LOSSES IN MANY STOCKS.

Business on Wall Street Lighter Than for Weeks Past.

Movement is Far from Spirited-Live Stock Keeps in Good Demand - Produce Steady.

New York, April 25.-Wall Street:

Notwithstanding a rise in the price of Americans in London the opening here was very irregular and losses were shown by many of the international stocks. Sugar had a wide opening, selling from 1.00% down to 1.08% compared with 1.09% last night. There was a quick rally to above last night's close. Great Northern preferred lost 2. Sugar was the index stock which the fluctuations in the general list followed. A break to 1.08 after the first rally carried the market down again. A subsequent rally in sugar to the best induced covering all around, but the feverish tone of sugar unsettled the market again. Business was lighter than for weeks and was almost all in professional hands. Southern Pacific was forced down to 36%. An active demand subsequently developed, coincident with a rise in sugar to nearly 1.13. Some of the leading railroads recovered earlier losses, but the movement in this divis-

After touching 1154 sugar reacted 3, prices ran off a sharp fraction all around. The close was dull and easy, Bonds were quiet and irregular.

SUGAR. Sugar-Raw, steady; refined, quiet.

BOND SECURED ON THE LOUISE.

Oregon People Will Begin Operations on Willard Hill.

SOME RICH NEVADA MINES.

Glasgow & Western Exploration Co Has Them- Haverly Will Interest Eastern Capital in Beep Creek.

Word comes from Ogden that the property of the Louise Mining company on Willard Hill has been bonded for \$35,000. The parties who have secured the bond are Portland (Ore.) people who were represented by Mr. C. Schley in the bond and lease just drawn up. The stipulation states that the Oregon people shall employ 2 shifts a day, of not less than 3 men each, and that \$20,000 of the purchase price shall be paid within one year from May 1st, the date on which the new partles assume control.

The Louise is one of the best known properties on Willard Hill, and if the energetic development work is carried on which the contract calls for, there is no doubt that some interesting dis-closures will be made in the veins of ore already exposed,

FROM DEEP CREEK.

J. H. Haverly of New York Will

Shortly Begin Operations There. Within the next few days J. H. Haveriy will leave for his home in New York after spending 3 weeks in the Deep Creek country, with which he is very much pleased. Mr. Haverly haben connected with various Colorad Mr. Haverly has been connected with various Colorado camp such as Gilpin, Telluride and Crippie Creek. He has also visited Old Mexico, which he speaks of as a coun-try of marvelous possibilities. But Mr. Haverly has not seen any mining coun-try he likes better than Utah. try he likes better than Utah. He is very much enthused over the mineral wealth of Deep Creek, which he was led to inspect on the representations of J. B. Weimer, who has large holdings out there. He realizes that there are drawbacks to the country, but considers that all of them may be overcome by pluck and energy. If the railroad does not go through, Mr. Haveriy says no difficulty will be ex-perienced in getting capital to build a smelter, when once a more general showing is made in the district. So Impressed was he with the outlook that he secured a number of claims which he

ne secured a number of carms which he intends to develop on his return from New York in about 6 weeks,

Mr. Haverly was greatly taken up with the showing in Col. J. F. Woodman's properties in that district, where he said preparations for active work are now going on. A lot of good ore is be-ing sacked by the Young boys in Clifton district, where there is also a very fine vein of ore exposed in J. P. Gardner's property. In the Midas group some good ore is also being extracted.

AT DAWSON CITY.

Light Snow Fall Last Winter Will Cause Water Shortage.

A dispatch from Scattle, Wash, says that Arthur P. Curtis and two partners have just arrived at Victoria from Dawson, which point they left April 8th. They say water is running in all the creeks and will, owing to last winter's light snowfall, be exhausted before the cason's usual clean up is fairly com-

In consequence of the water shortage many claim owners are pumping from Bonanza, while the majority will make their washup by rockers instead of sluices. This will give employment at good wages for all the unemployed in Dawson until the lower river breaks and the exodus to Nome sets in.

and the exodus to Noine sets in.
Sulphur, Hunker and Dominion creeks are the new fortune holders this year, while Bonanza and Eldorado are as productive as ever, the dumps on 16 (Cook & Co.) and 17 (Berry Bros.) being the largest on record.

the largest on record. SOME NEVADA MINES.

The Glasgow & Western Exploration

Company Doing Good Work. Very little information is given out regarding the operations of the Glas-gow and Western Exploration Com-pany, whose offices are located in this city. For all that, however, under the direction of Manager Stallman the company is accomplishing some flattering results. It has not been published on the house tops that the company has marketed ore in this city carrying upwards of 1,500 ounces in silver. Neither has the management heralded the fact

that the product marketed every week in this city runs \$400 a ton and more. The company owns and is operating properties in Humboidt, Lander and White Pine counties, Nevada. The work at the Lander county mines is in the embersal attention and the supervision of the county makes the supervision of the control of the cont the embryotic stage yet, netwithstanding the fact that some very good ere is being shipped to the company's smelter at Golconda, Humboldt county. It b at Golconda, Humboldt county. It is in that county that a surprising record is being made, though in the White Pine county mines the company has done the most work. In the latter place the greatest depth attained is 700 feet, while in Humboldt county the deepest workings are 400 feet below the surface. The White Pine mines carry excellent silver and gold values, while the Lander and Humboldt properties run high in copper and silver and gold. Manager Stailman reports a very cheerful outlook at all the properties. The veins are becoming stronger with depth and it will not be long before the 100 ton smelter and 100 ton concentrating plant at Humboldt Company will be taxed to its utmost. The company has taxed to its utmost. The company has also a twenty-stamp concentrating plant at its White Pine county mines,

THE GREAT MAMMOTH. Great Future Predicted for This Arizona Producer.

The Big Bug district in Yavapal county, Arizona, is said to be very prosperous just now owing to the great success of its mines, notably the Great Mammoth, which is said to be operated entirely by tunnel, and thus effects a vast saving in expenses, as the tunnel does away with costly hoisting machin-ery, and at the same time affords vast toping space, which is so essential in conomical mining. This tunnel, now in 00 feet, runs longitudinally along the elo, and will eventually be extended 2,500 feet, to meet the Heicher's main

The Mining News says that the tunnel is being driven under con-tract for \$3.40 per foot, full working and height, and already gives up enormous amount of stoping ground.
Every ton of ore taken from it can be
removed without hoisting apparatus,
and at a minimum of cost. Thus far
the mining cost has not exceeded \$1 u ton and that of stoping 50 cents to the ton. Besides this, the ore can be concentrated. It goes one ton to three, by the way, at a cost of \$1 a ton, and the fron, sliver and copper it contains will practically pay smelling expenses.

practically pay smelting expenses.

Since April 1, the Great Mammoth has been leasing a 30-ton mill one mile from its property, and the concentrates here broduced are taken over good wagon roads to the smelters, one of which is three miles north and the other an equal distance south of the workings. By September 1, by a reciprocal arrangement with the Belcher, which expects by that date to have a 500-ton mill in operation, the Great Mammoth will be enabled to treat 50 tons daily at a cost of less than \$2.60 per ton.

of less than \$2.60 per ton.

Today, with the \$0-ton mill in operation, its daily net profits are from \$200 to \$250. In other words, the Great Mammoth is now a mine and no longer a prospect. Its owners have been conent thus far to devote all its earnings necessary development work, and take its place in the list of regular dividend payers. There is now a reserve of 5,000 tons of ore on the dump, and in the driving of the tunnel enough ore is being taken out daily to pay the extion to the Belcher vein, the company's supply of ore will be inexhaustible, conservatively estimated by Superin-tendent Rohpeter as \$2,500,000 in value.

Cheap Copper Production.

The famous Arizona copper mine, owned by W. A. Clark, under the style, United Verde Copper company, and this reputation is abundantly sustained by the figures published concern ing its operations last year. Its output was 43,290,590 pounds of blister copr. The receipts from copper are put \$5,775,621; this means an average of 13.3 cents per pound received for its copper during the year. The operating expenses of the mine are put down as \$2.660,346 with construction charges included, or \$1,953,236 otherwise. The gold and silver values obtained in the course of mining for copper amounted to \$598,-538, which can fairly be credited to operating expenses. Doing this and excluding construction expenditures from the operating expenses, we have a net cost of \$1,269,688, or three cents a pound. This is far away the lowest production cost in the world. Most of the Lake Su-perior costs, for example, are eight cents or therenbours.

The Newhouse Tunnel.

There is a well defined report from There is a weil defined report from Idaho Springs that the Newhouse tunnel has crossed the Gem extendon yeld on the western slope of Seaton mountain at a depth of 2,000 feet, says the Denver Post. The owners of this lode have sunk a shaft 600 feet and from the different workings about \$600,000 in precious metal has been extracted. Arangements are now helps made to prectous metal has been extracted. Arrangements are now being made to work it from the tunnel level by an upraise or back stoping, which will greatly facilitate its operation. It will be a cheaper form of mining and the ore can be shipped in tunnel cars to the mouth and thence by wagon to the mills near by of Clear creek. The tunnel is being driven at the rate of 200 feet per month. At the present rate the tunnel should have a length of two tunnel should have a length of two miles in the next seven months. This should take it into some of the Gilpin county gold veins which literally seam the hills over the divide. It will not only drain them to greater depths than for the eres to the banks of Clear creek. Mr. Newhouse undertook an enterprise which has appalled all previous projec-tors of tunnels from Clear creek into Gilpin. Many previous attempts have been made, only to die out for the want of courage and capital.

MINING NOTES.

The Carlsa of Tintic had 2 cars of ore on the market today.

The Conkin Sampler reported 10 cars of ore from Tintic today, The Grand Central of Tintic marketed 4 cars of ore today.

Charlie Spillman, editor of the Tintic Miner, was in town today. The Montezuma of Bingham had a car of ore on today's market.

The Swansea of Tintle had seven cars of ore on the market today. Three cars of ore were on the market

today from the Mammoth of Tintic. Two cars of ore were on the market today from the Horn Silver at Frisco. A car of ore was on the market to-day from the Nevada Mining company's property at Galent, Nevada.

Theh Taylor Brunton Sampler reported 8 cars of ore from Tintic, 2 from Frisco, I from Nevada and 1 from Bing-

W. W. Old is back from the Apex Copper mine near St. George and says that the main working shaft is being straightened and timbered. It is now down nearly 190 feet.

Vernal Express: It is reported that S. D. Colton & Co. have closed out their entire interest in the Bromide mine. Superintendent George B. Ernshaw of the Shawmut mine at Bingham ex-pected to leave today for Tuscarora, Nev., to start up the new mill at the Young America.

Pluis Pioneer: A most important strike was made in the Sevier vein on Gold Mountain during the week. Some time ago an underground survey and map of the workings was made, and it was thought that by cross-cuiting 50 feet the vein would be uncovered. This ******** Oregon Short Line Railroad.

street, (Postoffice corners,

ARE ALWAYS GOOD.

"The train is crowded with agreeable

surprises, but it is in the dining car that one is most impressed with the

Burlington's superiority. Now, with-out being too utterly dainty, I am ex-

out being too utterly dainty, I am exceedingly particular about my meals, and about the way they are served. For breakfast all I want is eggs, rolls, and coffee. In a Burlington dining car I am able to get just what I want, just what I would have at my own table, and for the small sum of fifty cents. The exquisite neatness of the napery makes a good meal taste all the better."—Interview with a Denver merchant.

Two trains a day from Denver to the

Two trains a day from Denver to the East—the Chicago Special at 9:00 a. m.; the Vestibuled Flyer at 10:00 p. m.—Omaha, Chicago, Kansas City, St. Louis. Through sleepers daily, Ogden to Chicago via Denver and the Burling-
