 1,600 level.

A small force is employed at the Opeax at Mammoth, and it is reported that the property will soon be put into production. This work has been held up for some time on account of some financial difficulties.

Work is progressing in a satisfactory manner on the Black Jack tunnel, which is being rapidly rushed through to completion. At the mouth of the tunnel a good sized ore body is being constructed, and material for which was moved from the old Star Con., now a part of the Black Jack holdings. A few hundred feet of side track will connect the one house with the new Eureka Hill railroad.

The Bullock company has purchased a new hoist, capable of development to 800 feet. It is the intention of the company to install a compressor and operating machine drills in its mind.

Sinking of the shaft on the East Con. Point commenced a few days ago.

The Iron King company is engaged in running a tunnel upon its East Tintic property, which is being directed in a westerly direction toward the shaft which it will intercept at a depth of 700 feet. The iron is to be nearly a mile in length and will only cut through the large iron deposits which the company is anxious to prospect, but will supply an outlet for ore. It is possible that the Iron King will be in the shipment of iron ore at an early date, and preparatory for this the Eureka Hill tunnel will put in a switch to the mouth of the tunnel.

The Eureka Hill mining company has a contract with the American Smelting & Refining company, which will furnish a market for a large tonnage of siliceous ore from that property. About 25 tons a day is now being shipped. The product comes from the surface of the Eureka Hill ground and the supply is almost inexhaustible. The rock carries values in silver and gold of from \$5 to \$10 per ton, but runs as high as \$50 per cent in silver.

These shifts are employed in sinking the Iron Blossom shaft, which has reached a depth of about 75 feet. Air for the machine drills comes from the big compressor at the Colorado mine. The new hoisting machinery is now in successful operation.

The Colorado Mining company has closed a deal which gives it possession of the property of the living Dutchman Mining company in this same capital stock of the Copper Jack has been increased to 1,000 shares. Flying Dutchman shareholders taking stock in the Copper Jack for their holdings. Work is to be resumed at the property immediately.
