BABY'S ITCH EASILY CURED

Infantile Eczema Quickly Relieved by External Use of Oil of Wintergreen Compound.

Infantile eczema, which has baffled the skill of the best physicians for so many years at last seems to be curable and curable with great ease.
Results of the last two years indicate conclusively that baby's itch, infantile eczema and other skin diseases of children can be very simply cured by the application of a compound composed of oil of wintergreen, thymol and glycerine, as in D. D. D. Prescription.

The Rev. Lewis Steele of Weatherly, Pa., writes:
"Our baby boy's little face was so dreadfully covered with eczema that blood and water ran from the sores nearly all the time. After using 3½ bottles of D. D. D. Prescription we are so happy to tell you he is entirely cured and the disease has never broken out again. If this letter is in any way a help to other sufferers, you may publish it."
If you have a child which is suffering with this terrible itch, we are sure you will not neglect one hour to give your baby the relief we have so quickly found. It often how quickly the remedy mentioned above takes the itch away at once and how all the cures seem to be permanent; we have seen too often to hesitate at all in recommending the remedy for your children.
Druehl & Franken and Z. C. M. L. Druggists.

James Neville, Thomas Howard and Charles Stoker, each speaking of the noble character of the deceased. She leaves a husband and seven children; an aged mother and a large family of brothers and sisters to mourn her departure, besides a host of acquaintances who held her in the highest esteem.
