

## MINING, BUSINESS AND STOCKS

IMMENSE BODIES  
OF ORE EXPOSED

Franklin, Idaho, Has Showings  
Which Promise Great  
Things.

## BIG FOUR MINE DOING WELL.

Character of Ores Similar to Those of  
Llivia de Cobre Mines, in Sonora,  
Mexico.

## Special Correspondence.

Franklin, Ida., Nov. 17.—The mines of  
Maple Creek are improving with every  
foot gained, in quality and quantity.

The incline shaft on the Big Four  
mine is now down 50 feet and in this  
distance about three carloads of ore  
have been extracted that will do to  
ship to the Salt Lake smelters.

President John Gayman is driving the  
work as fast as possible with a day  
shift. A good log house has been put  
up; a blacksmith shop and an ore  
house is now being constructed, and  
the work will go on winter.

There are veins of copper ore here  
on Maple Creek that compare favorably  
with the famous ores of the Llivia  
de Cobre mines in Hermosillo, Sonora,  
Mexico. The detailed report of the 25th  
of last June on those properties in Mexico  
and the grade of assays and width  
of veins hardly equal some of the Maple  
Creek upshots of these copper-bearing  
veins. The Ivanhoe vein, a half  
mile south of the Big Four mine, is  
over 150 feet in width and shows on the  
surface croppings nearly a thousand  
feet in extent.

It is now generally felt that the future  
of Franklin as a mining center is  
assured. Little if any question exists  
as to the permanency of the ore bodies  
known to exist, and unless the camp  
later turn out to be the case the camp  
will some day occupy a high place in  
the ranks of the Idaho producers.

## ON 'CHANGE.

Business of Good Volume, Utah Stocks  
Were Favorites.

This morning's session of the Salt  
Lake Stock and Mining Exchange  
opened up in good shape and a fair  
morning's business was the result.

While the market was if anything  
quieter than usual, there was little  
or no evidence of weakness, and a num-  
ber of stocks made gains of a few  
points.

Nevada securities as usual were quiet,  
only Nevada Hills, Eagle's Nest, Lou  
Dillon, Nevada Fairview and Silver  
Pick showing in the day's transactions.

Of these Lou Dillon moved down from  
43 to 42 cents and Nevada Hills from  
\$3.75 to \$3.50. Silver Pick also sold on  
a falling market.

The day's transactions amounted to  
26,250 shares at a valuation of \$1,830,000.  
The morning quotations closed as follows:

at mine or at office, 411 McCormick  
block, Salt Lake City.

## MORE FIRE PROTECTION.

Searchlight, Nev., is constructing a  
100,000 Gallon Water Tank.

## Special Correspondence.

Searchlight, Nev., Nov. 17.—An im-  
mense water tank of 100,000 gallon ca-  
pacity is being constructed on Granite  
Hill overlooking the town, for fire pro-  
tection. The tank will be connected  
with the reserve supply of the Search-  
light Water company. Six-inch main  
are being laid in the principal streets  
with laterals every hundred feet to  
hydrants. The system will be thor-  
oughly up to date and fire drills will be  
part of the weekly entertainment in  
the future. Searchlight has never had  
a conflagration and the residents are  
preparing to keep down the danger of  
such a calamity to a minimum.

## BINGHAM CON. SUE.

Another Case of Damages for Alleged  
Smelter Smoke Injury.

Joseph H. Sissam today filed suit in  
the district court against the Bingham  
Consolidated Mining & Smelting com-  
pany to recover damages in the total  
sum of \$4,491 for alleged injuries to  
plaintiff's land, crops and stock caused  
by the smoke and fumes from defend-  
ant's smelter during the years 1903,  
1904, 1905 and 1906. He also includes in  
the amount above stated the damages to  
two of his neighbors' farms, the  
crops of which for which were assigned to  
plaintiff.

## MORE RUMORS.

But no Definite Announcement in the  
Case of Ohio Copper.

Once more the rumor is current in  
mining circles that the sale of the Ohio  
Copper property to Heine is an accom-  
plished fact. Gossip now has it that  
the last transaction in the sale of the  
property cannot be said to have changed  
hands on Saturday afternoon, and that  
the official announcement will follow in  
a day or so.

As the officers of the company nothing  
is to be learned that will in any manner  
shed light on the matter of the much  
talked of sale. Whether or not pay-  
ment for the property was made on  
Saturday cannot be said, and that railroad  
who ought to know say there is no  
question whatever as to the sale having  
taken place.

## RELIEF IN SIGHT.

Consolidated Mercantile is Soon to Have  
Adequate Supply of Fuel.

John Dorn, president and manager of  
the Consolidated Mercantile property, says  
that at last relief from the present  
fuel situation is in sight. On Saturday  
he learned that a supply of coal was  
enroute to the mine, and that railroad  
conditions were now such as to enable  
them to promise steady shipments.

## GIVES GOOD RESULTS.

Property in Erikson District Shows  
Values Which Lend Encouragement.

N. A. Peterson, a young mining man  
with interests in the Erikson mining  
district, is spending a day or so in the  
city on business connected with the  
property.

Mr. Peterson is here in the interests  
of Albert and Jacob Becker, who own  
two groups of 10 claims each in this  
district, on which they have been do-  
ing more or less work for years. The  
ground is said to show lead and silver  
values of fair amount, and enough de-  
velopment work has been done to justify  
the opinion that some day the property  
may amount to a mine.

## OPEN BOARD.

Ajax—1,100 at 32; 100 at 32 1/2.

IMMENSE PROFITS  
MADE IN STOCKS

Phenomenal Rise in Value of  
Goldfield Mining Se-  
curities.

## EXAMPLES OF QUICK RETURNS

Largest Profits Made by Those Who In-  
vested During Promotion Period. But  
Plenty of Opportunities Remain.

## (Special to the "News.")

Goldfield, Nevada, Nov. 16.—The  
profits that have accrued to investors  
in Goldfield stocks by the recent rise  
in the price of these securities is vari-  
ously estimated here at from \$50,000,000  
to \$100,000,000. The largest profits were  
made by those who acquired their hold-  
ings at the promotion period of the  
various mining companies operating  
here—when stocks that are now selling  
for dollars were selling for cents. Red  
Top, which is now selling around 50  
cents per share, was formerly sold at  
10 cents. Mohawk, which is now selling  
around \$10.00, was sold to speculators  
formerly at \$2.50. Jumbo, which is  
now commanding \$25 per share, cost  
the original holders 25 cents. Forty other  
stocks of Goldfield, Tonopah and Bull-  
frog, originally promoted on a basis of  
25 cents to the companies have supplied  
as many examples.

## POSSIBLE PROFITS.

The tremendous profits earned are  
now seeking investment and are being  
placed in new companies operating  
in surrounding districts. The edu-  
cated money, that is to say, the money  
of mining men on the ground, is all  
going in this direction. Within the  
past two months Fairview Eagle was  
sold to the public at 60 cents per share.  
It is now selling at 100 cents. The min-  
ing changes of the country and selling  
around \$1.50. Fairview Eagle's Nest  
was sold by subscription at 35 cents  
per share and is now selling around  
60 cents. Fairview stock of merit  
have the call here now, and new com-  
panies that are receiving subscription  
for treasury stock at from 25 to 50  
cents per share are literally swarming  
with subscriptions as soon as their  
books are opened. The Fairview dis-  
trict is making good.

## POLICY CONSERVATIVE.

Within the heart of the Fairview dis-  
trict at this time are seven properties,  
half of which could be shipping high  
grade ore. The policy of the conserva-  
tive policy which is being pursued by  
their managements. The next regular  
shipment from this camp will be the  
Wingfield-Nixon property, known as  
the Fairview Eagle. The share of this  
property is passing through ore which  
is increasing in richness with depth,  
but since its true character has been  
demonstrated, the management has  
been devoting its entire attention to  
opening up the great ore bodies which  
have been encountered therein. At a  
depth of 200 feet the ore is being  
shipped out, neither foot nor hang-  
ing wall having been encountered. This  
shaft is less than 200 feet from the  
Eagle's Nest Fairview, in which the  
ore is being shipped out. The ore is  
at a depth of 40 feet. There is every  
reason to believe that with the same  
depth the Eagle's Nest will be able  
to sack and ship ore of equally rich-  
ness.

## TWO NEW SHIPPERS.

With the same vein being opened up  
in the grounds of the Halstone com-  
pany, both Sullivan and Halstone com-  
panies with complete surface and hoisting  
plants and under the usual vigorous  
development methods of Vice President  
Paul, both Sullivan and Halstone com-  
panies are now shipping ore. It is safe  
to place these two properties as the  
next shippers in the camp.  
It is seldom that the initial years  
development of a single camp has so  
completely demonstrated the richness  
and permanency of the ore bodies, such  
as has been done in Fairview. So  
thoroughly have the business interests  
of the camp and the Sullivan and  
Halstone companies been demonstrated  
that it is safe to place these two prop-  
erties as the next shippers in the camp.  
It is seldom that the initial years  
development of a single camp has so  
completely demonstrated the richness  
and permanency of the ore bodies, such  
as has been done in Fairview. So  
thoroughly have the business interests  
of the camp and the Sullivan and  
Halstone companies been demonstrated  
that it is safe to place these two prop-  
erties as the next shippers in the camp.

## ENTERPRISE OF CAMP.

The idea is thoroughly in keeping  
with the enterprise which has put this  
camp upon the map. The Sullivan and  
Halstone companies are now shipping  
ore in so short a time. With the coming  
of the railroad and of ample water sup-  
plies by means of a new pipe line, the  
Fairview district is forging ahead with  
surprising rapidity. The coming of  
Ohio, best known to fame through his  
connection with the famous march  
through to the capital at Washington,  
has been a great help to the Sullivan  
and Halstone companies. The Sullivan

ping ore in so short a time. With the  
coming of the railroad and of ample water  
supplies by means of a new pipe line, the  
Fairview district is forging ahead with  
surprising rapidity. The coming of  
Ohio, best known to fame through his  
connection with the famous march  
through to the capital at Washington,  
has been a great help to the Sullivan  
and Halstone companies. The Sullivan  
and Halstone companies are now ship-  
ping ore in so short a time. With the
