

NEWS OF THE WEST.

Proposition to Redem 100,000 Acres
of Land in Idaho.

IN INTER-STATE WATER QUESTION.

Washington Plan for Ireland—Plan
Apple Culture in California—
Progress on the Coast.

Small sprouts beginning to run in the
Columbia River. This is the earliest
arrival of the species known.

William Curtis, aged 90 years, of
Salt Lake City, Cal., was given by a
call on Wednesday evening, and died.

Salt River Valley, Arizona, has
improved since June 30, 1900, need of water
in business supplying the home demands.

The mining extract company of
Benton, N.M., has recently added
about \$10,000 in improvements to its
large plant there.

Lee Outing, of Los Olivos, Cal.,
took 8 quarts of pure alcohol on
Wednesday evening. His funeral was
set for Saturday.

California produced 220,000 pounds
of chlorophyll during the fiscal year
ending June 30, 1898. Of this amount
all but 20,000 pounds was consumed in
the state.

The pastor of a church at Philmore,
Utah, recently told his flock because he
was unable to get a living from his parsonage he
accepted alms from a spurious saloonkeeper.

The owner of San Bernardino county,
Cal., will surrender lake photographs
of all the mountains that do not
exist to assist in possible identification
of other buttes.

It is estimated that the output of logs
from Idaho, Cowichan country, Wash-
ington, 7,000,000 feet per year, and
that owing to timber being cut off
these figures will be increased to
about 12,000,000 feet next year.

Pineapple culture in San Diego
county, Cal., is an successful branch
of the state horticultural commissioners
says will be furnished to ranchers
for the cost of freight, providing a
certain number of growers will under-
take the cultivation of this delicious
fruit.

The site upon which the new university
of Washington state is located
contains 200 acres between Lake Washington
and Lake Union, within the city
limits of Seattle, but about five
miles from the business center. There
is about a mile of trackage on Lake
Washington and half that amount on
Lake Union.

There is a movement on foot to send
a bill to the Legislature of Washington
to prohibit the Barlow Works in the
city and the manufacturers have said
they would buckle it and otherwise
protect it and return it to show just
what can be done with it and show its
relative value in comparison with
other dams.

The rescue party at the Franklin
mine, Washington, Washington, recovered
the bodies of George W. Simons, John
Adams, James Bradford and John S.
Glover, the four men who descended
in a cage a hour during the fire on
October 17th last, but never returned.
Nothing but charred blackened
bones and remains were recovered
and articles known to be on the bodies
such as watch and keys.

The American Land Irrigation and
Power company, through its president,
Charles T. Palmer, of Chicago, has
applied to the Idaho state board of land
commissioners to have 100,000 acres of
land in the vicinity of American Falls
and Idaho Falls, and the commissioners
for the purpose of reclaiming it
under the Carey act. The application
will be referred to State Engineer
Miller, and if he approves the plan
of the company and the scheme is
brought to a conclusion, the state will
send a committee to inspect the land
and the land will then be sold
for fifty cents an acre, plus the
water right, the payment being required
by the state board. As soon as the
settlers have paid for the water
right, they will be entitled to the land
and will have full control of the
ditch, it being left entirely in the hands
of the settlers.

At Anthony, Idaho, Silver Ham-
mer Club Branch informs us that
a pretty interesting water question has
arisen over in Teton basin, over which
there is always bad blood, and the
people of the basin are now threatening
to cut off all water from the Teton
River, which flows down the basin, and
bring water from an intense stream
flowing from the Wyoming side of
the line and bringing it over land both
in that state and in Idaho, duly having
the same result in Wyoming. Another
plan is to divert water from the Snake
River, which flows on the Idaho
side of the divide, and the question in-
volved is which of the two ditchies has
the right of the water, as there is not
enough water for both ditches. Presently
all the land in the basin is held
by the irrigation districts and many
are inclined to the opinion, this being
the case, that the Idaho water appa-
ratus takes the precedence. There is
now no considerable litigation over
the question and a sensible way would
be to bring the two sides in all bearing
in mind that a compromise would
be effected with mutual profit to all
concerned.

A fall want is that growing at the
bottom when you have eaten a full
meal, and can't eat any more, and yet
you still feel hungry. What is wanted
then is a dose of Stimulus Liver Regulator
by itself. Dose per day, one or two
tablespoonsful. It is the best
remedy for those who have a
habit of eating too much, and
cannot stop when they have had
a full meal.
