THE BRITISH IS INDIA.

The news from British India, bri-The newer from British Landa, Arter though its, table a story of antine a serious opticing to that part of the great empire. Night after night this British garrien as Camp Maiskand is explect to the force attacts of irrhements, which are said to number at least 6,000. The British (Blues are basically 6,000. The British are at a section sindvantage is very cises from the fact that although they are able to regular the two particles are the section of the particles and the particles of the particles are being in the british of course characteristics. This of course characteristics by a realisation that the British solders caused pureous the British (Blues are cheered and the British (Blues are a supported by a realisation.) The British (Blues are a supported than the manifest in the same of the great and the training and the great than the markee and on. The British great the British with the great and the training and the great than the markee and on. The British great the British with the great and the support of the support of the British and the support of th

LABORERS PROVIDED FOR

The measures emethed in Germany for the termine of the horizong classes and the results articles of the horizong classes and the results articles of the consideration. One of these measures compels working of their services to the control of their services to the needs of the should be devoted to the needs of the should be added by the given and the amount handled by the given the amount first increase. The invarial and accident inner the city age than all the second of the devoted from it is control to in milition.

A recent rep in by the chief of the department in which incurrance lies the first the termine the control of the department in which the control of the department in which incurrance lies for the department of the department

THE WORLD AS A GLOBE.

In posterisy's Niew appeared at etticle explanatory of an our theory newly advanced, repreding the forma-tion of the earth. Wattle such sub-jects may be engaged in occasionally for the asine reason that many about

sion of the earth, While such subjects may be ungaged in oursewording jets that he was a subject to the same reason that many after theories are given consideration as a lime—in-minist relaxation—it as not at all printance to wase to much attachm upon them. The chapts, the outlier, the purpless, discretification, the purpless, discretification at least the more mently external of the unprocessing prints discretified in the constant prints of the diplete as which we live have long there a part of the dipped of the d

these why live hear the cenar and make while like yelsetved at times whether noting or not the incoming and outpoing out wessles. If the downrine, or rather shlory ourself, of the "Richeshnary" were true as even founded on fast, the vessle contant in the dim distance was apech on the while of weeks that acceptant the while of weeks that acceptant the while others and a previous times we are the weeks of the weeks of the weeks of the well oppear. It would then as an all previous times be a phenomenon "in the altogether" and would develop is the same way; but even those who have not been favored with the velocity of the designification and would develop is the same way; but even those who have not been favored with the velocity of the fail of the fail of the same way; but the favored with the velocity of the tallog at all. The first present of the other and the design of the fail of the same way; and a the sing gets market and nearter to the shore outh the design the containt breaks upon the whom. The same thing occurs in swarps order with a vessel going out. No amount of the rimined autrance of the earth fatter that weeks upon the whom. The same thing course in swarps order with a vessel going out. No amount of the rimined autrance of the earth fatter while years to show the water and incoming for this weeks day and almost very hear proceeding than that of the rimined autrance of the earth fatter with a vessel going out, when earth fatter we have the same of the rimined autrance of the cardinal could be that direction.

Another sharple, comment thing showing mountainty it to shape of the

tesh in thair direction.

Another simple, common thing showing associatively the shape of the stank is the frequently fluidistated difference between a curve such a straight line as shown by jung squeducts built above the ground. The water on the surface of the globe saturally shapes itself to the spicel wishoft in envelope, and when conveyed for some distance by the means indicated, the conduct must be raised in its middle part to an extent our responsing with the scatter globular shape, for such a distance, in a circumference computed at so much

the middle part to an extent corresponding with the earth's glasular share, for such a distance, in a glasular share, for such a distance, in a glasular share, for such a distance, in a circumference computed at so much less than the equatorial of count stence as the point happens to the treat the apparatr, otherwise, the water will overflow at such middle portion of the distance. Can this be accounted for by easy other passible means to be a such production of the same of the same of the same of the same at valuations and atmost for distance and in the same attracts when the same attracts when a since the contract without the same attract, whereas we all three they were not. The beautiful entry they were not. The beautiful entry they were not. The beautiful entry they were not a found then, not only as to the event in wire but the time, places and contractacistic were determined with (the most carring accuracy, that as all atter celestral events accurating at recovering within our central species and contactacistic were determined with (the most carring leadings, the same of waters accurating the contractacistic were determined with (the most carring leadings) in the contractacistic were determined with (the most carring leadings) in the contract of the passes and contracts carried when a contract of the passes and of some three days of the passes and of the contracts of the passes and its contracts of the passes and of the contract of the passes and of the contracts of the passes and of the contracts of the passes and of the contract of the c

ply to have we do not understand the adorpted rates attaining in the laws we do uncertained. One of the mansales that came addition to the leave me in laws I, that emblishes and accounted things must not be destroyed without a bettiming a peculiarly should. It is inflicult to see where he is to be the first to the inflicult to see where he is my now the first to the inflicult to see where he is present obtaining among the evidence and among the evidence of the set of them, invavigation, and is real the less fitting, invavigation, and is real the less fitting, invavigation, and is which is directly in one of it with those things which is directly in one of it with those which is directly in one of it with the shift of the property of the sales of the first and to real the calm of their feely lies emport upon an experiment which may have been and downloss was it constructed and worked out by incompetent hands. It takes men with a veak invasiful of capteriorism and a wealth of experience he salest them and on the control of the salest them and in the salest and other seculi workings. The epitit lives, for inclusion, lead us on the part of the salest and other seculi workings. The epitit lives, for inclusion, leading to the first and it would in meny cases be by the single epited of the salest the sa

THE FACE that in India the fan has been fell howlest where British efficials have the most o nice control is significant in the flaunce for a hely war against fleitish in India.

uncle of President McKinley wanted the 1sb, and got it.

BOATING IN the street seems to be a popular thing in several New Jersey towns just now. But it is not choice—it is a necessity of the "gentie" calori showers that have prevailed in that locality the past work.
