always be so arranged as to leave the limbs freedomiof motion, and not to compress any part of the body.

X An infaut's clothing should be studiously adapted to the weather, avoiding at all times exposure to the effects of sudden changes in the temperature without proper covering; but nurseries and sleeping apartments should invariably be well ventilated.

XI. An infant should not be taken into the open air before the 15th day after birth, and then only in mild, fair weather.

XII. In is objectionable to have an infant sleep in the same bed either with its mother or nurse.

either with its mother or nurse. will. No mother should be to self to rising on its feet by climbing

on articles of furniture, or assisted by the arms of a careful attendant. Great care should be taken in the too early use of baby wagons, etc.
XVI. No triffing ailments in in-'ante, such as colice, frequent vom-iting, diarrh ca, coughs, etc , should be neglected—a physicirn's advice should be at once obtained. XV. In cases of suspected preg nancy, either of mother or nurse, the child should be weared at

XVI. A child ought to be vacci-nated after the fifth month, or earlier if small pox should be pre-valent.—Translation of D. C. Holli day, M. D., in N. Q. Medical Jour-

SCIENTIFIC AND USEFUL Use only good clean oak barrel; corn meat should not be frozen; a cool celiar is the best place to keep

A rifle barrel can be browned. lean it perfectly from greese; then apply several coats of strong solu-tion of muriate of iron, leaving each one to dry on. Then polish with a stiff brush and beeswax.

castile soap; dry the scalp well and then rub into it a little of the following mixture: A pint of water, two ounces of alcohol, one ounce of pure glycerine and a dram of tinc-ture of cantharides.

Mr. Grant Allen holds that the physical individuality or native character of each person is nothing but a sum of innumerable inherited tendencies combined in a peculia way, and he argues against Darwin's upposition of accidental or spon taneous variations of brain struct-

Make mucilage as follows: Mascerate 5 ounces of good glue finely broken in three half pints of water, melt in with gentle heat, and add 9 ounces of rock candy and 3 ounces of gum arabic. For labels brush it upon the paper when it is luke-warm. This is the same as that used for postage stamps.

According the Scientific American, the cable railway at the Gless bach in Switzerland is operated by water. On the arrival of a car at the upper station, it is weighed with a sufficient quantity of water from a reservoir, supplied by a spring, to draw up the other car; so that each car alternately acts as a motor at a very small coet.

Directions to clean trips. Ans.— First wash thoroughly in running water. Then make a weak lye with ashes or sal soda and wash several times in this and clear water after-nately until the odor is removed. Then boil until it is tender; chang-ing the water three times and keeping the water three times and keeping a few pieces of charcoal in the kett's. Then it is ready for socking Fo cook it, stew in milk, or fry it, dipping it in batter and using butter

world to foretell the weather by observing the common (American white pine (Pinus Strobus). If we are to expect rain or snow will in a reasonably short space of time, the branches of the hast two season's growth will be pendulous. If such weather be a long way off, the branches will be raised rather than

Streets, Opposite Assembly decoping.

Mr. Roat in has been expressing at considerable length and with characteristic plainness his views on girls and their relations to love and courtable. He starts with the impregnable position that there is nothing in this world more beautiful than a beautiful girl, and firm that is well-bred, kind or modest; all real deformity means want of manners or of heart; all real ngliness means some kind of hardness of heart or vulgarity of education.

the Pittsburg Commercial Gazette, are often mainly composed of hair that once pranced on the scarred flanks of a long-haired Texas steer. The hair, having been taken from the hides and thoroughly cleaned, is then mixed with enough wool of a low grade to enable the manufac-Lios Angeles, Cal.

turer to card it and work it into blankets and rough cloth. The Academy of Medicine in Paris has condensed into the following 16 propositions the most important hygienic rules for the care and man.

Diamkets and long the condense of the said, is very simple; when short hairs can be pulled out of an case of the Dassi Rash, consisting of Port. Angelica, Sherry, Zinfandel, Ratein and care and man. Grape Brandy, making in all 24 bottles (5 to the gallon) and delivered in Sals Lake,
