A MILESTONE.

As the first big pattering drops that fall With a splash on the lattice pane,

Make us shiver and start as they warn

So it is with life, when we're growing old.

We shiver and start if the truth were told,

Like the first streaks the dawn doth bring;

As we do the first sundrops of spring;

And behold nature's first gray hair.

Has none of its brightness lost,

Youth's Rubicon has been crossed:

iray hairs may come when the beaming eye

Then with buoyant heart we would fair

yet the ivy-clad trees look young and green,

Though the sapless trunk may be there,

And raught of decay on our cheeks may be

lome early; come late, like a knock at th

and it joins with its silence the years tha

" OVID G. SPARKS,
"Ex-Mayor Macen, Ga."

WHAT CONGRESSMAN REED SAW IN HIS City patrons heave your address delivery wagon will call for them.

Hon. Thomas B. Reed has just re-urned to Portland after a trip to Utah, Alaska and various other places. In conversation with a Portland Press man the other day, Mr. Reed said; ". bave been visiting the United States. We had a trip of two months which could not be equalled anywhere else on the face of the earth. Yellowstone Park, the great Columbia River, Alaska, Salt Lake valley, the caffons of the Denver & Rio Grande, the Georgetown Loop on the Colorado BRANDS: Central and the mountain gorge and caecades near Colorado
Springs and Maultou form a
combination of strange and wonderful scenery, the like of which no
other country in the world can give.
When you and I were boys—only a
short time ago, you remember—the
geysers of Iceland were the wonders HIGH PATERT, of the universe, but the Great Geysers of Yellowstone Park make those of Iceland and all the rest of the world seem very small affairs, not worth a visit. Our geysers spout oftener, spout higher, and there are more of them than the geysers of any other country, which is very gratifying to the patri-

which is very gratifying to the patri As to Alaska and Utah, here are Mr. Reed's impressions: "We stopped at Wrangel to see the Indian village, and found it wet and nasty. At Sitka the Indian houses were larger, more cleanly, and gave evidences of the indian are also the whites. ivilizing example of the whites. At Juneau there is a thriving mining town, with sidewalks here and there emerging from the mud. Opposite, is Douglas Island, where is the Treadwell gold mine. The own-ers have erected a mill of 120 stamps ers have erected a mill of 120 stamps; the largest stamp mill in the United States and in the world. They have begun the work necessary to double the size of the mill. Beside the mineral resources of the country, which will soon be pretty thoroughly prospected, in the regions nearest the states, the salmon fisheries are utilized somewhat, and the possibilities of the deep sea fisheries are very great ized somewhat, and the possibilities of the deep sea fisheries are very great We did not yo within 1,000 or 1,500 miles of the Seal Islands. In fact, the great Alaska, itself sixteen times as big as the whole New England states, is beyond Sitka. People have very little idea of the size of our purchase. There is one river in it—the Yukon—which is no mean rival of the Mississippi. What the future of such a country will be no one can tell. We are farenough along, however, to see that enough along, however, to see that it was worth buying. I believe that our people will wring great wealth out of its varied resources. The

Indians there will work, do days' work at regular pay, and they show they appreciate civilized methods, for they have already organized one strike.

How to Save Garden Seeds.

Peas and beans should be left on the vines until the pods are well wrinkled, when they should be picked and spread until they are quite dry. Small quantities may be shelled by band, large crops are threshed with Keep them in a dry place. Meion, cucumber, squash and pump-kin seeds should be taken only from ripe, perfect shaped specimens. In a small way the seeds may be simply taken out, spread on plates or tins, and dried. Large quantities have to be washed before drying, to remove the slime that adheres to them. When the seeds are thoroughly dried, tie them in bags and keep in a dry place secure from mice and rats. Beets, parsnips, turnips, carrots, onions, cauliflower and cabbage will vield seed until the second year. Se out in early May, strong, well matured plants of last season's crop. When the seed is ripe, cut the stalks and put under cover to dry; then beat out the seeds, and tie in paper bags. Seeds of all kinds should be fully ripe when gathered, but it is also important to harvest them as soon as they are ripe. For keeping small quantities of seeds, paper bags are preferable to cloth, as they afford bet-

ter protection against moisture and insects. Always mark each package with the name of the seed contained in it, and the year in which it grew. Cold does not injure the vitality of seeds, but moisture is detrimental to all kinds .- American Agriculturist for

Force of Hubit. There is a journalist in the Listener's acquaintance who, on a recent after-noon when the Listener was in his company at his desk, began to whistle softly the Spanish air "La Paloma." His neighbor at the next desk, the Dining Editor, looked up from his novel and mechanically pulled out his watch. "There, I thought so!" said the Din-

ing Editor. "Thought what?" said the other "I thought you would whistle that tune as usual. Do you know that, for the last ten days, by actual observation, you have commesced whistling that tune at a quarter to four o'clock?"
"Nonsense! I don't remember whistling it here at all before." "Nevertheless, you have whistled it within five minutes of this hour every day, as I have taken occasion to note

and record by this series of marks." He showed nine hour and minute marks on the edge of the calendar hanging at the front of his desk—3:45, 3:47, 3:45," and so on—and added another.

The Listener did not doubt the story, for he had himself been convicted (though he is not a person of methodi-cal regularity of habits) of similar impulse .- Boston Transcript.

PERPLEXED.—Omaha Wife (reading)
—It is whispered that President Cleve-land will hold a champagne stag party at Oak View, soon, and that only cabinet officials will be his guests. What does that mean, dear?
Young Husband—Really I don't "It's very queer the papers should print things none can understand. 1".) "No, never mind. I remember now. A champagne stag is a champagne colored deer found in Virginia." NOTICE TO CREDITORS.

nindersigned. Administrator of the Estate of Bernet's Hir chmun, deceased, to the creditors of, and all persons having claims against the said coce sed, to exhibit them with the necessary vouchers, within ten months after the first publication of this notice to the said administrator, at No. 123 Fourth South Street, Sait Lake City, in the County of Sait Lake.
