

UTAH LIGHT MAN IS IN TROUBLE.

Albert Hays, Inventor of the Petroleum Burner, Hit Hard In New York.

ARE MANY GRAVE CHARGES.

Came Into Prominence Some Years Ago When He Was Going to Make Several Salt Lakers Rich.

Albert Hays, the inventor of the petroleum burner which was purchased for \$50,000 by M. H. Walker, L. H. Farnsworth, W. A. Nelson, E. F. Colburn and Frank J. Cannon, is in trouble in New York. He has had on exhibition until recently a certain patent engine, some features of which grossly infringe on the exclusive rights and patents he sold to the local men. The New York authorities claim to have evidence that the man is everything he should not be, and has traveled under a half-dozen aliases.

"Investigation by the Herald discloses the astonishing fact that one of the associates of Paul Sheldon, the promoter, during the last two years, and one of the promoters of the General Hydrogen Engine company, has been an Australian convict, who as late as 1899 was wanted in Sydney for bigamy and forgery, having escaped from the jail there while awaiting trial.

"This remarkable character is Albert Hays, alias 'Augustus Howard,' alias 'Plunger Hill,' alias 'Plunger Howard,' alias 'Charles Vivian,' alias 'Dugger,' and other aliases. His criminal career is well known in San Francisco, Calif., and forms a part of the records of the police department there, where he was once prominent in racing circles and on the Oakland racetrack.

"Not only are Hays and his many aliases known to the San Francisco police, but his photograph and record are in the archives of all the police departments throughout Europe and in the rogues' gallery in this city and every prominent city in this man's photograph and record in each one of his agencies as a thief, forger and swindler.

"Without molestation thus far, because of his having escaped identification, perhaps, Hays, 'the man of many aliases,' has been a frequent visitor to the former law office, at No. 41 Wall street, of Paul Sheldon, and the latter, at Charles B. Gwynn, during the last six months. Hays made many trips to Washington, D. C., during this period, to obtain, he said, various patents on oil fuel motors and lamps.

"During the last four months Sheldon and Hays have been negotiating for the purchase of an engine having a patent of a company with Thomas R. Adams of the banking and brokerage firm of Henderson, Lindley & Co., at 100 Broadway, in which firm Mr. Adams partners are Francis Henderson, D. A. Lindley, Allen L. Lindley, James A. Jamney and Arthur W. Howe. Mr. Allen L. Lindley is the New York Stock Exchange member, who bought Hays' engine on Oct. 3, 1902. Mr. Adams told a Herald reporter that in these transactions he personally, and not his partners, is interested in Hays' patent engine and the matters of the International Crude Oil Engine company.

"Mr. Adams made the admission yesterday that he was aware of Hays' or 'Plunger Hill's' former criminal career, but seemed to believe that all said about Hays had been inspired by enemies. A reporter for the Herald visited Mr. Adams at his office and the latter yesterday handed him the photograph printed in the Herald this morning, and asked him if he knew whom it was.

"Yes, that's Hays," Mr. Adams replied after glancing at the photograph. "Are you acquainted with his record?" "Yes, I discussed that months ago," the banker replied. "I have gone into all that matter. All that you know is based on accounts brought about through a man who had transactions with Hays in San Francisco."

"But do you know that this man Hays' photograph, together with his record in this country and in Europe are a part of Pinkerton's record of criminals?" "Yes, I know," Mr. Adams replied after glancing at the photograph. "Are you acquainted with his record?" "Yes, I discussed that months ago," the banker replied. "I have gone into all that matter. All that you know is based on accounts brought about through a man who had transactions with Hays in San Francisco."

"I have known Sheldon ever since he was a clerk in the law office of Meyers & Anable. A friend of mine, a Mr. Jesup, got me to go to the house at No. 1,255 Broadway, where the Hydrogen engine company was exhibiting an engine. Jesup told me of the wonderful possibilities of the engine and said that all that was needed was somebody to lift it out of the financial mire it was in. Sheldon, William Lockhart, Hays, Augustus Becker and others who were behind the General Hydrogen Engine company were unable to raise sufficient funds.

"Sheldon told me how he had deceived women and men, and I finally agreed with him and Hays to purchase an interest, form a company and make the thing a success. I feel sorry for those women Sheldon got the money from, and if these articles in the Herald do not thwart my plans I'll

Woman's Nightmare

No woman's happiness can be complete without children; it is her nature to love and want them as much as it is to love the beautiful and pure. The critical ordeal through which the expectant mother must pass, however, is so fraught with dread, pain, suffering and danger, that the very thought of it fills her with apprehension and horror. There is no necessity for the reproduction of life to be either painful or dangerous. The use of Mother's Friend so prepares the system for the coming event that it is safely passed without any danger. This great and wonderful remedy is always applied externally, and has carried thousands of women through the trying crisis without suffering. Send for free book containing information of priceless value to all expectant mothers. The Bradford Regulator Co., Atlanta, Ga.

Mother's Friend

A good many of the millions who eat "FORCE" every day, began because a perfect food appealed to their reason.

But most of them eat "FORCE" now just because it's good and they like it.

Sunny Jim

I heard a lot of people say they were tired of hearing about the "FORCE" and they were tired of the difference.

get the whole thing on its feet, and Sheldon will be able to pay back the women, as I want to see him do. The International Crude Oil Engine company is only tentatively formed now.

HAYS EMPLOYED ON SALARY.

"The engine exhibited in the basement at 1,255 Broadway," Mr. Adams continued, "was purchased from the Manhattan Transit company, and to that engine Hays, who is a wonderful inventor, attached his own patented principles. We moved that Hydrogen engine over to Astoria and there we have built our own engine under the supervision of Hays, who is still employed on a salary."

"Where does Mr. Hays, or Howard live?" "Well, I can't say exactly," Mr. Adams replied hesitatingly. "I think he is now living in the country with his family for the summer."

"Mr. Hays lives at 10 West Ninety-sixth street, or did until yesterday afternoon. Subpoena servers were then searching for him to obtain his presence at the district attorney's office to tell what he knew about Paul Sheldon. It was said that Asst. Dist. Attorney Rand had begun work of examining into the sky rocket career of the missing lawyer-promoter."

"Willard R. Green of Denver, Colo., was in San Francisco, Calif., in 1899. He had his attention called to a 'remarkable' engine that was then, as the Hydrogen engine was last summer, being exhibited in a basement. Mr. Green was struck with the remarkable power of the motor and the cheapness with which it was operated. Hays, as 'Augustus Howard,' as the Englishman and patentee was then known, finally got Mr. Green interested to such an extent that he advanced Howard," he says, about \$100,000.

"Willard R. Green, who is now in this city and is stopping at a hotel, said: 'When seen by a Herald reporter, said:

"I am surprised that Hays or Howard is in this city. I knew the man in San Francisco, and he was a very clever fellow. I went to see an engine he was exhibiting and advanced him money. I had expert engineers and mechanics examining his motor, and by both means, I was convinced that it was a very clever invention. Through an accident it was found that the motor was a fraud. This discovery was made one day while Howard was away from the place. The motor was found to be filled into a cylinder by a secret and hidden process, and the oil that we thought was only a lubricant was a fuel oil, which was used for the tremendous power of the motor."

HAYS AUSTRALIAN RECORD.

"On complaint of Mr. Green, Chief of Police, Sydney, to see if the police of that city could identify it. The photograph was identified as that of Joseph Doyle, alias Godfrey, alias Mason, alias Bowler, alias Smith, alias Sims. This was the record sent to Chief of Police Lee:

"Hays, or Howard, or Doyle, was convicted in Sydney on July 20, 1888, on charges of stealing. He was sentenced to five months at hard labor."

"He was convicted of forgery, uttering and false pretenses on Jan. 3, 1888, and sentenced to five years penal servitude. This sentence was later reduced to three years."

"Again Doyle was convicted on four charges of false pretense and sentenced to five years' penal servitude on April 12, 1888. He was discharged on remission in 1890, and was rearrested in June, 1891, on charges of bigamy and forgery."

"While Doyle, whatever Hays' right name may be, was awaiting trial on these latter charges the prisoner escaped from jail and was not recaptured."

"Hays now wears spectacles and his face is smooth shaven. He is living with his cordwife and his two daughters, Eva, 17 years old, and Dorcas, 15 years old. The wife and child frequently visited the basement of 1,255 Broadway when Hays' Hydrogen engine was on exhibition three months last summer. This was while Mr. D. R. Adams & Co. bankers, were advertising the General Hydrogen Engine company's stock for sale at 50 cents per share. The Knapp banking house has passed out of existence and Mr. Knapp, Jr., after a few months' clerkship, has gone back to the financial district."

Mouth Disease Decree Cancelled.

New York, May 2.—In view of the official report just made that the foot and mouth disease has disappeared in New England, the government has rescinded, says a Herald dispatch from Buenos Ayres, Argentina, to cancel the decree prohibiting the importation of cattle from Maine, New Hampshire, Vermont, Massachusetts, Connecticut and Rhode Island.

"The critical ordeal through which the expectant mother must pass, however, is so fraught with dread, pain, suffering and danger, that the very thought of it fills her with apprehension and horror. There is no necessity for the reproduction of life to be either painful or dangerous. The use of Mother's Friend so prepares the system for the coming event that it is safely passed without any danger. Y. M. C. A. LAYS CORNER STONE.

Important Ceremony in Connection With New Building Occurred Yesterday Afternoon.

RAIN MARRED THE PROCEEDINGS

Enthusiastic Meeting Held in The Salt Lake Theater—Music and Eloquent Addresses.

The corner stone of the new Y. M. C. A. building was laid yesterday afternoon, but the rain necessitated a reversal of the order of procedure, so that the Theater exercises came first and the stone was laid afterwards. The floor and first gallery were well filled by citizens interested in the growth and development of the association, and the keenest interest was shown in the proceedings. The program opened with selections from Hays' hand, which then withdrew, and the seats on the platform were filled by President Frank Stephens, Hon. C. E. Allen, Secretary O. L. Cox, Dr. E. V. Silver, Rev. Dr. R. J. Cook of Chattanooga, Tenn., who offered the opening prayer, Rev. E. I. Goshen, Justice Hays of the supreme court, Major R. W. Young, President Kingsbury of the state university, W. H. Tibbals, Very Rev. Dean Eddie, City Editor Hanson of the "News," directors, charter members of the association and prominent citizens specially interested in the work. Soprano solos were sung by Mrs. Plummer and Miss Berkhold, Esq. Congressmen Allen was the chairman, who had presided 14 years previous at the first meeting which led to the organization of the association. President Frank Stephens, Secretary O. L. Cox and Secretary Rev. E. I. Goshen made the addresses of the afternoon, and were very well received. Mr. Stephens apologized for the absence of Hon. Frank Pierce, who was to have been present, but was called away several hundred miles distant on special business. Mr. Stephens made the president's address, which was as follows:

PRESIDENT STEPHENS.

"The Young Men's Christian association is an institution for the whole people; it knows no creed, no sect, its aim is the development of a nobler type of manhood, Christian manhood, and by Christian manhood we do not mean the manhood of men who belong to any particular church, or who profess any particular faith, but we mean a more important purpose is to encourage any young men to ally themselves with some organization, whether it be a church, or a club, or a higher and nobler type of Christian manhood, we mean that manliness and nobility of character which can only come from an earnest effort upon the footsteps of the great Way Shower."

"Nineteen hundred years ago there came one whose life has ever since been the guide to right living. His cross was the central figure in history, and while avarice, injustice and sin of all kind have continued to exist, since as before the time of our Savior, yet from that central figure the purest and most perfect have come. He came to a world filled with suffering and sin, strife and warfare; but the blind saw, the deaf heard, the lame walked, and the feeble moved. He pointed out the way whereby man may attain toward spiritual, intellectual and physical perfection. Sometimes he followed in His footsteps perfect manhood will be attained. Realizing that the young man who strives toward spiritual, intellectual and physical perfection is always a better citizen, a greater power for good in the community, the Young Men's Christian association of the world over has adopted a three-fold work. Our emblem is the triangle, the strongest combination known to mechanical construction."

"First and foremost, in common with the churches of the community, but without adopting the creed of any church, it asks its members to follow the spiritual nature, to follow those high aspirations toward purity and goodness without which no man can ever hope to advance. It devotes special attention to enabling young men who are not able to take a college course or attend a regular scientific school, to obtain scientific and general intellectual instruction."

"Third, realizing that a weak and sickly man, no matter how well endowed physically, can never attain success, it institutes the gymnasium, the swimming pool, the hand ball court and other many sports, and encourages and aids toward physical perfection, thus building up as nearly as possible the harmonious, perfect man."

"We supplement the work of the church. We do not minimize to the slightest extent the magnificent scope of the power and influence for good of the churches of every community, except for the fact that the Young Men's Christian association would never have been possible; in them it had its origin; they meet the varying spiritual needs of the members of the several organizations; each does its own work in its own way. They have their differences, the discussion of which undoubtedly contributed to the whole to a higher conception on the part of all, a real spiritual truth, but here, within these walls, the representatives of all churches and those who believe in no church meet upon the broad platform of Christian manhood. We unite in simply following the teaching of the great Nazarene."

"No polemical discussion is desired or permitted. We expect our young men to be too busy in character building and in being helpful to their fellows, to have any time for the discussion of religious differences."

"It is a beautiful picture in Grecian story that there was a small island, the Island of Delos, dedicated to the gods sacred from war, from the shore of which the hostile armies of all nations laid down their arms and met to unite in common worship. There all united in a common aspiration for higher and better things."

"To such high purpose we this day dedicate this building and I firmly believe that particularly in this community the influence which will go out from these portals will work wonderfully to harmonize our people. We dedicate this building to peace and love."

"Coldridge, a poet of whom Charles Sumner said: 'His few verses will bear him in his immortal flight on unflattering wings,' has given expression to this sentiment in words of uncommon pathos and power by saying: 'He prayeth well who loveth well, All things, both great and small; He prayeth best who loveth best, Both man and bird and beast. For the dear God who loveth us, He made and loveth all.'

"And now, friends, brothers of all

churches and all creeds, age, friends and brothers of no church and no creed, as we lay this cornerstone let us unite in one common prayer that: 'Within these walls may the spirit of the fatherhood of God and the brotherhood of man prevail, and from these doors may there go forth from generous, noble, manly young men, united in a common effort to hasten the day when the voice of all humanity shall swell the grand chorus that Christ is Lord of all.'

SECRETARY COX.

Secretary Cox detailed the policies of the association in which he made the point that the object of the association was formative rather than reformatory. That is, the idea is to mold the boys and young men while in the character formation age, and so mould their characters that they will be most likely to grow up good and true citizens. Mr. Cox spoke extensively of the preparations made to interest the boys, especially in the line of gymnastic apparatus, and the scheme of night schools where as many as possible of the host of young men who could not avail themselves of the benefits of a higher educational training, might be given a working knowledge of the higher lines of study. Mr. Cox's effort was a manly one, and he showed himself to be a young man of remarkable force of character.

REV. E. I. GOSHEN.

Rev. E. I. Goshen of the First Congregational church made a most excellent and eloquent address, which brought forth applause several times. He set forth the fact of every age having its separate problems, and the present age is no exception. This is an age of marked activity and unrest, when long established methods of life are passing away. Consequently, the young men of today need a different equipment with which to go forth to fight the battles of life. The ancient languages must give way to science, mathematics and manual training, and in this connection, the Young Men's Christian association is doing a great work. The speaker made particular reference to the growth of the cities which indicated that the city rather than the rural regions would shortly dominate the affairs of the nation. Salt Lake already furnishes 45 per cent of the pupils in the schools, 29 per cent of the inmates of the Reform school and 30 per cent of the prisoners in the state prison. The fact was alluded to that the attractions of the saloons were more than a bare hall bed room and the young men loitering out in town needed some place to spend their spare time.

Y. M. C. A. HISTORY.

President Stephens then said that the exercises attendant on the laying of the corner stone would be held in the Theater, and then an adjournment would be taken to the new building, for the actual laying of the stone. He gave a detailed history of the association and its efforts to secure a foothold, and the somewhat dramatic uncertainties attending the offer of Mr. Peabody and the raising of the \$25,000 upon which the building was to be erected. Mr. W. W. Chisholm came to the rescue of the association in its struggles of a few years ago, and the often unpropitious outlook so that it was finally rescued by Secretary Stephens and Mr. Shelp's efforts were detailed, also the fact of Harry Lennon, aged 10, being the first on deck when a cyclone was the first contribution to the building fund.

CORNER STONE LAID.

The rain had now ceased, and the audience adjourned to the new building across the street where the corner stone was laid. President Frank Stephens placed the various documents in the box as their first contribution to the building fund, and then Mr. Stephens laid the first trowel of mortar. The contractors did the rest and the great stone, weighing 3,000 pounds was set in place by Dean Eddie made the concluding prayer.

THE COUNTY'S CASH.

Treasurer's Report Shows a Decrease On Hand as Compared With March.

The report of County Treasurer Carlis for the month of April shows a decrease in the balance on hand at the close of the month as compared to the previous month. The balance on hand on April 1 was \$51,824.43 and the receipts for the month were \$23,241.32, making a total on hand of \$75,065.75. The disbursements for the month amounted to \$17,430.31, leaving a balance on hand on April 30 of \$57,635.44, which was an increase of \$12,569.69 over the balance on hand at the beginning of the month. The various funds of the county as follows: General expense fund, \$21,627.55; State school fund, \$2,249.67; County school fund, \$5,721.61; Bond interest fund, \$125.00; Tax sales redemption fund, \$2,750.00; State witness and juror fund, \$18.19.

Total, \$57,635.44.

COUNTY SCHOOLS.

Commencement Exercises Will Be Held On Friday, May 27.

The Salt Lake county school principals, at their meeting Saturday afternoon in Supt. Ashton's office, decided to hold commencement exercises in the county schools on Friday, May 27, instead of May 30, as previously arranged. The final examinations will be held on Wednesday and Thursday, May 18 and 19, and will be conducted in three divisions, one each at Bingham, Sandy and Murray. The principals reported good progress in preparatory material for Salt Lake county's educational exhibit at St. Louis.

CARTER'S LITTLE IVER PILLS

SICK HEADACHE

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Heartly Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.

TORPEDO DEFENSE OF A JAPANESE BATTLESHIP.

One of the methods of defending a battleship from torpedo attack is the swinging of nets all about the sides of the vessel. The torpedo is so constructed that its nose must strike a hard substance to set off the explosive charge. A net hung a sufficient distance from the ship's hull would thus prevent danger. To be of effect it is necessary that these nets be let down quickly. The accompanying cut shows a Japanese crew practicing this form of defense.

KILL THE SERPENT

The worst disease the world has ever known, and the greatest scourge to the human race, is Contagious Blood Poison. One drop of the virus of this most horrible of all diseases will pollute and vitiate the purest, healthiest blood, and within a short time after the first little sore appears the system is filled with the awful poison and the skin breaks out in a red rash; the glands of the groins swell, the throat and mouth become ulcerated, the hair and eyebrows drop out, and often the entire surface of the body is covered with copper-colored spots and sickening sores and eruptions. Contagious Blood Poison is as treacherous and elusive as the serpent. You may be carrying it in your veins with no visible evidences of its existence; for while mercury and potash seem to cure and all external signs disappear, the disease is doing its destructive work within, or the patient is constantly harassed by returning symptoms and unmistakable traces of the blood poison. Thousands of physical wrecks and chronic invalids from the effects of Blood Poison know the uncertainty of the mercury and potash treatment—that it stifles but does not kill the serpent. As long as there is life in the serpent there is danger in its fangs; and while your blood is tainted there is danger of infection. Safety lies only in crushing out the life of the loathsome disease and killing the serpent. For many years S. S. S. has been known as an antidote for Blood Poison. It is a remedy composed entirely of vegetable ingredients, and we offer \$1,000 for proof that it contains the least particle of mercury, potash or other mineral. It thoroughly purifies the blood, improves the appetite and digestion, and tones up all parts of the system. In chronic and long-standing cases of Blood Poison, S. S. S. acts promptly and without leaving any bad after-effects.

Write us about your case, and our physicians will advise without charge, and we will mail you free our home-treatment book telling all about Contagious Blood Poison and its different stages and symptoms.
