

UTAH ARTIST'S NAME OMITTED.

That of Prof. J. J. McClellan Does Not Appear on World's Fair Official Music List.

GOVERNOR MAKES A REQUEST.

Writes a Letter Asking That Tabernacle Organist be Given a Place on the Program.

At the meeting of the Louisiana Purchase exposition commission for Utah yesterday afternoon it was decided to call the attention of George W. Stewart, chairman of the bureau of music, to the fact that the name of Prof. J. J. McClellan does not appear on the list of artists who will give recitals on the festival hall organ during the fair. A request that the name of Utah's talented organist be placed on the list was framed by Governor Wells and approved by the commission. Following is a copy of the governor's letter.

GOVERNOR'S LETTER. The attention of the Louisiana Purchase exposition commission for this state has been just directed to the fact that in an official list, recently published, of American organists who will give recitals on the festival hall organ during the exposition, these organists being given in number, no Utah instrumentalist seems to have been found worthy of mention.

Unwilling to believe that this omission is more than an unintentional oversight, I am doing you service to remind you of the high place held in the musical world by the unique and wonderful Tabernacle organ of this city, and its modest yet brilliant master, Professor J. J. McClellan. The instrument itself may be safely classed as one of the really great ones in the world; while the musical profession will agree, we think, that its charm and power are most skillfully exhibited under the hands of the artist named.

The reluctance I feel in being thus compelled to bring the matter to your notice is greatly reduced by the sincere conviction that I am doing you service to the divine art in requesting that this talented performer be not omitted from your list; and while awaiting your early reply, I remain very respectfully yours, HEBER M. WELLS, Governor and Chairman Commission.

UTAH'S MINERAL EXHIBIT. A report was received from Don Maguire in regard to the mineral exhibit collected by him. His work was completed on Feb. 2. His report follows in part:

The exhibits in this collection contain a rich and varied line of ores from the silver, gold, lead and copper bearing mines of Park City, Summit county; an exhibit from the mines of Alta, Little Cottonwood district, Salt Lake county, consisting of gold, silver, lead, copper and zinc ores; an exhibit of gold, silver, lead, copper and zinc ores from the mines of Bingham canyon, all from the group of mines known as the property of the United States Copper company; an exhibit of the gold, silver, lead, copper and zinc ores of the LaSal mountains region, in Grand and San Juan counties; an exhibit of the gold, silver, lead, copper and quicksilver ores of the regions around Marysville, Piute county, also from the gold mines at Kimberly, Piute county.

An exhibit of gold, silver, lead, copper and zinc ores from the principal mines of Beaver county, chief among which are those from the old Horn Silver at Prew, the famous Cactus copper mine at Copper gulch, the Imperial Washington, Beaver Lake, Old Hickory, Harrington-Hickory and other mines in and around Prew and Milford.

An exhibit very exhaustive and explanatory was taken from the mines of the Washington county, consisting of ores of silver-bearing sandstones at Silver Reef, the copper mines of West Mountain, known as the Dixie copper mines; also the silver-bearing sandstone of the Mountain range in the same county.

From Washington county I also obtained an exhibit of agatized and petrifed wood, foot and hanging wall country rock of different veins and silver-bearing reefs.

From Iron county an exhibit was obtained from the gold and silver bearing veins of the Stahel district, and arrangements entered into for an exhaustive exhibit of iron from the famous mines at Pinto.

From the mines of Milford, Juab and Utah counties an exhaustive exhibit was obtained as exhaustive as my time would permit, and those parts of Juab and Utah counties which the time allowed me did not permit me to visit were visited by others appointed later by the commission, and doubtless these localities will have a fair representation.

Exhibits of gold, silver, lead, copper and antimony ores were obtained from the counties of Cache, Weber, Wasatch and Boxelder and partial exhibits from Tooele, Uintah, Rich, Morgan, Emery and San Juan counties.

The area of the state given over the limited time allowed was greater than during my previous exposition, and in some instances the exhibits of certain mineral resources are more extensive than ever before.

Into the hands of your director general I have turned an exhibit from our lead, copper, zinc, iron, blisnuth, antimony, aluminum, manganese, sodic chloride, sodium sulphate, sulphur, uric acid, asphaltum, ozokerite, gilsonite, stearic, American jet, phosphorus, lime, cement, gravel, sand, colitic sands, nephelitic rock, granite, trachyte, gneiss, conglomerates of the early and late measures, asbestos, garnetite, quartz, pyrite, etc.

The exhibits from some localities were the first ever made of this nature from the State of Utah, particularly those of the Great Salt Lake and the radium-producing areas of Professor Vales, Grand county, Utah.

EDUCATIONAL EXHIBIT. A request was made upon the commission by members of the state board of education for an appropriation of \$1000 to collect and install the educational exhibit. It was stated that the exhibit would be very unique and unusual. Whether or not the commission will be so liberal as to appropriate that amount is somewhat of a question. So that the educational exhibit is not as yet secured.

AS TO HORTICULTURE. A report was received from Director General Whitaker in which he stated that the principal part of the exhibits have been shipped. In regard to the horticultural exhibit, as well as horticulturists and to receive and entertain them, the commission is on behalf of this State, and I am sure that you will be pleased with the commission as to have them, with the exception of a lady occupying

"I enjoyed good health until about two years ago when I noticed my back began to ache frequently. It became sore and lame, and headache soon added to my misery. I also found that my general health diminished. I became thin and weak and nervous, having severe pains at regular intervals," writes Mrs. Augustus Hamer, Treasurer New Century Club, 34 Dean Street (Rosbury), Boston, Mass. She continues: "My work which before had seemed an easy task soon seemed like a heavy burden. I decided to try Dr. Pierce's Favorite Prescription, which several of my friends praised so highly. I felt relief within a week. My appetite came back, the pains gradually decreased and I enjoyed sound sleep. Within fourteen weeks I had completely recovered my health. I seemed built up anew, my pulse which had been weak became normal, and new life animated my entire being. I gladly endorse your medicine."

Dr. Pierce's Favorite Prescription restores weak and delicate women to sound health, by curing the local womanly diseases which are generally responsible for the failure of the general health. A woman's entire being is made of womanly matter. When the delicate womanly organism is attacked by disease; when there is irregularity or disagreeable drain; when inflammation burns and ulcers gnaw the general health will reflect the progress of disease in increasing weakness, nervousness, backache, headache, loss of appetite and sleeplessness.

So sure of it is the World's Dispensary Medical Association, of Buffalo, N. Y., promoters of Dr. Pierce's Favorite Prescription, that they offer \$500 reward for women who cannot be cured of Leucorrhoea, Female weakness, Proflapsus, or Falling of the uterus, by the use of this medicine, and a trial of their means of cure.

Dr. Pierce's Pleasant Pellets regulate the stomach, liver and bowels.

CHANGED HIS MIND. The social position and necessary qualifications cannot be a salaried person, and one that would not likely care to remain at the state house more than two or four weeks at the most. A number of such ladies could properly be considered and possibly formed into an auxiliary commission to take complete charge of this very important part of our summer's performance.

Smallpox Patient Runs Off With a Gun but Returns Later. John Adamson, a smallpox patient at the quarantine hospital, yesterday took a notion that he had remained there long enough, so he stole the steward's gun and told the nurse that he was going to leave and if any one attempted to catch him he would shoot him. He police department and Dr. Stewart were notified. Officers Brown and Sperry were detailed to capture the man and take him back to the hospital. Before they returned to the hospital the man had returned the gun and went back to bed. He was sent to the hospital last Tuesday.

A WHOLE-SOULLED AFFAIR. Immense Throng at Reception of Students by L. D. S. Faculty.

Last night from 7 to 11 p. m. the buildings of the Latter-day Saints' University, brilliantly illuminated and tastefully decorated, were thronged by about 800 of the students of this year, in response to invitations issued by the faculty. The fourth-year students acted as the committee on reception, and each wore for the occasion the white class-rose.

The handshaking was in Barratt Hall and for nearly two hours the students passed along the line of the faculty for introductions at the rate of about six per minute. The immense throng was well handled here. Hons. Anthon H. Lund and Angus M. Cannon of the board of trustees participated in the reception. At the conclusion of the handshaking, all went into Barratt Hall where a humorous program was enacted by the faculty to the uproarious delight of the students. President Paul presided and introduced the program with a few serious remarks. He said in part: "If anyone should ask me why we have troubled you to be here tonight, I would answer in the words of the great apostle: 'Ye are our epistles, written in our hearts, known and read of all men'—written, he says, not with ink, but with the spirit; not in tables of stone, but in heart. 'If I be not an apostle unto others, yet doubtless I am to you; for the seal of mine apostleship are ye in the Lord.' These words from the epistles to the Corinthians cover the true relation between teachers and pupils in our Church schools. To some extent, continued the speaker, 'you are the products of our work. To some extent the Lord has permitted us to co-operate with Him in your training and development into honorable men and noble women. To some extent we are responsible for your condition and progress. To some extent we shall be accountable for the record you make, and to some extent we shall share the fruits of your legitimate success. We should be willing to rejoice when you rejoice and to mourn when you weep. We meet you daily in the serious and arduous toil of intellectual advancement, and we would like, if it were possible, to meet you in other relations. And for this reason we have invited you here."

Student Jos. Harris arose at a call from Jos. Mills, president of the Students' society and in a warm and hearty speech thanked the teachers in behalf of the students for the interest and zeal of the former manifested in their behalf. A song by Profs. Hinckley and Peterson, who have never been known to sing a note came next. Unrolling large bundles of music they solemnly stood up, and without opening their lips, "Mary Had a Little Lamb," resounded through the hall, but some hidden singers must have produced the music. Cheers of laughter and applause brought forth an encore. Then instructor Ramsey was called on for a silent speech, being limited to six minutes. In precisely five minutes he painted a picture, working in sight of the audience—a beautiful moonlight sea with a yacht and cliffs. "The Chicago Street Crisis," a six part round, was well rendered by Messrs. Jensen, Fink, Bird, Evans, Ramsey, Fortner, Mills and Horne, of the faculty, followed by a double quartet, "The Robin." Prof. Kent sang and the audience joined in the chorus of "The Good Old D. S. Hymns." Next, Vera Felt, Pearl Kimball, Archer Wiley, and Josephine Spillbury sang the "Song of the Roses," an original class song of the various departments. Then followed a dainty and single luncheon with delicious lemonade. Informal proceedings with singing music and college yells occupied the remainder of the evening, which was declared by all present to be the greatest success of the season in school affairs.

CONSOLIDATION SCHEME. School Trustees Will Meet and Discuss The Matter.

The following meeting of school trustees of the county to discuss the question of consolidation has been arranged for the county commissioners and Board of School Affairs to be held in the county commissioners' room at the city and county buildings.

Wednesday, Feb. 10—Trustees from the three Murrays, Big Cottonwood and Taylorsville, constituting district No. 5.

Thursday, Feb. 11—Sugar, Mountain Dell, East Mill Creek, forming district No. 1.

Friday, Feb. 12—Brighton, Hunter, North Point and Pleasant Green, forming districts Nos. 2 and 3.

Dyspepsia—bane of human existence. Burdock Blood Bitters cures it, promptly, permanently. Regulates and tones the stomach.

VALENTINES! VALENTINES! Lace, card mounts, drops, novelties and combs, wholesale and retail. Write for illustrated catalog and price list. DESERET NEWS BOOK STORE, 6 Main Street.

RECENT happenings would seem to indicate that wrestling is at last having the recognition and organization it has long deserved. This form of athletic diversion comprises all the elements that go to make the ideal American pastime. Skill, agility, strength and endurance are absolute requirements; moreover, the sport is extremely exciting and spectacular to the initiated, and yet interest in it has never been general.

Wrestlers everywhere attach considerable importance to a movement which has been started among leading colleges. Yale, Harvard, Princeton, University of Pennsylvania and Columbia have formed what might well be termed a wrestling league, and annual competitions are planned to decide the intercollegiate championships. This innovation, it is hoped, will result in a new era for wrestling. Of course the professional branch attracts widest attention, but the "pros" have never enjoyed the popularity which is their due simply because the great majority of people do not know enough about wrestling to appreciate a scientific contest. The projected college tourney will multiply the number of amateurs and at the same time will spread broadcast authentic information concerning the science, thereby assisting in the education of the public in maneuvers on the mat.

HOW TO MANAGE PUBLIC SCHOOLS.

Matter Discussed at Biennial Session of City and County Superintendents.

IT OPENED THIS AFTERNOON.

Meeting Tonight in Barratt Hall to Be Addressed by Governor Wells and Rev. Goshen.

The city and county public school superintendents throughout the state, to the number of about 35, assembled this afternoon at the University of Utah, the meeting being the biennial convention of that body. The work of the afternoon was confined almost exclusively to subjects of interest only to the superintendents, the discussions being led by State Supt. Nelson, who presided. D. H. Christensen of Salt Lake City, Superintendent B. W. Ashton of Salt Lake county, (2) "Should the examination for promotion of pupils from the eighth grade be uniform throughout the state?" Superintendent Oliver Christensen of Juab county, Superintendent James Langton of Logan City, General discussion.

FALLING HAIR STOPPED. Baldness Cured by Destroying the Parasitic Germ That Causes It.

Baldness follows falling hair, falling hair follows dandruff; and dandruff is the result of a germ digging its way into the scalp to the root of the hair where it saps the vitality of the hair. To destroy that germ is to prevent as well as cure dandruff, falling hair, and, lastly, baldness. There is only one preparation known to do that. Newbro's Herpicide, an entirely new scientific discovery. Wherever it has been tried it has proven wonderfully successful. It can't be otherwise, because it utterly destroys the dandruff germ. "You destroy the cause, you remove the effect." Sold by leading druggists. Send for stamps for sample to The Herpicide Co., Detroit, Mich. For sale by Z. C. M. I. Drug Dept.

BLOOD POISON is the worst disease on earth, yet the easiest to cure. WHEN YOU KNOW WHAT TO DO. Many have pimples, spots on the skin, sores in the mouth, ulcers, falling hair, rheumatism, catarrh and gonorrhea. It is BLOOD POISON. Send to DR. BROWN, 65 Arch St., Philadelphia, Penn., for BROWN'S BLOOD CURE, \$2.00 per bottle; lasts one month. Sold in Salt Lake only by F. C. Schramm, First South and Main Sts.
