Veazle was full of feeling, and had the effect of touching a tender chord in the hearts. of nonvining a tender chord in the nearts of many in the crowd. He said at the outset that he desired to make those present think by recalling some of the events of the past, ip which grief ha.1 brought about a strong brotherhood, in which caste had been broken down, and seets and rarties were forgotten. All sects and parties were forgotten. All joined to honor and plant memorials on the graves of those who had gone. He looked for this feeling to grow with the growth of America, and referred to the growth of America, and fetered to the conditions now as compared with the time when the nation, having only 27,-000,000 people was convulsed with war. At that time he, with many others an-swered the first call of his country. That is the significance of the G. A. R. bedges which many of those present That is the significance of the G. A. SOME COMPARISONS. "The fact is that a legislature, com-posed of men representing every sec-tion of the state, familiar with the conditions under which the state conducts its business, posted thorough-ly on the financial condition of the state and her people, deemed that time opportune for a definite move toward the erection, of a capitol building. A careful investigation of the provisions of law, the necessities of the situation and the condition of the state's finan-ces, resulted in the enactment of four measures, under the provisions of which the state may, with great ex-pedition, proceed to the accomplish-ment of the end desired. Under the plan formulated the scheme could not

ment of the end desired. Under the plan formulated the scheme could not be carried out without each of the several measures becoming law; and the burden to the people was lightly distributed over a perion of 15 years. Certainly the legislature was fully con-vinced of the urgent necessity for the erection of a capitol building.

FOR CENTRALIZATION.

"The United States government is rapidly making provision for the hous-ing of the postoffices and its admin-istrative officers in the various states in modern, convenient and imposing buildings. This is significant. The modern tendancy is toward centraliza-tion in the management of all lines of business. The administration of the af-fairs of the State of Utah involves the handling of business along exactly the handling of business along exactly the same lines that are employed in the successful directing of the affairs of any business institution. Under the

present arrangement this is an abso-lute impossibility. "Beginning with the legislature, which is blennialy convened at the seat of government, and continuing through every coordinate branch of state gov-ernment, the accommodations are entirely inadequate to the growing de-mands of the state. "The scattered location of stat offi-

mands of the state. "The scattered location of stat offi-cers renders the transaction of business slow and cumbersome, and the ever in-creasing volume of business transact-ed makes it imperative that proper accommodations be afforded for its speedy transaction. "The argument that Salt Lake coun-ty exhibits a voracious disposition in the matter of appropriations at the hands of the legislature is without foundation of truth. As a matter of information I may state that, eliminat-ing the assessed valuation of rall-roads, telegraph, telephone, express and car companies and net proceeds of mines, the total assessed valuation of the state, outside of Salt Lake county, was, in round figures \$12,-216,339; while Salt Lake county was assessed on its real estate, improve-ments and personal property, exclu-sive of railroad property, etc. approxi-mately \$57,495,023, or about 63 per cent as much as the entire state, out-side of Salt Lake county. "On a like comparative statement, the next largest county in point of assessment paid on a basis of about 10 per cent on the entire assessed valua-tion of the state, and notwithstanding this fact, this same county received approximately 18 per cent of the total appropriations by the legislature for State Institutions.
