

ment, but he was informed by the Speaker that the question had been disposed of.

FOREIGN

PARIS, 16.—Complete returns, except the colonies, show that 314 republicans and 210 conservatives have been elected. Fourteen second ballots are necessary. The conservatives retain 142 seats of the 158 held by them in the late chamber. The republicans retain 297 seats of the 363 who voted the order of the day censuring the dissolution of the chambers.

LONDON, 15.—A dispatch dated Paris, midnight, gives the latest returns, showing 325 republicans and 191 conservatives are elected, and that some Bonapartist leaders, such as Duke de Mouchy, M. Chevreux, and M. Raoul Duval, have been defeated. The elections are considered as unsatisfactory in result, and are calculated to lead to a renewal of the strife.

The *Francois*, Duke de Broglie's organ, claims that after Gambetta's boast of the 400 republican majority it is virtually a Government victory, which encouraged the conservatives to continue in the policy inaugurated on the 16th of May.

The *Defense*, clerical, considers the reduction of the republican majority a rebuke to the insolence of the 363, and an encouragement to President McMahon to persevere in his present course.

The *Temps*, while admitting a reduction of the republican majority, considers the decision of France in favor of republicans peremptory, and declares that it will be neither possible or permissible to resist it.

The *Constitution* advises the immediate retirement of the ministers.

The Hungarian invasion of Roumania is positively declared a hoax.

The Roumanians assert that the deserters from Plevna report Osman Pasha's army destitute of clothing and ammunition, and scantily provisioned. The men and officers are tired of fighting and suffering, and are disposed to surrender. Russian and Turkish advices indicate that the Russians occupied Yagui Hills, Sarbston and Kizil Tepe, abandoned by Mukhtar Pasha, and are manœuvring for an advantageous position from which to make an attack on the Turkish lines concentrated about Aladja Dag.

A correspondent at Sistova gives a favorable account of Russian preparations for the winter campaign. Vast stores of corn and forage have been laid in at the depots along the railroad. Two miles south of Simnitsa bridge it takes eight horses, and twenty men pushing behind, to get a light wagon through. The railway from Fratesti to Simnitsa is progressing rapidly.

A special from Therapia states that Russians attacked Lulina and destroyed part of the town, but were beaten off.

A correspondent at Cettinge reports that the bulk of Montenegrins have been dismissed to sow crops.

Chevet Pasha telegraphed on Sunday that he had arrived at Lukovitsa from Plevna, and would continue his march to Orchanie on Monday.

HAVANA, 15.—St. Thomas advices state that a fearful hurricane visited Curacao and the neighboring islands on September 23d, and caused great damage. The wind blew from all quarters. The sea washed away the lower part of the town of Willemstad. Nearly every house in what is known as Petrimay quarter, was destroyed, and the fortifications are in ruins. Many families are destitute. The damage to property is estimated at over half a million. A Dutch man-of-war and two Dutch schooners were wrecked and several lives lost. All the salt ponds in the neighboring Island of Bonaire are ruined.

LONDON, 16.—Heavy cannonading has recommenced in Schipka Pass.

It is true that Serbia has assured the Porte of its intention to strictly observe neutrality, but this is due solely to the fact that it has not yet finished preparations, and is waiting for a fitting opportunity to openly assume the offensive against Turkey, which will probably come with a Russian victory at Plevna.

The Turks have withdrawn their artillery from the second Grivitsa redoubt. Russians fear the redoubt is mined.

A correspondent with the Russian headquarters in Asia, telegraphs from Karajal, Monday eve-

ning, as follows: Gen. Lazarooff, who, with twenty-seven battalions of infantry and forty guns, was recently dispatched on a turning movement from here, behind Aladja Dag to Awlia Hill and Vezli Kov, telegraphed last night from Buzardjik, begging for assistance, as Mukhtar Pasha was before him with a superior force. Thereupon, this morning our troops began an attack on the Turkish positions, and after heavy cannonading on our left wing with Aladja batteries, we made a serious assault on Awlia Hill, and redoubts. At noon the Caucasian Grenadiers under General Fleimann, stormed the hill and redoubt, capturing three Krupp guns. The Ezinkoy regiment occupied Aladja Dag, capturing the Turkish camp. The enemy retired in disorder in three directions, being cut off in the rear from Kars. The pursuit was sharp everywhere, and will be continued tomorrow. No news has been received yet from Gen. Lazarooff.

A correspondent at St. Petersburg telegraphs that the fate of Monday's battle was decided by a flank attack on Mukhtar Pasha's position from the north. The Russians captured some thousands of prisoners. The siege of Kars will recommence immediately.

EDITORIAL NOTES.

The Princess Thyra, fifth child of the King of Denmark, who is 24 years of age, and whose oldest sister was married to the Prince of Wales, is engaged in marriage to Prince Ernest Augustus, son of ex-King George of Hanover. The Prince is rich, the Princess poor.

A miner named Burt, who had been deaf and dumb from infancy, was working in one of the mines of the Crown Point Iron Company, Vermont, a short time since, when he lost a hand and an eye and had his skull fractured by an explosion. But he gained his hearing and the power of speech. He is now convalescent, and is learning to talk. His profit and loss account relating to this singular accident shows a good balance in his favor.

The Democratic victory in Ohio, where the "dead" party has run up a majority of about 25,000 votes, is a strong indication of the popular feeling in regard to the Hayes administration. The Radicals can not endure the Hayes policy of conciliation. They are nothing if not belligerent. The Republican party, by the defection of the Radical wing, is terribly weakened, and if the breach widens will become thoroughly demoralized. This means victory for the Democrats and the complete downfall of the party of hate, corruption, intrigue and centralization.

A colored preacher near Atlanta, Ga., losing a key a couple of weeks ago, became violently enraged because his little daughter, twelve years of age, could not find it. He lashed her with a whip until her back and shoulders were cut to pieces, and then tried to make his wife wash the wounds with salt and water. She refused and fled. He then beat the child till she died, and knocked her on the head for "playing possum." Subsequently he buried her in a wood. He was arrested, but denied the whole affair, until taken to the spot and the body was exhumed, when he broke down and made a full confession. This is one of the worst cases of brutality on record.

Housewives are frequently annoyed by the separation of forks from the handles. They should never put the handles of knives and forks into hot water, but if they need a cement for repairing them, the following will answer their purpose. It is given by the *Scientific American*—"Take one pound of resin and half pound of powdered sulphur; melt together, and mix in about twelve ounces of fine sand or powdered brick. Fill the cavity of the handle with this mixture, melted. Make the shank of the knife or fork quite warm and insert in place and let it remain until cold, when it will be found to be firmly fixed."

Investigations with the microscope have shown that the fatal disorder called "Bright's disease of the kidneys," which is one of the most difficult ailments with which physicians have to contend, and is pronounced by most of them incurable, is caused by a minute insect called the fly-mite. When the cause of a disease is ascertained the

discovery of a remedy soon follows. Science is doing wonders for the alleviation of human suffering, and the microscope is one of science's most important instruments.

Here is an item for our woolen factories: "It is pointed out in Reimann's *Farber Zeitung* that fabrics, especially those of wool, which have for a long time been exposed to air and light, acquire a stronger power of fixing coloring matter than portions of the same material which have been kept in the dark. This circumstance often prevents the production of an even shade, those parts on which the light had fallen taking the light more readily and acquiring a striped or banded appearance.

Mr. and Mrs. Bliss, "spiritual mediums," are on trial at Philadelphia as swindlers. It is to be hoped they will be severely punished. Helen F. Snyder is the main witness against them. She was the personator of a great number of supposed spirits in the "materialization seances" given by Bliss. Mrs. Bliss was secured in the cabinet and Miss Snyder entered it from a cellar below, where her costumes were kept, through a very ingeniously concealed trap door. A great number of persons were deceived and imagined they saw their dead friends. Miss Snyder has given a complete expose of the materialization humbug, but it will not be long before we hear of a repetition of the imposture in some other quarter, so great is human credulity, and so strong the desire to learn something of the dead departed.

A citizen of Massachusetts had a singular ride a week or two ago. While off the coast of South Plymouth in a boat-shooting dory his boat was tipped over by a whale, and he found himself in a trice riding on the whale's back. The whale dived and he came up near the boat uninjured. He held on to his gun and took it safe to land.

It is asserted by experienced observers that wooded land receives more rain than bare land in its immediate neighborhood. Pine forests attract more moisture than other forests. Pine trees also retain in their branches more than half the rain which falls on them, while leafy trees permit more than half of the rainfall to reach the earth immediately. The more trees we plant in Utah the less trouble we shall experience from drouth.

The *New North-West* referring to the extension of the Utah and Northern Railroad says: "If the Northern Pacific fails to secure Congressional assistance this winter, a reasonable proposition from the Utah Northern Company will find much favor in Montana." The Montanians, in our opinion, had better give up any hopes of an outlet at present in the north, and negotiate with the narrow gauge people for a southern opening, which in less than two years would give them perfect railroad communication with the great centres of trade and commerce.

At an inquest held lately near the classical city of Cambridge, England, over the body of a man found drowned, was supposed to be one John Dazeley. But two witnesses positively identified the remains as those of John Adams, of Chesterton. A verdict was returned accordingly, and an order issued for the burial. But further investigation showed that Dazeley and Adams were both alive in Chesterton, and everybody is puzzled over the affair. This case of mistaken identity shows how careful people ought to be in giving personal testimony.

The following, which the *New North-West* quotes from the *Missoulian*, exhibits the spirit which governs the Agents and their friends, who see nothing in the Indian policy of the Government but a chance to make money out of the red men: "When an Indian agent sees that the money and blankets provided by the Government are dissipated in gambling, or are bartered for whisky and gewgaws and trinkets, he is worse than an infidel if he does not see to it that this money and property goes where it will do the most good—in his own pocket."

The following method of cleansing vessels which have contained coal oil, will prove of value to many of our readers. Wash the vessel with thin milk of lime, which forms an emulsion with the petroleum, and removes all traces of it. By washing a second time

with milk of lime and a very small quantity of chloride of lime, and allowing the liquid to remain in the vessel about an hour, and then washing it with cold water, the smell may be removed. If the milk of lime be used warm, instead of cold, the operation is rendered much shorter."

1,000,000 Bottles

OF THE

Centaur
Liniments

Have been sold the last year, and not one complaint has reached us that they have not done all that is claimed for them. Indeed, scientific skill cannot go beyond the result reached in these wonderful preparations. Added to Carbolic, Arnica, Mentha, Senega-Oil and Witch-Hazel, are other ingredients, which makes a family liniment that defies rivalry. Rheumatic and bed-ridden cripples have by it been enabled to throw away their crutches, and many who for years have been afflicted with Neuralgia, Sciatica, Caked Breasts, Weak Backs, etc., have found permanent relief.

Mr. Josiah Westlake, of Marysville, O. writes:

"For years my Rheumatism has been so bad that I have been unable to stir from the house. I have tried every remedy I could hear of. Finally, I learned of the Centaur Liniment. The first three bottles enabled me to walk without my crutches. I am mending rapidly. I think your Liniment simply a marvel."

This Liniment cures Burns and Scalds without a scar, extracts the poison from bites and stings. Cures Chills and Frosted Feet, and is very efficacious for Barache, Tooth-ache, Itch and Cutaneous Eruptions.

The Centaur Liniment, Yellow

Wrapper, is intended for the tough fibres, cords and muscles of horses, mules, and animals.

READ! READ!

Rev. Geo. W. Ferris, Manokill, Schoharie Co., New York, says:

"My horse was lame for a year with a fetlock wrench. All remedies utterly failed to cure, and I considered him worthless until I commenced to use Centaur Liniment, which rapidly cured him. I heartily recommend it."

It makes very little difference whether the case be "wrench," sprain, spavil or lameness of any kind, the effects are the same. The great power of the Liniment is, however, shown in Poll-evil, Big-head, Sweeney, Spavin, Ring-bone, Galls and Scratches. This Liniment is worth millions of dollars yearly to the Stock-growers, Livermen, Farmers, and those having valuable animals to care for. We warrant its effects, and refer to any Farrier who has ever used it.

Children.

A complete substitute for Castor Oil, without its unpleasant taste or recoil in the throat. The result of 20 years' practice by Dr. Saml. Pitcher, of Massachusetts.

Pitcher's Castoria is particularly recommended for children. It destroys worms, assimilates the food, and allows natural sleep. Very efficacious in Croup and for Children Teething. For Colds, Feverishness, Disorders of the Bowels, and Stomach Complaints, nothing is so effective. It is as pleasant to take as honey, costs but 35 Cents, and can be had of any Druggist.

This is one of many testimonials:

CORNWALL, LEBANON CO., PA.

March 17, 1874.

"Dear Sir,—I have used your Castoria in my practice for some time. I take great pleasure in recommending it to the profession as a safe, reliable, and agreeable medicine. It is particularly adapted to children where the repugnant taste of Castor Oil renders it so difficult to administer."

E. A. ENDERS, M. D.

Mothers who try Castoria will find that they can sleep nights and their babies will be healthy.

J. B. Rose & Co., New York.
