## Heart Weakness

The action of the heart depends upon the heart nerves and muscles. When from any cause they become weak or exhausted, and fail to furnish sufficient power, the heart flutters, palpitates, skips beats; and in its effort to keep up its work, causes pain and distress, such as smothering spells, short breath, fainting, pain around heart, arm and shoulders. The circulation is impeded, and the entire system suffers from lack of nourishment.

Dr. Miles' Heart Cure makes a heart strong and vigorous by strengthening these nerves and muscles.

"had palpitation and pain around my heart, and the doctors said was incurable. I don't believe it now, for after taking six bottles of Dr. Miles' Heart Cure, three bottles of the Nervine and three bottles of the Nerve and Liver Cure, I am entirely well again. I feel better than I have for five years, and it is all due to these remedies. I want you to know that your medicines cured me. It relieved me from the effects of the heart trouble, and I feel like a new man. It has done me \$1,000 worth of good service. I can eat any kind of food, drink water at all times, and pass a brick-like substance, and sometimes a slimy substance. I believe I would have died if I had not taken Foley's Kidney Cure."
