

CAPTURED AND PLACED IN PRISON

Escaped Convicts, Parry and Hunt, Traced to Their Hiding Place.

WEST OF THE JORDAN RIVER

Hounds Did Splendid Work and Parry's Sister Unwittingly Did the Rest—Surrendered Quietly.

The escaped convicts were captured last evening, west of the Jordan, close by the Salt Lake railroad track, as the result of stratagem. The hounds yesterday picked up the trail a mile and a half down the stream, and made a great ado over it, so that the guards who were in the search for Hunt and Parry at once concluded that they were onto the game. The trail was followed by the dogs across the river, and there they were. However, this was clue enough for the pursuers reasoned that the escapees were within reaching distance somewhere, and they reasoned pretty near right. The dogs were sent home and the warden notified. He directed the guards to watch the house of Parry at Fifth West and South Temple streets, and detailed Guards Jamney, Ure, Hilton and Stowe to shadow the men. The men concealed themselves close by the Salt Lake tracks and awaited developments. The country south of that point had been carefully gone over earlier in the day, but without result, but it was believed that something would develop by watching the Parry house.

About 9 o'clock in the evening a young woman was seen to come from the house with a flour sack under her arm filled with something. She walked rapidly westward, and on crossing the river began to whistle cautiously. When two blocks west of the stream, Parry appeared from a clump of willows beside the track, and came up to meet her. She gave him the sack and he was bringing clothes and provisions. The guards were close at hand, and the couple were immediately surrounded. The girl was terrified as her brother was covered by the revolvers of the officers, and implored them not to kill him. Parry attempted no resistance, but quickly surrendered and was directed to point out where Hunt was. The second man was found near by under a clump of bushes, and he, too, surrendered at discretion, without the least show of resistance.

Hunt and Parry were quickly handcuffed together, and as they declared they had had nothing to eat since Monday at noon, they were taken to the house near by and then taken back to the prison. The men said they had slept in the hills east of the prison Monday night, and on the day following made a circuitous tour south of the city to the west of the Jordan. Parry wrote to his folks to give a helping hand, and in response the sister was taking provisions and needed clothing for their relief, and the guards followed and made the capture as noted. The convicts were clad just as they left the prison. Parry having been all the time without a coat. By this escape, Hunt and Parry will lose the time gained by previous good behavior, and may have additional time added to their sentences.

CAN CURE BESSIE KNECHT.

Cambridge Physician Offers to Do it For \$300.

A Cambridge physician, Charles W. Smedley by name, has telegraphed the parents of Miss Bessie Knecht, now in a comatose condition at the Holy Cross hospital, that he can restore the girl to perfect health. If he fails there will be no charge, but if he succeeds he wants \$300. It is hardly probable that the offer will be accepted as physicians here state that a man who would solicit business in this manner is undoubtedly a quack and therefore not worthy of any notice.

Knecht continues to grow weaker and unless something is done before long death must certainly ensue. The girl's food is all the nourishment she gets and this has to be administered automatically. The physicians can do nothing further for her and her chances for recovery are none, are very slight. There is one remedy, however, who is daring enough to suggest a remedy. He is Alexis Constantin Carl Fruhl, who announces himself as the founder of astro-physiology. His remedy is that of a person of opposite temperament to that of Miss Knecht, who uses tobacco and is of strong physical strength, shall grasp the young woman by the hand and, while a person holds a bowl of water in cold water at the base of her brain, rub his free hand back and forth over her forehead. He asserts that she will thereby be awakened from her slumbers.

ARBOR DAY.

Governor Wells Designates April 15 as Tree Planting Day.

Wednesday, April 15, has been named by Gov. Wells, in his proclamation issued yesterday afternoon, as Arbor Day, and it is recommended that the people throughout the state observe the day by planting trees, shrubs and vines and otherwise beautifying their grounds with public and private.

In pursuance of law it is hereby proclaimed that Wednesday, 15th day of April, 1903, is a public holiday, to be observed throughout the state as "Arbor Day," and it is recommended that all the people devote themselves to the proper observance of said day in the manner prescribed by law, namely, "in the planting of trees, shrubs, vines, in the promotion of forest culture, in the beautifying of public and private grounds, places and ways, and in such other efforts and undertakings as shall be in harmony with the general character of such holiday."

Especially is it enjoined upon officers and teachers of the schools that instruction be given and exercises prescribed.

STRANGER THAN FICTION.

A Remedy Which Has Revolutionized the Treatment of Stomach Troubles.

The remedy is in the form of pleasant tasting tablets or lozenges, containing vegetable and fruit essences, pure aspartic peptin (government test), golden seal and diastase. The tablets are sold by druggists under the name of Stuart's Dyspepsia Tablets. Many interesting experiments to test the digestive power of Stuart's Tablets show that one grain of the active principle contained in them is sufficient to thoroughly digest 3,000 grains of raw meat, eggs and other wholesome food.

Stuart's Tablets do not act upon the bowels like after dinner pills and cathartics, which simply irritate and inflame the intestines without having any effect whatever in digesting food or curing indigestion.

If the stomach can be rested and assisted in the work of digestion it will very soon recover its normal vigor, as no organ is so much abused and overworked as the stomach.

This is the secret, if there is any secret, of the success of Stuart's Tablets, a remedy practically unknown a few years ago and now the most widely known of any treatment for stomach weakness.

The success has been secured entirely upon its merits as a digestive pure and simple because there can be no stomach trouble if the food is promptly digested. Stuart's Dyspepsia Tablets act entirely on the food eaten, digesting it completely, so that it can be assimilated into blood, nerve and tissue. They cure dyspepsia, water brash, sour stomach, gas and bloating after meals, because they furnish the digestive power which weak stomachs lack, and unless that lack is supplied it is useless to attempt to cure by the use of "tonics," "pills" and cathartics which have absolutely no digestive power.

Stuart's Dyspepsia Tablets can be found at all drug stores and the regular use of one or two of them after meals, will demonstrate their merit better than any other argument.

that will illustrate as forcibly as possible to the children, the state the importance of beautifying their homes, of ornamenting their surroundings and performing their share in the great work of planting and growing trees and verdure, both for their own benefit and enjoyment and for those who live after them.

In testimony whereof I have hereunto set my hand and caused the great seal of the State of Utah to be hereto affixed this 2nd day of April, one thousand nine hundred and three.

[Seal] HEBER M. WELLS, By the Governor. J. T. Hammond, Secretary of State.

Buy the Royal Blue Branch of Shoes for men. It is the best shoe to be had only at 217 So. Main St.

After La Grippe—What?

Usually a hacking cough and a general feeling of weakness, often leading to fatal results after the patient is supposed to have passed the danger point. Foley's Honey and Tar is guaranteed to cure the "croupy cough" and make you strong and well. It never fails to stop a cough if taken in time. Take no substitutes. Sold by Johnson-Pratt Drug Co.

THE HUTTON MYSTERY.

What Husband Has to Say Concerning Conduct of His Runaway Wife.

Mysterious Mrs. Hutton continues to reside at the Manitou with her faithful attendant, Mrs. H. H. Hart, who has been with her since the flight from San Francisco. Her husband, Police Commissioner Hutton, since his return home has been interviewed by the San Francisco papers and he claims that her attorney, D. M. Delmas, overcharged his fee for selling her property, to the extent of \$5,000, while Delmas avers that he was to receive 10 per cent of the selling price. In his answer to the suit the attorney denies that he instructed Mrs. Hutton in any form and that he simply carried out the instructions of his client. A San Francisco paper quotes Hutton upon his return as saying:

"By a ruse arranged with the police I learned the number of her room, and immediately on my arrival went to it. Mrs. Hart summoned the landlady and ordered me out, but I stayed until I had talked to my wife. I found that Delmas left this city on the 18th, arrived at Salt Lake on the 18th, and registered at the Knutsford; stayed until the 19th and reached San Francisco on the 21st. In my judgment Mrs. Hart is acting with Delmas. I told the police before I left to care for my wife, and he said he would. An attorney named Rogers is acting for Delmas in Salt Lake, and the sheriff's office there seems to be co-operating with him. My wife is practically a prisoner, with \$5,000 of her money gone and people around her ready to take what she has left. I wrote to her before leaving Salt Lake, warning her against her advisers and telling her to come to me when all her money was gone and she should want for nothing. I am her protector, and by the time I get through I'll have balanced accounts with some one."

SUSPECTS ARE ARRESTED.

Policemen Gather in Three Men and Takes Them to the Station.

Three smooth grafters who were evidently in town waiting for the arrival of conference visitors to work some of their crooked games and reap a harvest, were run down and arrested by Officer Davies yesterday afternoon near the Rio Grande Western depot and locked up for safe keeping, and will no doubt spend conference time behind the bars of the county jail. The men, when taken to the police station, gave the names of W. B. Bailey, Myer and C. E. Woodard. They claim the east as their residence. Each man had between \$25 and \$50 in cash on his person and also some diamonds and other jewelry.

For several days past robberies and thefts have been reported to the officials of the Rio Grande. Just a few days ago an old man who was on his way to St. Louis was robbed of \$40 and his railroad ticket. He said that when the train stopped three men rushed into the Pullman and notified the passengers that the car was being detached from the train. During the rush of the passengers for exit, the men got in their good work and relieved the old gentleman of his pocketbook. One of the men arrested by Officer Davies was identified as being in the car when the robbery was committed.

The three grafters approached a young man yesterday at the depot who was waiting for his train and invited him to engage in a game of three-card monte. He accepted and just as the game was about to begin, Officer Davies entered the room. The three men hastily retreated and ran back down the street. Davies gave chase. Two of the men took one course and the third took another. The officer pursued the two men, and a bystander who witnessed the affair, gave chase to the third man. The three men were captured and taken to the police station. The officers believe that they have made a good capture.

THE WONDERFUL SHADOWGRAPHS

About the Marvelous Properties of New Chemical Metal Radium.

MOST EXPENSIVE SUBSTANCE.

A Single Pound of It, if Obtainable, Would be Worth More Than One Million Dollars.

Special Correspondence.

Boston, March 28.—Some very curious and interesting photographs—or shadowgraphs, as they might better be called, perhaps—taken recently in the photographic department of the Massachusetts Institute of Technology illustrate the properties of the new chemical metal radium—one of the so-called radio-active salts which have recently startled the scientific world by demonstrating that an X-ray picture can be taken without the X-ray apparatus.

This remarkable metal—which takes the form of powder and is one of several similar agents obtained by a series of delicate chemical operations from the mineral pitchblend—gives out rays having many of the characteristic properties both of the cathode and the X-ray. They pass through substances ordinarily impervious to light and the pictures taken with them are the same practically identical with those taken by means of an X-ray machine.

Radium is the most expensive of all known substances, its value being literally many thousand times its weight in gold. A single pound of it, if such an amount were obtainable, would perhaps be worth well over \$1,000,000. In the few grammes of powder used in making the institute pictures, for example, there is only about one per cent of the substance that actually produces the picture-taking ray, this small quantity being so powerful, however, that satisfactory negatives can be secured even with so short an exposure as 15 seconds; and, in the opinion of scientists who have been especially engaged in investigating its curious properties, its power is practically inexhaustible. We may believe, indeed, that thousands of years from now the same sample of radium would accomplish the same result that it does today, and yet it would have been emitting its wonderful rays during every instant of the thousands of years.

Taking a picture with radium is a much simpler matter than taking one with an X-ray machine. The powder is kept in a small box—not unlike the canes in which the old-fashioned daguerotypes were framed—with an inner cover of thin celluloid to hold the precious substance in place when the box is opened and its invisible power turned in the direction of the object to be photographed. The radium itself is a harmless-looking, yellowish powder that can be seen to glow dimly when the eye of the operator has become accustomed to the surrounding darkness; but the photographer must work in absolute darkness, for the seemingly magic rays, although they have slight illuminating power, act upon a photographic plate much as sunlight does.

The picture-making mechanism consists simply of a sensitized plate and the little box of radium. The article to be photographed being placed between them, either in direct contact or with an intervening space of a few inches. As with the X-ray, the power of radium varies with its distance from the object photographed; the nearer the metal is held to the object, the clearer is the impression and the shorter the time necessary to secure good results. The pictures obtained at the institute—which were not taken for experimental purposes, but simply to illustrate the properties of a new, and perhaps revolutionizing, chemical substance—are not identical with X-ray pictures, however, for it has been found that silver, for example, offers less resistance to radium than to the X-ray. Whence comes the power of this dim-glowing powder to penetrate many substances ordinarily opaque to light is one of the questions that scientists have yet to answer. Various theories have been propounded in France—where the properties of the radio-active salts were first discovered, more or less by accident, like many another scientific phenomenon—in Germany, in England and on this side of the water. One theory is that radium sends out countless rays of very short wave length, which are but little obstructed by cloth, paper, celluloid, flesh, and some other substances, but cannot pass through such denser media as metals, wood, or bone. Another supposes that radium is continually throwing off little invisible bits of matter, smaller than the atoms which were so long considered the limit of material divisibility. Indeed, it

REBUILT BOTH

A Change in Food Can Do Wonders.

When a change in food and drink will totally make over people it is worth while knowing the kind of food and drink used, particularly when in the making over, the old aches, ails and diseases are eliminated. A lady in Louisville, Neb., says: "Husband and I were both coffee drinkers. He was always troubled with dyspepsia, and I had an addition to stomach trouble, a serious bowel disorder and was so terribly nervous that I would scream at the slightest noise."

"The pain in my stomach continued from morning to night, and in the afternoon, I was so tired all the time and never could get rested, it was all I could do to drag about. My nervousness kept increasing until finally the doctor said I must be taken to a different climate because I was getting weaker all the time, and then could hardly walk across the room."

"I had read many testimonials of the good that Grape-Nuts and Postum Food Coffee were doing for people but never thought they applied to me. However, my ever kind husband, one night brought home a package of each. I had tried to quit coffee but every time a terrible pain would come in my head after each meal. "In a day or two I began to improve. That was seven months ago. My improvement has been so steady that now instead of being a miserable, nervous wreck, I am a strong, healthy woman weighing 140 pounds, can work from daylight until dark with a life and spring about me that I have never had."

"I use two pounds of Grape-Nuts each week and drink Postum Food Coffee twice a day, and expect to as long as I live for it has been a godsend to me and mine."

"Husband quit coffee and took up Postum when I did. His dyspepsia entirely disappeared and he has never had a return of it." Name given by Postum Co., Battle Creek, Mich.

After Sickness

Take Vinol—Our Great Strength Creator.

IT GIVES ONE A SPLENDID APPETITE.

AND QUICKLY REBUILDS THE SYSTEM.

We Will Refund the Price of Vinol if It Fails.

The worst part of sickness, frequently, is getting over it.

The patient's strength is depleted, his system is generally demoralized, relapses are continually feared, and, naturally,

The one thing to aid recovery is to give the patient that which will enable him to get strong, and at the same time give strength direct to the different organs of the body.

Nothing will do this like Vinol.

It acts directly on the stomach, creates a healthy appetite and enables the digestive organs to obtain the necessary elements to increase the weight of the patient and to make new healthy flesh and muscle tissue and pure, rich, red blood.

The following is a letter showing where Vinol was taken and did good after a case of sickness. It reads as follows:

"I wish to certify to the very great benefit which has been derived from the use of Vinol in my family. My wife was very sick with the grippe and afterward was wholly run down. One bottle of Vinol places her on her feet in better condition than she had been before in six months. I heartily recommend and endorse it."—HENRY F. STURTEVANT, 81 Huntington St., Brooklyn, Mass.

Everything that is in Vinol is plainly printed on the label of each package.

We know Vinol is a splendid preparation, and in many cases we have been able to see for ourselves the wonderful results it brings about.

Remember that we guarantee Vinol and refund the purchase money if you are not satisfied.

THE SMITH DRUG CO., DRUEHL & FRANKEN, DRUGGISTS

is necessary in this case to think of an atom as divided into two parts, one charged with positive and the other with negative electricity. In explanation of the radium photograph, one must further picture that these infinitesimal particles, hurled into space by the chemical, pass through certain substances and splash, as it were, against the sensitized plate, which they thus affect everywhere except where their passage is retarded by the denser media. The result is, of course, the outline, or shadow, of the more opaque portions of the object interposed between the radium and the plate, being in proportion to the resistance offered to the rays.

Radium apparently keeps its curious property indefinitely, as has been said, the storing up process being as mysterious as the disappearance of the gold in the Arabian Nights entertainments into his copper cylinder. Among the pictures taken by the young scientific photographer at the institute is one made with nitrate of uranium, another of the chemical substances producing rays that have this peculiar penetrating power, although in a much less degree than the radium especially prepared for the purpose. The nitrate of uranium used to obtain this negative had, it so happened, been stored away for years and any power it might have possessed originally could easily be imagined to have been lost in the interim. But the result was a very fair outline picture, though it was not so clear as those made with the little box of radium and required a longer exposure.

Pneumonia Follows a Cold

but now follows the use of Foley's Honey and Tar. It stops the cough, loosens the lungs and affords perfect strength from an attack of pneumonia. Refuse substitutes. Sold by Johnson-Pratt Drug Co.

HORRIBLY MUTILATED.

James Orr, a Park City Miner, the Victim of an Explosion.

James Orr, a Park City miner, lies at the Holy Cross hospital in a critical condition as a result of injuries received while working in the Valeo mine. The unfortunate man, it appears, was setting a charge in the mine when it exploded prematurely, lifting him into the air and blowing him several yards along the drift. The man was horribly mutilated and when found by his companions was crying piteously and presented a ghastly sight. The fingers of both hands were blown off, one eye was blown out of his head and his skull was fractured, besides his face and chest being badly cut and bruised. The injured man was brought to this city yesterday and placed in the Holy Cross hospital, where he was operated on by Drs. Richards and Baldwin, who did all they could to make him comfortable. His doubtful if he will survive the shock.

MARRIED IN DENVER.

Miss Winnifred B. Jones, a Salt Lake Girl, Becomes Mrs. B. A. Fleming.

The many friends of Miss Winnifred B. Jones in Salt Lake, will be surprised to learn of her marriage, which took place at the home of Mr. and Mrs. G. W. Weaver in Denver last night, the groom being Benjamin A. Fleming of Philadelphia. Miss Jones was for many years a resident of Salt Lake and was a niece of the late Bishop Elias Morris. For some time she was employed in Z. C. M. I. and her amiable nature won for her many friends and made her a favorite among all who knew her. Her husband is a director and one of the most prominent members of the Belmont Driving Club, Philadelphia, but for the past two years he has been residing in Denver, having gone there for

WALKER'S STORE!

A SALE FOR MEN.

CLOSING OUT 300 SUITS—THE LAST OF OUR CLOSING STOCK. CLOSING OUT HATS.

WE announce for Saturday, and until all are gone, the most extraordinary offering of Men's Suits.

Almost 300 suits were left over from our last fall closing out sale of men's clothing. Left over?—for being spring suits. If you then don't mind a season behind suit, here's the greatest bargain find any man ever had. Let the items speak for themselves.

Men's Suits up to \$15.00 for \$5.00.

Cutaways and Sacks; worsteds and chevots in all colors and black. Spring weight. A few flannels. All sizes.

Men's Coats and Vests up to \$20.00 for \$6.

Two pieces. Cutaway coats with vests, principally worsteds. A few black Prince Albert Coats. All sizes.

Youths' Spring Suits, \$10 to \$15 for \$4.

Long trouser suits. Sizes 15 to 19 years; flannels, worsteds and chevots; all colors and stripes.

Youths' \$5 to \$10 Suits, \$3.

All sizes. Nearly all colors.

Men's Trousers up to \$5 for \$1.75.

Worsteds, chevots, flannels. All sizes.

Men's Vests to \$5 for \$1.

Fancy Vests. Not very many. While they last.

MEN'S HATS—up to \$4 for 75c.

Stetson and many other first-class makes. Derby, Fedora, Crushes. Tan, brown, black. All sizes.

Sale in Basement. Take Elevator.

Walker Brothers Dry Goods Co.

the benefit of his health. The happy couple will tour Colorado and in the summer will make an extended visit in Philadelphia.

Raw or Inflamed Lungs Yield quickly to the wonderful curative and healing qualities of Foley's Honey and Tar. It prevents pneumonia and consumption from a hard cold settled on the lungs. Sold by Johnson-Pratt Drug Co.

The Sola Royal Blue Branch of Shoes is the best on the market and can be had at 217 So. Main St.

ANOTHER CARLOAD OF PIANOS.

Low Price. Easy Terms. Conference visitors who want a good piano or organ at the right price and on easy terms, should see our special line of fine instruments. One price system. First class tuning.

VANSANT & CHAMBERLAIN, 32 Main St., directly opposite Z. C. M. I.

The new Irrigation Law, in pamphlet form, only 10c at the Deseret News Book Store.

Walks Without Crutches. I was much afflicted with sciatica, writes Ed C. Nud, lowville, Sedwick Co., Kan., "going out on crutches and suffering a great deal of pain. I was induced to try Ballard's Snow Liniment, which relieved me. I used three 5c bottles. It is the greatest liniment I ever used; have recommended it to a number of persons, all express themselves as being benefited by it. I now walk without crutches, able to perform a great deal of light labor on the farm." 25c, 50c and \$1.00 at Z. C. M. I. Drug Department.

The new Irrigation Law, in pamphlet form, only 10c at the Deseret News Book Store.

Loss of Appetite. A person that has lost appetite has lost something besides—vitality, vigor, tone.

The way to recover appetite and all that goes with it is to take Hood's Sarsaparilla—that strengthens the stomach, perfects digestion and makes eating a pleasure. Thousands take it for spring loss of appetite and everybody says there's nothing else so good as Hood's.

STAKE CONFERENCES.
