In Women's World.

Has progress deprived women of all their old-time employments and are they forced to engage in public affairs, too long neglected by men? These questions are suggested by an article in the February Delineator, in which Ida Husted Harper tells why "Woman's Room in Municipal Housekeeping" has become necessary.

One after another the old-time employments of the household have been taken from home to factory and office. Women are separated into two great divisions of an army—one that follows the work and marches forth each day to find in some public work of industry the occupation once carried on in the seclusion of private life, and the other that remains in a home stripped of all these domestic tasks that used to keep after nightfall.

Mrs. Harper, Churn, loom, spinning wheel, even the sewing-machine, was snatched away, until at last they were left with only the vacuum cleaner, the former implement of labor. As a result, one day, with a great clatter of victory, up to the door came the automatic compressed-air sweeper and down the woman and her broom riding through space like Mother Goose in the story-books.

When the woman came down to earth against she was still clutching the broom, and finding her house all swept brown and polished from roller to attic with the products of the factories, she began to wonder if men, in taking for themselves all this labor belonging by right to women, might not have neglected their own domestic duties.

Mr. and Mrs. Wallace have just returned from a ten days' visit with Mr. and Mrs. Wallace of Ball River, Mass. Mr. Wallace came to New York the first of the year to visit with them, exacting a promise from them to return the visit as soon as possible.

One of the characteristic models of the present season is the coat with the fancy outline. It is popular, too, for the up-to-date woman has been quick to discover that the pointed lower edge adds amplitude to her apparent length of line and incidentally, contributes to the slender effect which she is so eager to obtain.

The linings of the fashionable coats are usually of satin, very soft and lustrous, and well calculated to set off to advantage the material used for the garment. White, gray, mauve and rose are popular shades for these linings, and are especially favored owing to the predominance of tulle, elephant and smoke among the materials used for smart gowns and millinery. Many modish coats are lined with satin matching the cloth.

Women seem to have sacrificed much of their individuality to the present fashions. Instead of adapting the new gowns to suit their own style, they have made themselves over—hair, figure, walk and all—to harmonize with the dictates and empire modes.

Up to a certain extent such consistency is to be highly commended, of course. But, carried too far, it becomes wearisome. The modern elegant is a most attractive type—graceful and picturesque. But it is to be hoped that the American woman will keep up with her own wardrobe and remember that her own personality is more interesting than the personality of her clothes.

Wear the new gowns by all means—they are charming—but wear them as if they belonged to you and not to a man. That is where the woman who plans her own clothes is often more successful in suiting herself than the woman who goes to the best tailors and dressmakers. The woman who supervises her own wardrobe naturally gives vent to her own tastes and is guided by her own judgment.

Every woman can possess a supple, agile body under perfect control. The first essential is to learn to stand properly, with the head erect and the shoulders flat, not pressed backward. To acquire this, make an object on the head, in imitation of the peasant woman, and stand against a solid wall, the heels, trunk and back of the head touching it. When you feel that you are "in position" stand forward, retaining the object (it may be anything—a small pillow or a weight) upon the head.

Now raise the heels slowly, pressing the floor with the toes, repeat this 10 times. Now hold the arms flat against the sides, bend the knees and lower the body toward the heels without actually touching them; raise the body slowly keeping the back straight and upright otherwise the object will fall off your head, and not allowing the hands to touch the floor. Repeat 10 times.

Next, lift the lungs with fresh air; hold it, and with the body and head erect, raise one arm forcibly above the head while the other is held close to the side; lower the raised arm, and again so doing, raise the other. Continue vigorously this alternate movement, raising yourself in the erect posture with the object upon the head until the air in the lungs must be expelled. Slowly bend the lungs and repeat. This exercise has also a particularly stimulating action upon the liver.

SALT LAKERS IN GOTHAM.

NEW YORK, Jan. 24.—Beginning on Monday, the 25th, there will be three Utah girls playing stage engagements on Broadway—each within five blocks of each other; they are Maude Adams at the Empire on Fortieth street, Balle Fisher at the Broadway on Forty-first street, and Ada Dwyer at the Lyceum on Forty-fifth street. These three western girls have come to the front quite to the honor and delight of their friends, both through their talent, their beauty, and the ability each has for hard work and determination to succeed. That they are all so near the top reflects credit on themselves alone, for they themselves have made their opportunities—and have been equal to any and all those opportunities.

From Boston comes the news that Lisle Leigh is doing well with her sketch, "Weaving the Net" (another name for "Kid Glove Nan"), on her vaudeville tour. Miss Leigh has three more playlets to be tried out, but the news she has now is proving such a winner that she is loath to part with it. Her engagement extends to May 1. Miss Sarah Alexander, her aunt, is staying with friends in Providence, R. I., where she will remain until spring.

Mr. A. M. Moore, professionally known as Arthur Morse, is in the city for a week. Mr. Morse and company have been playing the southern circuit. For 42 weeks, "The Mishaps of a Baby and a Dog" being one of the sketches. After this he joins the Orpheum Circuit for a summer tour. Mr. Morse is very successful in his work for a new beginner, and has been fortunate in securing engagements right along. When in the city he hunts up his friends to get news from home and, like all Utahns, is loyal to the west.

Mr. and Mrs. J. H. Moyle and Mrs. Easton were the guests of Mr. Preston Richards at luncheon the other day in the "Commons," the lunch room of Columbia students, after which a visit to all the principal places of interest through Columbia university occupied the afternoon. Mr. Albert Boyle assisted in explaining the different departments of the buildings that contain so much of instruction to student and visitor. Mr. and Mrs. Moyle leave today for Washington, to remain there a day or two, then on to Chicago, where they will meet George T. Odell, and together travel homeward. Our Salt Lake visitors have had a genuine good time—seeing sights and seeing the best theaters on Broadway, and also taking in the gay life at the Waldorf-Astoria.

Two weeks ago Mrs. Frances E. Pryor and her daughter Monta Elmer Pryor, with friends, sailed for Naples, intending to make Nice and Monaco their stopping place for the next three months. The Mediterranean route seems the choice of tourists this season, every boat going out is heavily laden with passengers, seeking the delectable climate of Italy and southern France.

Mr. and Mrs. Jack Sears have just returned from a ten days' visit with Mr. and Mrs. Wallace of Ball River, Mass. Mr. Wallace came to New York the first of the year to visit with them, exacting a promise from them to return the visit as soon as possible.
