NORTHERN LIGHT ADVANCES

Slight Weakening in Daly and Star Consolidated—Gratifying Demand for Omaha.

With a new blackboard before them, the members of the Salt Lake stock and mining exchange got together this morning and transacted a good volume of business, the bulk of which, however, related to listed stocks which sold freely at fairly satisfactory figures. The sales reached a total of 35,000 shares for the sum of $19,756.25, and the call closed with the market in passable condition, ordinary fluctuations back were being recorded.

After both the bullionists and did business at 75 cents, after which Copper sold for 66 and Daly fell to $1.35, closing sales being made at this figure. Dexter remained firm and succeeded to $2.44½, while Dalton and Lark were taken at 20 cents and Eagle found buyers at 1½, at which figure there was a good demand for the stock. Four Aces made slight advances and sold up to 37½ and Geyser-Marion continued active with a good amount of business between 79 and 81 cents. There was a sale of Lower Mammoth at 69 cents, while Mercur changed hands at $6.60 and Northern Light sold freely between 66 and 68 cents. Star Consolidated remained weak and posted transfers down to $1.10, the sale being for future delivery.

Dealing with stocks salient, Boston De La Mar was taken at 1½ and Joe Bowers at 16 cents. Bonanza Extension continued on the old round and there was a sale of 5,000 shares was taken hold of and handled at 19 and 16, only to be followed by business in Bullwhacker between 12 and 14 and in Yales at $1.25. The last seller was West Mountain Placer, which found a taker at 80 cents and was afterwards offered at 87 cents.

The closing figures were as follows:

STOCK MARKET ACROSS THE POND.

London Suffers from Attack of Financial Indigestion.

SPANISH RUBBISH IN PARIS.

Hints of Wars Cause Speculators to Proceed With Extreme Caution Scramble for Credits.

CAGO@bull tim-e ebbs ore HI

New York, March 13.—The Times' London financial correspondent cables: The past week has been an unsatisfactory one. Money has grown less abundant and the bank of England has again lost some gold, while all the fresh arrivals of the precious metals have been bought for Germany. The whole has ruined speculators to buy back and to fear the first eighthly stock exchange settlements. Consequently dealings have been limited and the movements of prices speedily. We have got over that account all right. There has been a scramble for credits and discount houses in particular have been driven to the bank of England for large amounts to supply the place of money taken from them to carry stock exchange accounts. But the rate charged there has been only three per cent and no shocks arising, have been easily buyers again but for politics and the chronic apprehension of bullion.

China is again hastening, or rather Russia is China, and it is astonishing how heavy the loads of apprehension for a rise become the moment a hint of war reaches them.

As regards the deficit in the budget, I estimate it at £4,000,000 at the very least and enterprise and speculation of all kinds will, I fear, be more or less checked until we see where the government is going to find money. My feeling is that we will go to the country this year and suspend the redemption of our national debt to whatever extent may be necessary. But one can only be sure and therefore, we expect trouble and sensitive markets here for some weeks to come.

Here bank figures do not indicate a situation materially different from that of last year, but the money market has a great deal more to carry and moreover, the continental markets are all the more heavily burdened.

Paris is exciting business with the Spanish rubbish heaps, but the success purchased at an exhausting price and an added drain/ess of money at each conversation. Some settlement one day near the inevitable fray.

For such reasons as these and because the political position of the unsteady empire of price is always giving rise to anxiety, I am disposed to think you must not count on us just as at great loaves of your securities. Our disposition was to buy on every favorable and until your own market flattened before the dearer money. Perhaps if you did not sell us any more we might soon call for shipments of gold to New York and kept your stock market on the upgrade for a time. But after all, it comes to us might begin to make again. At present we rather expect to be forced to support and what we have to. Also we look anxiously on your great industrial and railroad securities, both of which are quoted. The copper combination has been believed in here, but it is to be seen if excessive prices, a new chance to float of more dubious copper properties.

The only serious danger is that we are little out of heart and infected with financial pessimism. The professional element in Throgmorton street still sees ahead no fun in January and how groan under such a load of securities as we have acquired, although they have got a good many of them—but of home industrial shares and mines and not of such American railway securities. So much is the case that banks such the out outside have resulted since the new year are still in great part unsold. The investing public cannot afford to buy them but the speculator either.

DISCOVERY ON THE SAN RAFAEL.

Price Men Locate a Valuable Claim in That Section.

ORE READY FOR SHIPMENT.

Mercur Profits for February—The Mines of Stockton—Rich Strike in the Dyer.

The riches of the San Rafael in Emery county are gradually coming to the front and before long that section will doubtless furnish some of the big mines of the State. The News' correspondent at Price reports the latest discovery in that locality, the news being made by a party of Price men and consisting of the location of a valuable claim containing gold, silver and copper, and showing fifteen feet wide of ore valued at $30 per ton now in sight and ready for shipment. The claim is evidently a bonanza and will be thoroughly developed by the discoverers. It is in the southern section of country that Moyes, Le Fevre, Allison and associates have located the Copper Globe, a proposition from which they expect to reap a harvest, and how also where considerable prospecting is being done, all with very satisfactory results.

Mercur Profits for February.

A Mercur director is authority for the statement that last month the mine yielded a profit of $40,000, despite the fact that operations were at a standstill for five days owing to the severe weather. At present everything is said to be tied up in the district on account of the late storm, so that there is no telling what the results will be for the month now speeding along. With profits of $40,000 a month, the Mercur mine ought to reward its owners very shortly.

THE MINES OF STOCKTON.

Bunker Hill and Other Properties Reported in Splendid Shape.

Frank Nelson and Victor F. Wells spent Saturday in examination of the Bunker Hill mine at Stockton. They report the property looking well and say that sinking is now the order the miners going down on the ore body. The lowest level now being operated and as an oil producer, the group having shipped in the neighborhood of 600 tons or so, all of which averaged 14 per cent lead and 17 ounces silver, together with small values in gold. Over 1,000 feet of work has been done on the property and it is fully equipped for the making of shipments once the roads begin to be passable. The mine has three-fourths of a mile from the town of Stockton and is 2½ miles by wagon road from the railroad. It is expected to have it on the shipping list again in something like two months.

Messrs. Wilson and Wells were much pleased with conditions at Stockton, where, at present, there are 200 inhabitants and upwards of 75 men working in the mines, the principal being Bunker Hill and Gabon King. The latter is in splendid shape and making regular shipments of ore, while those of others are producing a high-grade of ore in sufficient quantities to keep a line of teams busy between Stockton from the mines to the railroad.

Rich Strike in the Dyer.

Superintendent Poor has completed the uncovering of a large bed of ore in the Uintah summit company's mine, 14 feet have been sunk in such direction for the ore bed, and the vein holds good for the whole distance. It is composed of lead carbonate bearing 21 per cent lead, 3.33 copper and 42 ounces gold. The composition of the vein being soft will permit of cheap labor to mine and is about six feet in depth, being the most convenient depth to work. Work behind the bed of the biggest strike that the Dyer has ever known.—Vernal Express.

KLONDIKE INCORPORATED.

New Company to Develop Thistle Mines—Superior Contract.

Special Correspondence.

Provo, March 11.—The Klondike Mining and Milling company has been incorporated with the consent of more than the requisite stock. The object of the incorporation is to conduct a general mining and milling business. Provo City is named as the principal place of business. The capital stock is $1,000,000, divided into 1,000,000 shares of the par value of $1 each. The officers are: President, Joseph Bullock; vice president, J. H. Holdaway; secretary and treasurer, Edward H. Bell; secretary and treasurer pro tem, Joseph Bullock; John F. Holdaway, Walter Hooper and Isaac Biddle, form the board of directors.

The company has secured a bond from the Thistle mine, the company has entered into a contract for the erection of a building on its property and has secured a force of half a dozen men to commence work on the Thistle district, and for erection of shaft. A contract was also entered into for a C. F. Nelson of the four claims owned by the company will also be made at an early date.

The following locations of mining claims have been filed in the Provo district, by Mr. W. D. Hoyes of the Black Rock, in Spanish Fork canyon: John Gurney et al, Rip Rider No. 2, 4 and 5. In Santaquin district, by A. O. Jacobsen et al, Gold Bug, Silver Springs in the southern part of Utah county, by Jas. Bowman.

The Value All Right.

The Yales is all right. Notwithstanding the fact that little talk is being made regarding the property, the stockholders seem not worry as to the final outcome, for beyond any question the Yales is a mine. The ore body with from the lowest level stringers of high grade copper ore have been uncovered, and the ore body as a whole is heavily copper stained. It has been demonstrated that more than one mine can be worked through this property and as a matter of a short time before new bodies of rich ore will be opened up. The Yales is one of the best properties ever did, and it is safe to say that it will go forward with every shaft—Park Record.

Business Development.

Work on the Bonanza group of claims belonging to the Richfield Copper Mining company will begin tomorrow morning, the local officials of the company going out to Bingham to see that things are properly attended to. It is proposed to sink a shaft on the property and in the way get into the ore bodies.

MINES AND MINING MEN.

During the summer business will is to be erected on the Green mine in the West Mountain district.

George Dern went out to Bingham this morning to look after the affairs of the Mercur and Geyser-Marion properties.

The last shipment of ore from the Utah mine at Five Springs showed values of 35 per cent lead and $36 ounces silver to the ton.

Not to be outdone by its neighbor across the way, the Utah Silver and Stock Exchange will have a suite of daily beautiful—me at 5:30 a. m. and the other at 7:30.

It is said that the new owners of the old Jordan, 103 Telegraph and Snippets will erect a mammoth smelter. At the treatment of the ores coming from those properties.

The Bingham Bulletin says it is reported that the Midland group has passed to the control of Mark Hopkins, the well known Coalville business man. Also, that that gentleman has become interested in the Silver Shield and the coming property at mouth of Cottonwood.

The Mercur Consolidated has been incorporated with a capital stock of $20,000 in ten-cent shares. The incorporators are E. E. Brubaker, president; S. W. Rogers, vice president; I. Daniell, secretary and treasurer; H. P. Evans and J. L. Downing. The claims are the Little Mercur Nos. 1, 2, 3 and 4, in Camp Floyd district.

The Salt Lake Exchange reports that a short consolidated and passed, adding much to the cheerfulness of the building. Verbal Express: Mr. Johnson and Hocking returned from Stockton and will be at work on the Blue Mountain as soon as there River can be crossed. As soon as the necessary work is completed on their claims they propose to sink a development shaft on one of the claims to a considerable depth.

Do you know how we found it out? Your criticism, Dear Public. Some of you were good enough to write us about it; some spoke of it in the store; some just bought clothes and furnishings and went away without looking at Hats—that's first-rate criticism.

Now we have the best of everything; that is, if we are as wise as we think we are, and if we are not, please bring back what you don't like. Now for the good words about Hats themselves:

Paying $5.00 for a derby doesn't make it a $5.00 derby any more than paying $1.00 a share for stocks makes a dollar stock.

Burlington Route

There are Gaudier Trains

than the Chicago Special, but none more comfortable, more reliable, or more perfectly appointed.

On the Chicago Special you sleep in a sleeping-car, dine in a dining-car, recline in a reclining-chair car, and smoke in a buffet smoking-car.

Leaves Denver 1:40 p. m. Arrives Omaha 6:30 next morning; Chicago 8:15 next evening. Tickets at offices of connecting lines.
