day.

Snowflake, Navajo, Co., Ariz., Feb. 3. -The beautiful spring-like weather still continues; farmers are well along with their spring work; ditches and dams are ready for the season's operations; much water, that usually, in January has gone to waste, has been placed in the local reservoirs, or used in winter irrigation. Just how our water supply for the season is to be maintained is the main question with us just now. is pleasant to notice that everyone is striving to put in all the grain possible, and prepare all that is possible for other crops, and there does not seem to the slightest doubt but what the water will be forthcoming when needed. Just as long as a community take this view of matters it is guite unnecessary to look for any great calamity from drought or any other cause. We find by enquiry that the amount

of tithing paid the past year exceeds other years by a nice margin, and that this state of affairs has settled down upon us to stay, and many persons, through experience, find that this is a sure way to success; then why need we fear, if there is no snow in the mountains and we are told something dread. ful must surely happen if some snow is not stored for future use? It occurs to many of us, that it is quite possibl that the Father understands His busi-ness very well, and that this radical change of season we are now undergo-ing will prove a blessing in many ways not as yet thought of.

We are anticipating a feast of fat things for the next few days. Bros. Maeser and Kimball are with us today, and we are expecting Heber J. Grant and Bro. Clawson this evening. Snow-flake is full of visitors and the Stake house is filled at each meeting to its

utmost capacity. Many of our workers are away from home earning the means to assist in making homes and developing the country. A prosperous season is anticipated and everybody can see better times

ahead for the industrious farmer. DEATH OF MRS. LUCY WHITE FLAKE.
