THE DESERET NEWS.

The Hive of Bees.

BY CHARLES DERRY.

TUNE: "The Englishman." Here is a hive of bees in the far-famed west, Beneath a clear blue sky; With health and wealth we are truly blest From the hand of God on high. Let us gather honey from every flower, Whether rose or hemlock dread, And strive to improve each fleeting hour, E'er the precious time has fled. CHORUS:

We were drove from the east by a murd'rous band And have found a have in this peaceful land.

Our deadly foes in their dark career Have tracked our weary steps, But their stings are sheathed nor once made bare,

While they speak with honey'a lips; Yet a dea lier blow they aim to strike,

Politely sipping our honey,

By shedding their blasting venom to blight Our hopes, and pocket our money.

CHORUS:

But the honey must stay in our own bive, Or the Deseret bees no, never, can thrive,

They bring us their drugs and gaudy toys To luil us all fast to sleep, And rob us of our hard earned joys-Then they'll laugh while we must weep: But their day is past, for the bees have found They are wasps, that steal our honey, And lazy drones, that lurk around

Collect and dig into the ground all the manure that can be obtained in the fall and spring: and during the summer collect all the soap suds and other liquid manures and put into an old keg or barrel, and apply a little at a time in the evening, to the grape vines, cucumbers, melons, &c. E. SAYERS.

IN AND OUT-DOOR AIR .- If a small portion of the air of a crowded room is made to pass up through distilled water, a sediment is left, which contains various colored fibers of clothing, and portions of hair, wool, bits of human skin, or scales, with a kind of fungus growth, with its particles of reproductions, which adhere whereever they strike or fall on wet surfaces, or bruises, or sore places, and grow wherever they adhere; there is also a small amount of saud and dirt, with great numbers of the various forms of animal life.

No wonder, then, that the blood is soon tainted and corrupted by making sitting apartments of our chambers, by spending hours in crowded assemblics, or stage coaches, or railroad cars, while every breath we draw is a mouthful of monster dle.

But if that room be emptied for a few hours, and a portion of its atmosphere be treated in the same way, nothing will be found but a little sand and dirt, a few fibres of wool and cotton, only a trace of fungus, but no animal life, and no bits of skin and hair, and scales of dead human matter.

If five times the amount of neighboring out-door undergoes the same process, a fibre of wool or cotton is now and then found, a little sand and dirt, with specimens of fungus and their atoms of reproduction, but no traces of decayed animal matter, and no signs of organic life; thus showing that in close apartments we are surrounded with organic living bodies, and that animal matter, living, dead, or decayed, loads the atmosphere which we breathe in chambers of our dwellings and crowded rooms, and that these corrupted particles are swallowed, and are breathed into the system every moment of in-door existence, thus strongly urging us, by all our love of pure blood and high health, to hurry from our chambers at the earliest moment in the morning, and to consider every hour of out-door breathing a gain of life .-- [Hall's Journal of Health.

METEOROLOGICAL OBSERVATIONS FOR JANUARY, 1856, AT G. S. L. CITY.

CHORUS: But the honey must stay in our own hive, Or the Deseret bees no, never, can thrive.

To rob us of all our money.

And the word has gone from the great king bee, And is echoed through the hive, That we must quit our coffee and tea And thus save our souls alive; Throw away that filthy noxious weed, Nor be stuffing your heads with snuff; Produce and make whatever you need, And the suckers will soon be off. CHORUS:

For the honey must stay in our own hive, Or the Deseret bees no, never, can thrive.

Then let us rise as a noble band And increase our flocks of sheep-Sow cotton and flax throughout the land, And plenty of corn and wheat: Our wives and daughters will card and spin, And weave all the cloth we'll wear, And make the hive with music ring To the God who led us here. CHORUS: We were drove from the east by a murderous band,

But guided here by Jehovah's hand.

AGRICULTURAL.

NUMBER 9:-HINTS ON THE CROPPING AND CULTURE OF CITY LOTS. MR. EDITOR:-

Being often requested to give some practical hints on the planting city lots, allow me to answer such inquiries through the medium of the News: in doing this I will simply point out what seems to be the most economical and at the same time, the most profitable to the cultivator.

chest. Exercising the chest in this manner, it themselves recently are requested to do so immediately by Allowing every lot to be 10 rocs wide and 20 will become flexible and expansible, and will en- certificate of their standing from the standing President rods long: plant 8 reds at the lower end with large the capacity and size of the lungs. wheat, oats or corn; wheat I would prefer, which ! - mmmmmm will give 10 bushels on an average, besides the FASHIONABLE CHURCH GOING -There is a great chaff and straw for fodder for a cow, and serve deal to be learned from those who have good wilkin, 17th Ward, at early candle light. to make a portion of manure for the next year's clothes and are enabled to feel comfortable at crop. I would then crop 6 rods wide with sugar church. There is a sociable mixture of mutual beet, carrots, turnips and vegetable roots, for feed admiration and the latest fashion that makes a for cattle and domestic use; the remaining 6 rods, church desirable as a place of re-union. On which will generally be in part occupied with the yesterday we so far forgot ourself and the prevail- cli House G. S. L. City, each alternate Saturday evening house, &c., I recommend to be planted with the ing topics of church-goers as to ask of four who at half past 6 p.m., commencing on January 3d. different varieties of fruit trees, a few rows of pie had attended the same church-the fashionable plant, asparagus. herbs and such things as do not church-what was the subject of the sermon? require planting every season. The first-a young lady - replied that she could who cannot attend will please report themselves by letter. PREPARING THE GROUND AND PLANTING .- It not remember. The other three, who were should always be borne in mind that the ground gentlemen, were quite as ignorant. Two of them is in good condition, namely, that it is dry and admitted that they had set up late on the evening works freely, so that it crumbles and lies mellow | previous, and, in consequence, fallen asleep durafter the spade or plough; another item is to dig ing the preaching. The other one replied that John Rowberry, Mr. RASMUS CHRISTENSEN and or plough deep, and if manure is applied it should there was something said about the shedding of be well mixed with the soil. blood, but further than that his memory was at Sowing THE SEED .- As a general method I re- fault. These four were accidentally called upon, commend that the seed is sown as soon as possi- and probably represent quite a body of fashionable ble after digging the ground; it being then in a church-goers. How would it do to prescribe the better state to give lite, and seeds germinate or calico gowns and deep hoods of our grandmothers grow much better than when allowed to remain as a church dress for our ladies, and pepper and and become dry. Most vegetables, will give the salt clothing for gentlemen, as a test of churchbest crop, when sown in drills; they can also be going and sermon hearing? Something ought to more readily cultivated than in any other way: be done. For the church and theatre are evifrom 18 inches to 2 feet is a moderate distance dently getting so near each other, that a Chinaapart; when planted nearer there is not so good a man can hardly tell which is which .- [S. F. chance to cultivate between the rows, nor can Chronicle. the crop be so advantageously watered in any mannana. IT No man ever did a designed injury to other method. another without doing a greater to himself. In planting, first sow the wheat, then a good patch of peas of 2 or 3 varieties at the same time mmmmm years. IF He who lives only to benefit himself, gives to give a regular supply, say the Early June; then the world a benefit when he dies. the Blue Surprise; and the Blue Imperial or Marrowfat for a late crop. mmmm

THE CHEST .- Those persons in easy circumstances, or those who pursue secentary employment within doors, use their lungs but little, breathe but little air in the chest, and thus, independently of positions, contract a wretchedly small chest, and lay the foundation for the loss of health and beauty. All this can be obviated by a little attention to the manner of breathing. Recollect the lungs are like a bladder in their structure, and can stretch open to double their size with perfect safety, giving a noble chest and perfect immunity from consumption. The agent, and only agent required, is the common air we breathe, supposing, however, that no obstacle exists external to the chest, such as lacing it tight with stays, or having the shoulders lie upon it. On rising from the bed in the morning, place yourself in an erect posture, with your head thrown back, and your shoulders entirely off from the chest; then inhale all the air that can be be got in; then hold your breathe as long as possible. Repeat these long breaths as many times as you please. Done in a cold air it is much better, because the air is much denser, and

GENERAL REMARKS.

The barometer for the last ten days, has ranged at 25,850 inches. The highest range of the thermometer was 50°; the lowest 3° below zero. During the months of Nov., Dec. and Jan., there fell 8 feet and 11 inches of snow, which, upon experiment, produces 2,120 inches of water to the solid foot of snow. This with an 1 inch of rain, makes 17,724 inches of water upon the whole surface of the ground. The prevailing winds have been south with a majority of cloudy stormy days for the month of January. Monthly mean of the thermometer is 24,480 for noon. Constitution of the local diversion of the local diversion of the local diversion of the local diversion of the
