LECTURES ON SOCIOLOGY.

Prof. J. T. Miller, formerly a professor at the L. D. S. university, was the principal speaker at last night's meeting in Socialist hall, his theme being the growth of sociology. He said in

"I know that the growth of our party in this state and city has not party in this state and city has not been rapid, nor as marked as it should be, and yet there has been a growth, one that gives us continued hope and proof of its field in this country. I was impressed the other day by the was impressed the other day by the remark of a prominent Democrat of this city when he said that in the near future there would be but two poli-tical parties, the Republican and the Socialist. We see a fight ahead and a big one, but we will see a closer draw-ing of lines and fewer and fewer an-tagonists. It will be intelligence and education that will win for us in the end. Every day we see our ranks swelled by educators, men who occu-py chairs of the great institutions of learning in the country. From a simon pure study of the problems of sociolo-gy they have been forced to admit the soundness of the Socialist party politic ally and of the principles of the co-operative commonwealth. You ask why Socialism is not taught more in the locitiutions of heaving. Socialism is not taught more in the institutions of learning. It is because they are for the most part endowed by capitalists who are opposed to So-cialistic teachings."

COLD IN DENVER.

The present beautiful weather is in gratifying contrast with the zero weather obtaining just east of the Rocky mountains, where the inhabit-ants are wont to boast of their ideal climate. The following clipping from Friday evening's Denver Times, in this connection tells on interesting story: Friday evening's Denver Times, in this connection, tells an interesting story: Coldest November for 36 Years,--To-day is the coldest November day in Denver in 36 years. It was only 8 de-grees above zero at \$ o'clock this morn-ing, which breaks all past November records for this date. Eleven above was the minimum record until today. Nov. 13, 1876, and the same date in 1880, registered 11 above, which was the minimum for previous dates during the past 36 years, as shown by the records minimum for previous dates during the past 36 years, as shown by the records of the weather bureau here. Colorado is not alone in the grasp of the cold wave. Wyoning is even colder. Lan-der reports 4 below: Cheyenne, 4 below, and Sheridan, 2 below. Corona is the coldest place in Colorado, the mercury dropping to zero at that point at 8 o'clock this morning.
