Residents on the Canyon road are complaining that for the last few weeks the water supply is cut off for hours at a stretch almost every day. They believe that is is caused by They one turning down valves along that part of the pipe system. Superintendent Hines explained that the trou-ble lies in the fact that whenever the draft is large during the late summ and the presure goes below sixty pounds, it is impossible to supply Canyon road, as the outlet for this section is below the other lines. This state of affairs has existed for ten years and Mr. Hines says that the remedy for it was to lay about 900 feet of pipe to connect the Canyon road and First North street pipes, now a part of middle system, with the upper sys-tem. On Eighth East street, where the higher part of the middle system also at the highest level, the same evil exists.
