

small space on the front platform. The power is obtained under a system of wires laid underground in a manner somewhat resembling the cable system. On these wires runs a small trolley extending from underneath the car. It is so arranged that, in case of a short circuit, the current will be cut off. In the final trial, the car was driven for a distance of five miles without a stop. The car is all righted by electricity, which also serves to show how strong a current it is.

A Protest from Star Valley.
JANUARY 20, 1904.
In your issue of the 23rd of January, the Star Valley, N. Y., is mentioned as being a part of the country. The article in question has only just been shown to me, and at the request of H. C. D. C. and a number of other prominent citizens I have to state that the article is entirely untrue. We do not propose to sit idle and have Star Valley given a black eye, and to interests greatly misrepresented in such a manner.

In the first place, your correspondent says the weather between two cold waves is only the winter. We emphatically deny the truth of this statement and can prove our assertion by all in this valley. We have had no wind at all, with the exception of a little breeze preceding a storm, neither have we had any snow on the ground for several days. The weather is just what it is, and it is not the winter. We do not propose to sit idle and have Star Valley given a black eye, and to interests greatly misrepresented in such a manner.

It is not the winter. We do not propose to sit idle and have Star Valley given a black eye, and to interests greatly misrepresented in such a manner.

log better price than had been in other sections, which is attributed to the fact that the loggers have been working in the same section for a long time, and have been able to get a better price for their logs than they could have gotten if they had been working in a new section.

Our schools are in good trim as are the teachers, and taking everything into consideration, we have much to be thankful for, and if there are any more such as last night, we will be no partying a good enough for me.

Yours respectfully,
THOMAS H. HENDERSON,

GRATITUDE OF A SPIDER.
Protection from the bite of a spider is a matter of life and death. The spider is a very small creature, but it is very dangerous. It is very difficult to see, and it is very hard to kill. It is very dangerous to have one in your house, and it is very dangerous to have one in your bed.

There is nearly always a crowd of flies about the house, and they are very annoying. They are very small creatures, but they are very dangerous. They are very difficult to see, and they are very hard to kill. They are very dangerous to have in your house, and they are very dangerous to have in your bed.

One of the most interesting things I have seen is a spider. It is a very small creature, but it is very dangerous. It is very difficult to see, and it is very hard to kill. It is very dangerous to have one in your house, and it is very dangerous to have one in your bed.

Yesterday afternoon he was in his happiest mood, and there was a lively rattling of his legs. He was very happy, and he was very content. He was very happy, and he was very content. He was very happy, and he was very content. He was very happy, and he was very content.

Now I am in a good mood, and I am very happy. I am very happy, and I am very content. I am very happy, and I am very content. I am very happy, and I am very content. I am very happy, and I am very content.

There is a very small spider in my house. It is very small, but it is very dangerous. It is very difficult to see, and it is very hard to kill. It is very dangerous to have one in your house, and it is very dangerous to have one in your bed.
