

GENEALOGY.

The Ancestors of Elder Walter E. Wilcox—Carter-Foster Families. Note to—Manti Temple Work.

Communications for this department should be addressed to Mrs. Elizabeth C. McCune, chairman of genealogical committee of the daughters of the pioneers, corner Fifth and First south streets, Salt Lake City, Utah.

The following condensed account of the ancestors of Elder Walter E. Wilcox, of Salt Lake City, is being prepared for this department by his wife, Mrs. Amanda Wilcox. His work in the temple is of a wonderful nature; he is himself one of our modern miracles, being over 80 years of age, and yet is a constant attendant at the temple; he has been successful in securing full details of many of his lines of descent. And, too, for 14 years, he has been a constant worker in this beautiful building. There was so much to do, and the space is so limited, that only the direct line has been given; but if any one wishes further information about the lines now spoken of, let him write to Elder Walter Wilcox, care of Salt Lake Temple.

The Wilcox coat of arms is, as given in the Visitation of Essex Co., England, Argent, a lion rampant. Between three crescents, sable, a chief, blue. Wilcox, Willocks, the lion rampant indicates that he to whom the arms were granted had been a victor in a military campaign.

The coat of arms of the American family, being almost an exact facsimile, show near descent from this historic English line. They are thus given in the History of Wallingford, Conn. The following is an abstract from the History of Wallingford, Conn. The family of Wilcox Willocks are of Saxon origin, and was seated at Bury, St. Edmunds, in the county of Suffolk, England, before the Norman conquest. Sir John Wadgild, in his Visitation of the County of Suffolk, mentions 15 generations of this family previous to 1600, in the reign of King Edward III. Sir John Wilcox was entrusted with several commissions against the French and had the commands of the crossbowmen from Norfolk, Suffolk and Essex. John Wilcox, of Bury, Priory, in Suffolk, was an eminent, gentle, scholar, and he was the representative of the ancient family. Sir George Lawrence Willocks of Brookend, County Tyrone, Ireland, is the eldest son of the late George Willocks, Esq., of Cool Island, County Tyrone, by Isabella, daughter of the Rev. Charles Cuffield. This family is a branch of the Willocks of Tottenham, High Cross, Middlesex, Eng., but they have been settled in Ireland for about two centuries. They have been, and some branches are still, members of the Society of Friends. On the old records, the name is spelled Wilcox and Willocks; it is derived from William.

The first Wilcoxs who came to this country who are known are four brothers, who came from St. Edmunds, England in 1635. Their names were John, William, Edward and Daniel. John Wilcox with his wife, Mary, settled in Hartford, Conn., and he died in 1651. William, with his wife, Margaret, settled at Stratford, Conn., moved to Massachusetts colony, and was the first of the name who is recorded on the list of the early officers of the colony. He was an officer of the artillery company, and died at Cambridge in 1653.

Edward settled in Portsmouth, Kingston, R. I. Daniel Wilcox settled in New York state. There is also a Peter Wilcox who came to this country from England and settled on the north side of Blue Brook, a little above Feltville, N. Y. in 1707. With Rev. Mr. Huntington, J. in 1707, with Rev. Mr. Huntington, J. who settled there at the time he came as Willocks, showing that he is one of the same original English tribe. John Wilcox, who settled in Hartford, Conn., in 1635, is the first grandfather of Elder Wilcox in this country. It will therefore be proper to give this line as it came from Mr. Frank P. Starr, notary public, and genealogist, of Middletown, Conn. Walter was the son of William, who was the son of Capt. Eli, the son of Jeremiah, son of Samuel, son of Samuel, son of John, son of John, the emigrant, who came here in 1635. These are Elder Wilcox's forebears on the Wilcox side in this country.

Lucas—Elder Wilcox has also his mother's family, who came from England. William Lucas was one of the first settlers in Middletown, Conn. He married there, July 13, 1668, Hester Clark; their son William, who married Elizabeth Bowler; their son William married Mary Shillman; their son Richard married Hannah Penfield; their daughter Huldah Lucas married William Wilcox, and these are the parents of Elder Wilcox.

Dudley—Elder Wilcox has also his grand mother's pedigree of the Dudley family. William Dudley was born at Sheen, in Surrey, England, came from the town of Guilford, 30 miles from London. In the county of Surrey, he was married to Miss Jane Sutton by Rev. Henry W. Field, at Oakley in Surrey, England, Aug. 24, 1625. The company left England in the fall of 1626; spent the winter in Boston, where they were urged to locate, and

strong inducements were offered for that purpose; but, preferring to be a colony by themselves, they declined, and were proceeding as far as New Haven. Being pleased with the Indian lands at Menuncate, a considerable portion of which was then under cultivation, they made the purchase of the land, and named the settlement Guilford in remembrance of Guilford in England from whence Mr. Dudley came. Their first child was born on shipboard. There were distinguished men in the company with whom Mr. Dudley came to America. "I will give my line," writes Elder Wilcox, "through them, as they are grandparents to me, commencing with William, the emigrant. William Dudley and Jane Sutton; their son Joseph Dudley married Ann Robinson; their son Capt. William Dudley married Ruth Strong; their son Asahel Dudley married Elizabeth Hatch; their daughter, Lois Dudley, married Eli Wilcox; their son William Wilcox was my father. The securing of my pedigree from Mr. Starr proved to be a great benefit to me, after I became a member of our Genealogical society of Utah. This pedigree helped me to place my kindred in their proper relationship to my father. I feel blessed in obtaining such a history of my ancestors, and am thankful for the privilege of helping them to receive their blessings in the house of the Lord.

I commenced my work in Logan temple with my family in 1885 and have been 14 years working in the Salt Lake temple. We still enjoy this glorious and heavenly work.

THE LATE MRS. ELIZA G. FOLSOM.

Mrs. Folsom, whose funeral occurred in the Twenty-seventh ward on Tuesday last, was well and widely known as a faithful worker in Church circles. She was the wife of the late Wm. H. Folsom and died Jan. 4, 1908. She was born in Hyde, Cheshire, England, in 1832, and arrived in Utah in 1852, where she joined the Church and has ever since been one of its strong adherents. She met with an accident something over six years ago which resulted in paralysis and to this her death was due. She leaves a large family to survive her.

fruits, and the desiccation of milk. From the economic standpoint it is evident that the cost of eggs as an article of food will be notably reduced when large tracts in remote regions are utilized for the purpose of poultry raising. An important factor would be the low cost of freight for a compact powdered material as contrasted with the expense of transporting eggs in the natural fragile condition, containing 74 per cent of water and involving much waste space in packing. Equally important would be the certainty of securing egg meat guaranteed as prepared from absolutely fresh material. The simplicity of preservation and the ease with which a variety of savory dishes can be expeditiously prepared from eggs enhance the value of such a food preparation.

\$16.00 GUN FOR \$3.00

SHOOT BOTH SHOTS, BALL.

Cost Uncle Sam \$16 to manufacture. Unloading them for \$3.00 each. They shoot shot as well as rifle ball. This is probably the best military rifle the world ever saw. This style was put in the hands of the troops of the army and were continued in use until after the close of the Spanish war. The militia were armed with this rifle up to a year ago, and the close of the issue of the new small-bore Krag rifle, the government ordered the sale of them. This style rifle went through Indian wars from 1870, and is the only gun the Indian ever feared. They are still used in the Philippine Islands by the scouts and constabulary, who is proof nothing is better for the hunter, farmer, sporting man or home protector.

Samples shot and ball cartridges free with gun for trial. Money refunded after trial if not wanted.

U. S. GOV'T

Ball Ammunition 2 cents each, or 40 cents box of 20

SIGHTING, ACCURACY AND AMMUNITION PARTICULARS

The guns are sighted for 2,000 yards, or over one mile, and there is no gun made that is more accurate or serviceable. At 50 yards five consecutive shots can be kept in a circle that a quarter-dollar will cover. For killing big game this rifle is far superior to the new small-bore rifles, such as 30-30 rifle ammunition—for these Springfield rifles use the regular 45-70 powder, size 20 G. The SHOT cartridges are also made in smokeless powder, high velocity type, by all manufacturers, and if any gun firm has not them on hand, just tell them to get them for you, as you will see in catalogue of cartridge companies the shot and ball ammunition are made and sold by all manufacturers.
