MARKET WAS HESITATING. THE LEASE ON

THE BUCKEYE.

H. T. Sappington and the Sub Leasers Give Up the Fight.

BASE ORE IN THE MERCUR.

Has Lately Assumed Wonderful Proportions - Mammoth Strike -Main Ore Body Not Vet Found.

The lease and bond on the Buckeye mine at Diamond has been relinquished by H. T. Sappington, who has worked he property until quite recently. Mr. Sappington had a lease and hond on the mine that called for the payment of \$75,000 before August, 1901. After seturing the lease and bond Mr. Sapping. on organized the Buckeye Consolidated Gold and Copper Mining company and proceeded with the work of developing the mine. Since that time the shaft was put down 50 feet and a great deal of other work was done involving a less to Mr. Sappington of \$7,700 and to the company of \$700. The efforts to develop a mine were discouraging owing to the water difficulty, and some time ago a lease was given to Messrs Bates and Emerson by Mr. Sappington. These gentlemen have also spent considerable means to no purpose. Their business in bankers' bills at 4.8-6% for loss, it was said today, will run over demand and at 4.84% for 60 days; posted rates 4.85% and 4.896%.

Commercial bills, 4.83%64.84.

Commercial bills, 4.83%64.84. the shaft down to the 400-foot level from the 350 level, but were not able to get more than II feet when the water drove them out. About 25 gallons a minute was coming in at the 350 level while the last shot that was fired 11 feet deeper caused a flow of 120 gallons a minute in the shaft. The sub-leasers then went to work in the drift from the 350 level and extended it to about 100 feet from the shaft. On the way a small body of high grade copper ore was recently encountered besides some very fine galena. Both of these bodies were small, but they raised the hopes of the sub-leasers. The result was the marketing of a car of ore about ten days ago, which ran about \$15.50 instead of \$30 as expected. The beginning of this week witnenssed the shipment of two more cars, which have not yet been sold. It was stated today that \$1.50 per ton wa sold for one car while for the other \$15 was offered. The shipments have been made at a loss to Texns fed steers, 4.0005.20; Messrs, Eates and Emerson, who are lls, 3.25@3.75, said to have also given up their lease. Hogs-Reccipts today, 23,600; tomor-row, 18,000; left over, 4,256. Average about steady. Top, 5,60; mixed and butchers, 3,25@5,60; good to choice butchers, 3,25@5,60; good to choice achinery, and he felt he might as wel throw up the sponge first as last. Sappington has still a good deal of faith in the property, and says that f he owned the property he would risk

AT THE MAMMOTH.

The Main Ore Chute Not Yet Encountered on 1900 Level.

President Sam McIntyre of the Mammoth Mining company reached town this morning after a stay of several this morning after a stay of several days at the mine, whither he went on Saturday last to investigate the two strikes then reported. Mr. McIntyre felt there was nothing more to report about the strikes than had been said. It was too early he thought to talk much about the 1900 level. A three foot year of me had been cross-cut on that cin of ore had been cross-cut on that level but comparatively nothing had been done to determine its value. Some hand samples showed two or three ounces in gold with from 10 to 20 per ent copper, but they were not criteriwhich was rather patchy at that point The men have driven some distance past the vein, and while the drift is in very promising veln matter, the main ore chute from the 1800-foot level has not yet been intercepted. Mr. McIntyre is of the opinion that it has been passed, s it was expected to be reached nearer he shaft. The air is not good at that pth, but as soon as possible an up-se will be extended in the vein. Other nen will also be put to work crosscutipated the ore chute from the 1,800 Ill be tapped.

has yet been done at the strike on the 800, though it is known to winze from the 700 jevel, as the vibrations from the shots on that level are quite distinct.

THE MERCUR MINE.

Base Ore Bodies of Immense Magnitude are Disclosed in the Mine.

> Manager George H. Dern came in from the Mercur mine last evening and sports a big change in the mine's contion. The pending deal with the turing the past few weeks to devote onsiderable attention to its base ore reserves, which, in the past, were always avoided in the search for oxidized ore. The base ores are known to conmine. The recent developments have itselesed some very pleasant surprises, not particularly in the grade of the base ore—that had already been proved run up to more than \$39 per ton in ces-but in the magnitude of the de-its. These ore bodies have been fted on and cross cut in a number of es, every one showing magnificent es of base ore which contain avera values which are said to run much tier than \$20 in places. So impressed we the directors become with the sent showing that the chopping off the negotiations with Capt, De La-r has been talked of among them. s, it is stated authoritatively, has yet been done, but, reading between lines, it is easy to see that it is of the probalitities of the near fuire. As soon as this is done the Mer-ir mine will be supplied with a com-lete roasting plant of its own. This already the feeling of some of the directors if the present deal falls

A VERY RICH STRIKE. Made in the Rising Sun Claim on Shaw's Mountain, Idaho.

Developments of the past few days emonstrate beyond all question that the mines on Shaw's mountain are thong the most valuable opened in State in many years, says the Statesman. The War Eagle Bolse Statesman. Consolidated company has devel-oped at depth a second of the ore chutes known to exist on the properties it is working, and it is found to

be much better even than that hereofore explored. The strike is in the Rising Sun claims the drift that has heretofore been oken of in these columns. At the lead sulphide ore that assays \$687 to the ton. Careful average samples were taken, one of which returned 1850 and the other \$687. There is in addition 12 inches of lower grade ore. This has not been sampled, but is thought to be worth about \$200 per ton. Ore from the rich chute shows gold large quantities. The ore carries ad, and ifon, and gold is spotted lead, and ifon, and gold is spotted about all through it. The strike was made on Saturday last, and there is already several tons of this high grade

This strike is made in the drift that is being run east on the Rising Sun claim from the McCarty tunnel. The drift was run about 40 feet through barren ground, the vein being a mere seam. It was started for the purpose of reaching the ore chute shown in the surface works. The first ore found assayed \$8 a ton, but the values increased with every foot of de-velopment, and on Saturday the bonanza ore came in as stated.

Election of the Big 14.

The Big Fourteen Consolidated Mining and Milling company held their annual election last Tuesday evening and elected an entire board of directors. The selection was carefully made and from the names given out it is probable that development work on the Big Sun-flower group of claims will be pushed with more energy than ever before. The new board consists of the following; Andrew Corry, Dr. G. W. Middleton, David Haight, M. D. Higbee, John S. Woodbury, Daniel Perkins and R. H. Palmer. It is understood that Col. Corry offered to pay the full face value, 10c. per share, for certain block of the stock of the company.—Iron

De Lamar's Nevada Mines.

In a description of Capt. De Lamar's mines at De Lamar, Nev., the correspondent of the San Francisco Mining and Scientific Press says: The De Lamar group extends across what is lo-cally known as Lookout mountain, covering a great quartite lode, trends nearly north and south. property is opened through a series of tunnels, cutting into the mountain on above another, following the strike of the mineral zone northward. The forper cent silica, and is somewhat broken by porphyry dykes cutting diagonally through the otherwise regular quartzite strata. While the mineralized shoots are referred to as veins, and ledges, there seems to be an absence of distinct wails or vein matter distinguishillustrate this, it may be cited that exare unable as a rule to discriminate beween ores or high grade and those carrying practically no values. But it seems to be a case in which a great zone of the country rock has been mineralized by infiltration of gold in

The ore is stoped out in immense chambers, many of which are from 40 o 100 feet wide and 80 to 200 feet long, well timbered up in square sets and as the work proceeds upward the space between sets is filled with waste. Thus work goes on from level to level and horizontally on some excellent specimens of mine timbering. An illus-tration of the system employed is seen tration of the system employed is seen by the general superintendent's mine chart, on which is recorded the assay value of the ore from every block or-square set on any level or stope in the mine. From forty to fifty assays are made each day from ores collected by the sampler, from which the daily record is made up.

As is generally known the mill is a cyanide reduction plant, in which the

cyanide reduction plant, in which the ores pass through a coarse crusher, thence through Griffin mills, of which there are thirteen in number, and by which the material is ground to from 60 to 80-mesh. It is carried by conveyors and elevators to the pulp tanks and leaching vats. The infinitesimally fine dust particles are blown into five collectors, caught in the collector stock-ings, from which the air escapes and the dust is thrown down to a conveyor which carries it to the cars and thence to the leaching tanks. The dust thu saved contains a high percentage of value. The mill crushes about 300 tons of ore per day. The leaching tank capacity is 9,000 tons per month and abou 3,200 tons of material are constantly in course of treatment through the m Two large vacuum tanks serve th purpose in drawing the liquid fro the leaching tanks to the precipitatir room, where zine dust is used inster of zinc shavings. The equipment to reducing the auro-cyanides to bullies is quite complete, and once a month the gold bars are shipped in a burglar-proo safe to Salt Lake City.

MINING NOTES. The Centennial-Eureka marketed

SHEEP AND WOOL.

Iron County Record: The Codar Sheep association will commence shear-ng their sheep next Monday at Iron

The Sanpete County Democrat of April 25th publishes the following: James Clinton, the wool-buyer, has been in the city the past week buying all the wool he could contract for. Mr. nton paid cash and the prices ranged om 15% to 16% cents a pound.

It is estimated that the wool clip at the R. G. W. corrals will reach a half a million pounds. About 3,000 head a day are being turned out, and there are still twelve or fifteen herds booked for shearing.

The Central Utah Wool company has several buyers out at present in quest of wool. The company expect their full share of the business this season. Several herds of sheep in the south end of the county are troubled with the disease known as the "big head." While the disease is not particularly fatal, yet it is much dreaded by sheepmen, as the herd is usually left in bad condition after an attack.

The Laramie Boomerang says: It is estimated that the production of wool in Wyoming in 1900 will reach 20,000,000 pounds. At 18 cents per pound this will bring to the State the handsome income of \$3,600,000.

A large wool-washing plant is to be erected at Las Vegus.

Timnath correspondent Fort Collins Express: Sheep shipments for the week have been very light, amounting to ony six cars belonging to E. A. Parties returning from the last week's shipments wear very pleasant smiles and a bulged pocket. Those who sold at a top price were F. P. Kearn, H. G. Springer, W. B. Akin and Benjamin

Denver Stockman: A single sheep in the flock of Bayless & Berkalew at Oracle, Ariz., yielded twenty-four pounds of wool.

WESTERN LAMBS.

Though receipts of sheep and lambs were only a few thousand less for the week than last week the supply of Western lambs showed a marked The trend of the trade downward, and this fact no doubt had a tendency to check the shipments to market. The Drovers' Journal printed about 11,000 in its sales, which ranged in price from \$7.20@7.45, being 10@15e lower than the prices of the previous week, but generally \$1.50 higher than a year ago. The following table gives the receipts for the week, and prices with the same week in 1899:

PERFECT DINING CAR SERVICE
TICKET OFFICE 163 West Second South
street (Postoffice corner).

THE MEALS ARE ALWAYS GOOD.

"The train is crowded with agreeable surprises, but it is in the dining car that one is most impressed with the Burlington's superiority. Now, without being too utterly dainty, I am exand about the way they are served. For breakfast all I want is eggs, rolls, and coffee. In a Burlington dining car I am able to get just what I want, just what I would have at my own table, and for the small sum of fifty cents, The exquisite neatness of the napery makes a good meal taste all the better."

Interview with a Denver merchant. and about the way they are served Interview with a Denver merchant.
