

THE EVENING NEWS.

What We are and What We Eat.

The following interesting facts in regard to the composition of the human body and its food necessities...

The following is a summary statement of the principal materials of which the body is composed.

Flesh in the fresh state contains water, fat, albumen, and gelatin...

Blood is a composition similar in elements to that of flesh. Bone is composed of cartilage, gelatin, fat, and salts of lime...

Cartilage consists of chondrine, which is like gelatin in composition...

The brain is composed of water, albumen, fat, phosphoric acid, casein, and salts.

The liver consists of water, fat, albumen, phosphoric acid, and salts...

The lungs are formed of a substance resembling gelatin, albumen, a substance analogous to casein...

It consists of water, fat, resin, sugar, fatty acids, and salts...

Hence it is regulate that the body should be provided with salts of potash, soda, lime, magnesia, sulphur, iron, and manganese...

Thus flesh, or the muscular tissue of animals, contains precisely the elements which are required in our flesh-formers...

These elements are not only limited by quantity, but also by quality. The nitrogenous substances which are used as food...

It is a fact of great interest that in vegetables we have food for the animals. Thus in addition to water and salts...

Hence our appetites and the bountiful provision made for us in the vegetable and animal kingdoms...

Therefore we should be careful to select our food wisely, and to combine it in such a manner as to supply the body with all the elements...

During the process of life, the amount of vital action, as shown by the respiration and pulsation...
