SECY, SHAW'S ADDRESS.

The only hope of a material increase agricultural products is through irriation of arid lands. There may be, and tere are, serious objections against the imployment of public revenues in such says as contemplate permanent nation al participation in industrial or com-mercial enterprises, but I see no objec-tion to some provision that will en-rourage private capital to enter what made a most inviting field, and t seems to me this can be done in such a way as will place these lands upor the market at government prices, plus

cost of irrigation, and when paid or, permit the purchasers to be erative owners of the irrigation dants. I have little sympathy and ant patience with the provincialism which opposes any plan of developing portion of our common country which has its root in the fear that i competition.

BRAIN FOOD

Is of Little Benefit Unless it is Dis gested.

Nearly everyone will admit that as a nation we cat too much meat and too Itle of vegetables and the grains. For business men, office men and lerks, and in fact everyone engaged n sedentary or indoor occupations, rains, milk and vegetables are much

As a general rule, meat once a day sufficient for all classes of men, woien and children, and grains, fruit and egetables should constitute the bulk food esten.

But many of the most nutritious foods are difficult of digestion, and it is of no use to advise brain workers to eat largely of grains and vegetables where digestion is too weak to assimilate them properly.

It is always best to get the best results from our food that some simple and harmless digestive should be taken after meals to assist the relaxed digestive organs, and several years experi-ence have proven Stuart's Dyspepsia Tablets to be a very safe, pleasant and effective digestive and a remedy which may be taken daily with the best re-
