Demand for Stocks Was Very Active at the

Pienty of Sellers-Prices Grow Unsteady-Later Recovery-Live Stock and Produce Changes.

New York, Jan. 31 .- The demand for stocks was very active during the first hour, but was freely fed to take first profits by yesterday's buyers. The market absorbed these offerings steadily and the bulls were encouraged to renewed efforts in the metal group. Steel and wire was pushed above 57, and other members of the group responded 1@214. Railroad stocks were lightly traded in with Burlington and Southern Pacific most active. Large amounts of sugar were unloaded towards 11 o'clock, and it crumbled away in price until it reached 1.174. Other shares were forced to sag, but losses were not large. The announcement of the failure of a stock exchange house was followed by

sales under the rule for their account of large blocks of speculative assues. About 15,000 shares of sugar were liquidated and 8,000 shares of other is-ues. The offerings were absorbed on a rising market, sugar recovering 11/2, and steel and wire, St. Paul and some of the low priced railroads displaying marked strength. The bond market was irregular on a

fair volume of business. Realizing sales were dribbled upon the market in a steady stream in the last hour forcing sugar down to about the low point. Sharp fractional reactions were general. Supporting orders checked the decline. The closing was active and firm at a raily and net gain expect in a few prominent stocks.

MARKET IRREGULAR TODAY THE MEETING WAS HELD TODAY

The Mercur Shareholders Listen to the Annual Report.

THE NET GAIN IS \$178,166,86.

Agent the Bingham Copper and Gold Company's Strike-Ore from the Alaix Property.

The stockholders of the Mercur Mining company met in annual session this afternoon and listened to the manager's reports, which showed the average daily output for the past year to be 353 tons. The cost of mining the ore was \$1.05 against \$1.16 during the year 1898. The milling expenses amounted to 68 cents a ton, or 4 cents per ton less than the previous year.

The total expense per ton was \$2.27, the difference of 54 cents per ton covering the freight charges for ore transportation from the mine to the mill, royalty and incidental expenses.

The total receipts for the year

amounted to \$472,999, and the deduction of \$294,832.14, the total regular expenses places the net earnings for the year at \$178,166.86. Added to this amount is the sum of \$24,366.36, the balance on hand Jan. 12, 1899. This gives \$202,533.22 as the amount of available cash after the payment of the regular expenses of the mine. During the year, however, the sum of \$32,157.20 was expended in construction work and improvements. This; added to the sum of \$125,000 which was handed out in dividends 48, 49 and 50, gives \$157,157.20, which, when deducted from \$292,533.22, mentioned above, leaves \$45,376.02 as the cash balance on hand on January 12, 1900.

Superintendent George Z. Edwards also handed in an exhaustive report in which he alluded to the benefits accruing from the installation of the 12 drill Norberg duplex air compressor. Six 2-man drills and three 1-man drills are now in operation. A great deal of attention has been given to prospecting during the past year. The cost of the dead work is placed at \$71.59 per day for the year. About twenty-nine men have been kept almost constantly on this labor, the progults of which are on this labor, the results of which are dwelt on very fully by Mr. Edwards

The Silver tunnel is now in about 1,400 feet, and besides encountering small stringers of ore, the same extensive ore bodies have been encountered as were opened up in the Lulu tunnel. The Apex incline is now 650 feet de and four upraises connect with Nos and 4 ore strata. It is intended to

commence the extraction of ore from Since the installation of pressor and air drills in August last, work has been pushed on the New Resolute tunnel, which is being driven in to cross-cut under the old stopes in the Resolute Apex, Mercur and Nim-rod tunnels. This new tunnel will result in much more economy in handling the ores. It is estimated that 380 more feet will suffice to connect with the old

During the year about 8,000 feet of pipe has been laid with which to work the machine drills.

workings.

While they were being worked the open cuts produced 160 tons of ore per day. As they are most successfully worked in the warm weather, nothing will be done on them until spring opens when they will again be made to their quota. The report thus briefly alluded to closes with the statement that owing to the precautionary measures adopted at the mine there were no lives lost during the year and no serious accidents were recorded.

The following board of directors were chosen to serve for the ensuing year: John Dern, E. H. Airis, John Heim-rich, Charles J. Devereaux, and George H. Dern. The board will meet later and elect officers.

SAMPLES WERE PICKED.

Colonel Heffron Reports the Bingham Copper and Gold Unchanged.

Col. H. G. Heffron was in his office today, after a visit to the Bingham Cop-per and Gold company's property yes-terday. Mr. Heffron says there is nothing worthy of special mention at the mine. Some very good assays were reported a few days ago from samples of copper ore. The samples were picked from patches of good ore which have been appearing in the incline for some time past. It was thought at first that the samples sent in might be an average of the bottom of the incline. The change would then have been worth noting. At present, however, things are practically unchanged. The big tunnel is being pushed in at the rate of five feet a day, but nothing has yet transpired out of the ordinary.

SWANSEA DIVIDEND.

The Directors Declare the Regular Dividend of Five Cents a Share.

The directors of the Swansea Mining company met this morning and de clared the regular monthly dividend of clared the regular five cents a share, or \$5,000 payable on Pebruary 10th. The books will close February 10th. on the 6th of February.

today on It was stated very good authority very good authority that the directors of the Daly West will meet tomorrow and post a dividend of 25 cents a share, or \$37,500.

LION CON. LOOKS WELL. Five Foot Streak of High Grade Galena Besides Milling Ore.

F. E. Wilson returned from Stockton last evening. He brings good reports from all the properties, and says the Bunker Hill has several feet of very good ore which will enable it to reach the market again early in the coming month. Five feet of first class ore is said to be exposed in the Lion Consolidated in addition to nine feet of milling ore. Work will be resumed at the property early next month and it is expected that when the start is made again the mine will be made to pay dividends in the near future.

THE WASHINGTON MINE. Drifting on Vein Commenced-High Grade Ore Exposed.

At a depth of 230 feet in the incline shaft drifting has been started on the yein at the Washington property at Frisco. P. T. Farnsworth, who re-turned from there yesterday, says everything at the property looks very promising. The walls encasing the vein promising. The walls encasing the vein on the Washington are said to be re-markably smooth. Some high grade ore is being encountered, but nothing sen-sational is looked for above the 400 level which it will be the aim of the management to reach in the near fu-

THE ALAIX PROPERTY. Samples from a Big Ledge Run High in Gold Values.

Some time ago W. T. Dinwoodey knocked off a few pieces of weather worn rock from a big ledge on the Alaix property at the mouth of Little Cottonwood canyon which assayed some-thing over \$20 in gold to the ton. As no values were expected there the assay returns came as a surprise to every-one. A special trip was made to secure a general sample which, however, only showed 80 cents in gold per ton. 1211 dently the samples secured in the first place contained a little free gold which raised the average. Sinking has been started since then at the base of the huge projection and samples brought to town todayare expected to reveal values amounting to a few dollars in gold per ton at least.

The Dixie Option.

Jean F. Webb, of the syndicate that has secured an option on the Dixle group, accompanied by W. B. McDou-gall, a California mining man, arrived in this city from Salt Lake Wednesday, says the Washington County News. Mr. Webb was seen at the St. George hotel by a representative of this paper,

"I recently returned from St. Louis, where I had been to confer with my associates, and paid down \$500 cash in Salt Lake City last Saturday, this being the first condition under which we secure the option. We will decide within the next sixty days whether we will obtain possession permanently or not. If we decide to buy we will proceed with the development on a per-manent basis. We have unlimited capital, and are in no hurry to realize or try to make any profit, because we feel that the proper thing to do first will be to thoroughly develop the ore bodies before deciding upon the character of plant to put in for treating the ores. If the mine proves to be what we expect, we will put up a smelter with a capacity to treat at least 500 tons of ore per day. We will also buy and treat ores from the surrounding mines and thus create a home market.

Bunker Hill Strike.

"The bigest strike of the season in the Baker City district has just been made on the Bunker Hill, near the cele brated Golconda, and on the big belt where are situated the Eureka and Excelsior and many other celebrated producers in the Cracker Creek district," said W. C. Cowgill, who is here from Baker City, and is editor of the Republican. "The Bunker Hill lies be-tween the Cougar and Golconda, on the main belt of ore, which is traceable the surface for twelve or fifteen miles. A tunnel was run in on the 700foot level, and yesterday, before reach-ing the main ledge, which is eighty-eight feet wide, the workmen ran into a vein of rich ore which assays \$76.58 per ton. The whole camp is wild, and prospectors are staking out claims on all the nearby hills,"-Spokane Chronicle.

WAGON HAUL CEASES.

Daly-West Ores Are Being Hauled Through the Ontario Tunnel.

The work of discharging the ores of the Daly-West through the Ontario-Daly tunnel has now commenced and will effect a considerable saving to the A contract has been entered ompany. into by which the ore will be hauled at the rate of 15 pents a ton instead of \$1, which is the reported rate by the old wagon route. The hauling of supplies back to the mine will effect a still greater saving to the company The teamstears who have acted hither-to will be out of a job but their loss may be a gain to miners, an increased number of whom, it is said, will be put to work in the mine in the near future. All of this great change is made pos-sible by the mile rallroad spur leading to the mouth of the tunnel. Hence-forth the condition of the wagon road can never affect the ore output from the great Daly-West.

MINING NOTES. The Calenz King of Stockton mar-keted a car of ore-today.

The Leonora, of Stockton, is said to be sinking on some very good ore.

W. J. Lawrence is visiting the Honorine property at Stockton today

The Rabbit's Foot of Tintic took down the price of two cars of ore to-The Centennial Eureka of Tintic took down the proceeds of ten cars of ore

today. The Glasgow & Western Exploration mpany marketed two cars of ore today from its Nevada properties.

The Taylor-Brunton sampler reported 16 cars of ore from Tintic, one from Stockton, and four from Bingham. The last issue of the Alaska Miner,

published at Juneau, states that Walter Goodwin, formerly of this city, was recently married to Miss Herd. The first car of ore from the Eutonia

in the Erickson district has been settled for on a basis of 42 per cent lead, 12 ounces silver and 80 cents gold per ton. W. F. Snyder, who has returned from Gold mountain, reports the Holland company's tunnel is now in 1,250 feet. The ledge should be tapped within the

next 300 feet. President A. C. Burrage of the Utah Consolidated or Highland Boy Mining company, as it is known here, arrived in town last night. Mr. Burrage ex-pects to visit the mine at Bingham to-

Iron County Record: Will Sawyer came in from Deer Lodge yesterday, where he has been working on a three mile trench for a pipe line to the Home-stake mine. He intends returning to the camp again in a few days.

The total receipts of cyanide dust at the local refinery during the month amounts to nearly 5,000 pounds and represents an approximate value of \$75,-000, notwithstanding the month has been a very quiet one.

A new hoisting plant consisting of 12-horse-power engine and an 18-horse-power boiler, has been installed at the Rush Lake property near Stockton is the intention to resume sinking in the shaft.

The shareholders of the Ophir Hill Consolidated Mining Company met yes-terday afternoon and official charge of the proposition was taken by Senator W. A. Clark, of Montana, and his staff. The senator purchased the property some time ago for \$75,000.

Iron County Record: Will Ahlstrom who came in from Crystal Spring Wednesday, reports that the Milner-Dear-Lerch people are still pushing developent work on their group of iron claims with a force of about thirty men and are showing up lots of iron ore. The force is now devided into three camps in order to cover the entire group of twenty-two claims. The deepest shaft is now down 75 feet and is all in ore.

Engineering and Mining Journal: The smelter for Marysvale, Utah, has taken definite shape, the machinery, etc., being contracted for. The American Producers' Controlling Company, of Bos-ton, is behind the project, and Manager C. Sumner Northrop, whose headquar-ters are at Salt Lake, is in Chicago to arrange for shipping material and suppiles. It is to be a forty-ton lead smelter; the conditions of ore supply are pronounced most satisfactory— a surprise to others acquainted with the

tributary region. Boston News Bureau: The only thing

that is needed in the Boston stock mar ket for coppers is a little less Standard Oil and its methods and a little more publicity. Utah mining would not now be selling at \$25 per share, directly after the exhibit made in the company' annual report, were it not for the fact that the report does not tell the whole story and does not give the assets and liabilities of the company, and possibly for another fact that every stockholder now knows that the so-called Standard Oil party has been "playing" him in the share market.

INDUSTRIAL STOCKS.

Without wishing to discriminate against the industrials it cannot escape attention that they are untried; that they are sustained by profits which probably cannot continue; that as a class they are highly inflated; that they must face a period of hostile legislation; that many of them must undergo severe reorganization, and that specula tion therein involves unusual risk. There are a few of the industrials orrisk. ganized on conservative lines which will prove remunerative to their hold-ers, and these may be held with confidence. So far these industrials have not become a serious menace to the stock market, for the reason that only a small proportion of their issues of securities is distributed among the public. The great majority of the in-dustrials are still held by the original holders who accepted securities when surrendering control of their individual plants. If they failed to sell at the high prices of 1899 they simply lost imaginary profits; there were no real losses to them; hence the decline has caused less injury than would have happened had the public been a free buyer of these inflated preperties. In the future operations in the industrials are likely to be carried along on more onservative lines. The banks are dis criminating sharply as to collateral, and this is a factor of safety.

The industrials cannot expect to gain full public confidence until they furnish reliable annual or semi-annual reports of their operations and conditions. In view of the enormous powers and ad-vantages which they hold, the public have a right to this information; and legislation against the trusts could take no wiser or more effective form than enforced publicity. By such means the public would be protected against monopolistic abuses; investors would be saved from fraud, and the industrials themselves would gain through commanding the confidence of which many of them are now destitute.-Clews.

Total \$ 7,607 Stock Exchange Firm Suspends. New York, Jan. 31.-The firm of Tunstall & Co., members of the Stock Exchange, suspended today. This firm was formed in November, 1899. It is com-posed of H. G. and A. G. Tunstall, the first named having formerly been a member of the firm of Norton & Tuns-

The enormous purchases of sugar by this firm late in yesterday's market attracted much attention and the efforts o realize on it this morning broke the

The firm was unable to meet its engagements and its holdings were sold out under the rule on the exchange. Something like 15,000 shares of sugar were thus sold, and over 5,000 shares of various other stocks in which South-

ern Pacific, St. Paul and steel and wire were conspicuous proportions. The character of the accounts liquidated indicate that the firm had been ndeavoring to hedge its short accounts on the general market by a turn on the long side in sugar. When they attempted to bid up sugar they brought out such heavy offerings that they had to give up the attempt.

The following statement was given out by the suspending firm: "Owing to the bank refusing to cerowing to the bank rerusing to certify our checks, we were obliged to suspend temporarily. We hope to make a satisfactory settlement shortly."

The members of the firm, H. G. Tunstall and C. A. Wainwright, are young men. It is said the firm's liabilities

are not large. BIND YOUR MACAZINES,

GOOD NAME GOOD TRAIN.

A year ago last February when we placed a new Chicago-Denver train in service, we christened it "The Chicago Special." The name fits it perfectly. In the first place, at is a CHICAGO train. Then again, it is a SPECIAL train. The running time is special— 1,046 miles in less than 281/2 hours. The equipment is special—sleeping, library, dining, and chair cars. The service is special—as good as any in the world. Leave Denver on the superb train at 2:50 this afternoon, and tomorrow morning you are in Omaha or St. Joseph, tomorrow evening in Chicago or St. Louis.

Tickets at offices of connecting lines. Ticket Office, 214 S. W. Temple Street, Salt Lake City.

B. R. WATSON, General Agent. R. F. NESLEN, Trav. Pass & Freight

Direct Route to Chicago

CHICAGO-UNION PACIFIC NORTH-WESTERN LINE

NO change of cars. Faster than any other route. "The Overland Limited," equipped with Palace Sleeping Cars and Dining Cars, meals "a la carte," leaves Salt Lake at 7.00 every morning.
