Chinese Who Drag Carriages

An excellent opportunity of observ-tree the merial means of propulsion in the flying fish was afforded me during a six day's caim lately when crossing the Bay of Bengal. I watched day by the Bay of Bengal. I watched day by day some hundreds rise under the bows miles at a stretch. Would not the most day some hundreds rise under the bows of the ship. The water surface was a glassy caim. As each fish rose it spread its wines at once, apparently beating transferred European athlete or petter-son? Moreover, these coolies have to content themselves at the end of their ne surface with them two or three strokes before they steadied out. I journey with 5 cents-a cent is a frac-strokes before they steadied out. I tion less than a halfpenny. They exult sav apparently, for it was not a definite if they receive ten cents, and consider beat so much as a struggle to rise. the donor an utter fool if he gives them The tail which, of course, under water 15 cents.-Cornhill Magazine.

beats, which could be counted by the

Ardent Spirits in Prussia.

As each fish lost the impetus of the Herr Oppenheimer, British cousul general at Frankfort, Germany, has refirst rise, which generally happened at about forty yards, the binoculars cently made a report to the crect that showed us the anal flus, which had till the people of Prussia are among the now been fully extended, drooping to greatest consumers of distilled liquors feel the water. As soon as the surface in the world. He states on the autorwas felt the tail was introduced and ity of the official records that distilled spirits were sold in 93,000 houses in apt are people to go in droves that it is quite likely these proportions could hold in 3,000 names, or in any other five or six smart strokes, also indicated by ripples, brought the impetus up russia, in 1880, and that the cost o avain and carried the fish about anothe iquor at wholesale was \$65,000,000. hirty yards, when another droop sent admits that few of the cultivated and wealthy people drink auything strong-It on again, and so forth, some of the older fish traveling in this way 400 to er than wine and beer. But the work 500 yards. The younger fish frequently ngmen drink much more ardent spirits fell awkwardly in this attempt to re-gain impetus. When waves are runthan the people of any country except Russia, Denmark and Sweden. He de ning it requires a clever fish to gain imclares that the laborers of England are petus by a few judicious strokes on the much more temperate than those of crest of a wave, and many a fish tum-I northern Germany: that the workinges over in the attempt. men in Prussia drink on an average siz I once saw a fish rise close to the ship's quarter, and it fiew parallel with glasses of schnapps daily per head. He declare on the authority of Dr the ship, pursued below by a dolphin or bonita. The latter followed every Baer, head physician of the Plotzensee prison, that most of the crime in Gersway of the flying fish, keeping almost many is primarily due to the use of under it. At the first dip of the tail liquors. According to his slow, creeping sluggishly through his distilled the pursuer made a dart forward, but missed it, and again dodged its prey by estimate, 41 per cent of the prisoners veins, like muddy water in a canal; the throughout the empire are confined for acts committed under the influence of pher is clear and quick, brisk as a throughout the empire are commuted of acts committed under the influence of intoxication. Twenty per cent of them intoxication. Twenty per cent of them Try, therefore, to sct your blood in Try, therefore, what a smart keeping just under it. On the second dip the tall went into the pursuer's mouth, and there was an end of the It always struck me that it memed a strain on the fish to keep the suicides in Prussia are committed by persons intoxicated.
