

## NEGRO VAGRANTS MUST LEAVE TOWN

Judge C. D. Diehl Delivers an Ultimatum to Undesirable Citizens Today.

SUSPENDS SENTENCE ON TWO.

Gives Them a Chance to Leave Salt Lake Within the Next Twenty-Four Hours.

That Judge C. D. Diehl of the criminal division of the city court is determined to do his part in freeing the city from a host of female negro robbers and vagrants was made evident again this morning when the cases of Alice Parker and Lillie Jordan were called. Both had been convicted of vagrancy and were to have been sentenced this morning. Atty. Newton, representing the defense, asked that sentence be suspended until Tuesday afternoon, and that the defendants be released upon their own recognizance. He stated that it was the desire of the police authorities to rid the town of such people, and that the defendants in the cases at bar would leave the city.

Judge Diehl stated that his purpose was to see that such persons as the defendants left Salt Lake. "I have talked with the chief of police," said Judge Diehl, "and I agree with him that the city should be rid of such people. I do not believe that in these cases sentence should be suspended until Tuesday, but I will set the cases for Monday for sentence and release the defendants on their own recognizance and give them until Sunday midnight to leave the city. I will say, also, that I propose to impose more severe sentences in such cases where the accused are found guilty. If they will leave town all right, but if they remain here and are convicted, they must suffer the consequences."

### MURDER CASE CONTINUED.

Judge Diehl has again continued the time for passing judgment in the case of Stanislas Mesich, the Austrian charged with the murder of Herman Obradovich. Owing to the fact that the defendant's counsel, Soren X. Christensen, was too busy to be in court this morning, the matter was continued until Monday morning next, at which time the court will say whether or not Mesich must stand trial in the district court for murder in the first degree.

### FINN GETS 75 DAYS.

John Yoki, a Finn, charged with battery upon Mrs. May Johnson, was tried this morning and convicted. Yoki who was intoxicated, seized Mrs. Johnson and attempted to embrace her. After hearing the testimony, the court sentenced Yoki to 75 days at hard labor in the city jail.

### DEPARTMENT KEPT BUSY.

Had Five Runs Yesterday Afternoon And Evening—One Today.

Now that the grass is beginning to dry, the fire department expects to be kept pretty busy during the next two months. Yesterday afternoon the apparatus was called out three times to answer alarms for grass fires. In addition to the grass fires the department was called upon to extinguish a blaze in the residence of E. G. Doolittle, 84 R street, where defective wiring resulted in damage to the extent of \$100. There was also a fire at the home of J. E. Williams, 445 West First North street, the damage being about \$75. This morning there was a call from an ice cream parlor at 45 Rorella street, caused by an overheated pipe. The damage amounted to about \$10.

### YOUNG MAN ARRESTED.

At noon today Police Officer Seavey arrested a young man named A. E. Bailey on the charge of indecent conduct. The man was discovered in a barn at 253 south West Temple street. When searched at police headquarters he pretended to be intoxicated and declined to make any statement concerning his actions. He will be arraigned before Judge Diehl Monday afternoon.

### OLD MAN MISSING.

C. A. Wilber Drops Completely Out of Sight and Cannot be Found.

Despite the fact that his family have searched diligently for him since Tuesday evening, no trace has yet been found of C. A. Wilber, the aged man whose disappearance was noted in Wednesday's "News." The veteran left the home of his son-in-law, E. A. Enos, while the latter was asleep, and while Mrs. Enos was temporarily absent from the house. Mr. Wilber went away bareheaded and with out a cent in his pockets.

He had been in the city but a day or

Manufacturing Confectioners.

two, having accompanied his daughter from Glenwood Springs, Colo. He is 79 years of age, and is said to be rather feeble-minded. He is tall, slender, inclined to be stoop-shouldered and his hair and beard are snow-white. The case was at once reported to the police, but little if any attention seems to have been paid to the matter by the minions of the law. In fact, they seem to be absolutely inactive and indifferent in the premises. The missing man is a G. A. R. veteran and a Mason. He was formerly a resident of Dubuque, Iowa. Mr. Enos' address is 31 north First West street, or he may be communicated with in the San Pedro office in the Herald block, where he is night operator.

### CHARGE AGAINST A GREEK.

This morning a complaint was filed in Judge Diehl's court against Jim Harrison, alias Harrison, a Greek, on the charge of criminal assault upon Fee Phillips, 13 years of age. The complaint was sworn to by the father of the girl, Officer Phillips, uncle to the police. It is certain that the accused is the man guilty of the unspeakable crime. Harrison will be arraigned Monday morning.

## DONALDSON CASE IN HANDS OF JURY

Judge Armstrong Opened His Last Instructions to Talesmen at Noon Today.

The jury which will return a verdict in the Donaldson trial went into session at 12:30 o'clock today.

Judge Armstrong opened his last instructions shortly after 12 o'clock. He finished at 12:30 o'clock.

The jury then filed into the chamber where it will remain until it has reached a decision.

The arguments were concluded at five minutes to 12 o'clock today. Both sides made heroic efforts to make as nearly perfect cases as possible and after listening to the defense and state it was nothing more than a guess to predict the verdict.

At the conclusion of the state's presentation of the case Judge Armstrong opened his charge to the jury. The law applying to larceny was read by the court, the jurors listening intently as these were their last instructions.

### WEEKLY HEALTH REPORT.

Forty-one Births Was the Record, 21 Being Girls.

Again the births for the week in this city were nearly evenly divided as to sex, the females predominating by one, the total number being 41. Sixteen persons died during the week, eight of each sex, and five bodies were brought in for interment.

There were reported during the week: Thirteen cases of contagious and infectious diseases, consisting of five cases of scarlet fever, five cases of diphtheria; one case of meningitis; one case of typhoid fever; and one case of pneumonia. Eight cases of smallpox; six cases of scarlet fever and six cases of diphtheria remain in quarantine.

## PRIZE LIST FOR MUSICAL CONTEST

Management of Big Chautauqua Announces List of Events to Be Competed For.

BEST CHORUS WILL GET \$100.

Second Prize Will be \$50—There Will Be Eleven Other Events at Big Festival at Wandamere.

The management of the big musical chautauqua, to be held at Wandamere during the week of July 22, today announced the following rules regarding the contests to be held the last two nights of the musical week, Friday and Saturday, July 26 and 27, between mixed choruses, male and mixed quartets, soprano, alto, tenor, baritone, bass, piano and violin solos.

Each and every contestant must be a bona fide resident of the state of Utah.

The points to be considered in the contest are: First, intonation and tone quality; second, interpretation; third, attack, fourth, phrasing and expression.

Volume will not be considered in the mixed chorus adjudications. No entries will be received after Monday, July 15. Applications for entrance to the various contests should be addressed at once to Fred Graham, Clayton Music company, City.

#### VARIOUS CONTESTS.

Contest for mixed chorus, permanent, or especially organized for this occasion, of not less than 25, nor more than 50 voices.

Contest for piano, violin, soprano, alto, tenor, baritone and bass solos, are limited to amateurs.

Contests for male and mixed quartets are open to singers of all ages. Contestants for piano and violin will be divided into two classes, as follows: First class: Open to all amateurs. Second class: Open to all up to the age of 18 years.

Adjudicators will not serve in any of the solo contests in which their pupils are competing.

The following well-known Utah musicians form the board of adjudication: J. J. McClellan, musical director of the Chautauqua, Anton Pedersen, chairman, George Carvello, Willard Webb, Arthur Shepherd, J. J. Daynes, Joseph Ballantyne, Hugh W. Douglis, M. J. Brines.

Any three of the above named judges will be chosen by the director and the chairman to adjudicate any of the contests; but all adjudicators will be present at all contests. The high standing of the judges assures honest, intelligent and unbiased decisions.

#### PRIZE LIST.

Compositions selected and prizes to be awarded to winners of the various contests follow:

#### MIXED CHORUS.

Entrance fee, \$5. Composition, "The Light of the Moon," also a second number to be selected by each competing chorus of the same difficulty (not inferior) as "Hark, Hark, My Soul" by Housley. First prize, \$100. Second prize, \$50.

#### MIXED CHORUS.

Entrance fee, \$3. Composition, "Moonlight" (Fanning). First prize, \$25. Second prize, \$15.

#### MALE QUARTETTE.

Entrance fee, \$3. Composition, "Lead, Kindly Light" (Dudley Buck). First prize, \$25. Second prize, \$15.

#### SOPRANO SOLO.

Entrance fee, \$3. Composition, "Fear Not, Ye, O Israel" (Dudley Buck). First prize, \$15. Second prize, \$10.

#### CONTRALTO SOLO.

Entrance fee, \$2. Composition, "Goodbye" (Tosti). First prize, \$15. Second prize, \$10.

#### TENOR SOLO.

Entrance fee, \$2. Composition, "Lift Thine Eyes" (Logan). First prize, \$15. Second prize, \$10.

#### BARITONE SOLO.

Entrance fee, \$2. Composition, "The Two Grenadiers" (Schumann). First prize, \$15. Second prize, \$10.

#### BASS SOLO.

Entrance fee, \$2. Composition, "Armourer's Song" from "Robin Hood" (De Koven). First prize, \$15. Second prize, \$10.

#### VIOLIN SOLO—FIRST CLASS.

Entrance fee, \$2. Composition, "Cavalleria" (Pietro). First prize, \$15. Second prize, \$10.

#### VIOLIN SOLO—SECOND CLASS.

Entrance fee, \$1. Composition, "Salute d'Amour" in E major (Elgar). First prize, \$10. Second prize, \$5.

#### PIANO SOLO—FIRST CLASS.

Entrance fee, \$2. Composition, "Song of the Brook" (Lack). First prize, \$15; second prize, \$10.

#### PIANO SOLO—SECOND CLASS.

Entrance fee, \$1. Composition "La Fontaine" (Böhme). First prize, \$10; second prize, \$5.

#### SEASON TICKETS.

Season ticket sale will commence Tuesday morning, July 9 at 10 o'clock at the Clayton Music company, same costing for the six nights, entrance to grounds and the choicest location in the pavilion (reserved seats) \$1. Those securing seats early will be given reservations in the best space for the same price which will be charged for general admission during the musical chautauqua.

#### PERSONALS.

Hon. Fisher Harris is due to arrive today, from the east, bringing with him his daughter, Miss Margaret Harris and Miss Edna Yates.

#### BRIGHTON STAGE

Leaves Sugar House daily at 8 a. m. for formerly by Granier & Davis, Murray. Take Sugar car for station, 12th South and 11th East. Tel. Forest 4 n k, Bell.

T. C. DAVIS.

#### WEATHER REPORT

Record at the local office, United States weather bureau, for 24 hours ending at 6 a. m. today:

Temperature at 6 a. m., 63; maximum, 80; minimum, 58. Wind, which is a breeze from north.

Accumulated excess of precipitation since Jan. 1, 2.4 inches.

Relative humidity, 40 per cent.

FORECAST TILL 6 P. M. SUNDAY.

Local forecast for Salt Lake City and Utah.

Fair tonight and Sunday.

R. J. HYATT, Section Director.

## LATE LOCALS.

Gone to Portland—Geo. F. Felt of the Standard, and son Harold have gone to Portland on business.

Goes on the Road—Photographer Hutchings and Griffiths, has severed his connection with the firm, to accept a promising offer to travel for Eastman & company of Rochester, N. Y.

Eighty Ward—There will be an address delivered in the Eighty ward chapel tomorrow night by John McDonald, Jr., the subject, "The Early Rise of the Church." William Cook will sing a tenor solo and the choir will furnish special music. All invited, no charge for admission.

Federal Court in Session—The Federal court is in session today. Judge Rice of the Wyoming circuit sitting in the place of Judge John A. Marshall. The doings are merely routine, a number of motions being heard by his honor, and on Monday he will again hold court for similar purposes.

## FIGHTING AT FORMOSA.

Japanese Making War on Natives at Expense of Much Blood.

Victoria, B. C., July 6.—The steamer Tremont, which arrived last night, brought news of desperate fighting in Formosa, where the Japanese are conducting operations against the Formosan natives, mostly headhunters. Five hundred Formosan Chinese trained by Japanese officers and led by Lieut. Col. Hayakawa, attacked the natives and killed 100 of them. The Japanese have considerable cover, and after three days' fighting, carried the stronghold after a desperate charge in which the officer in command and 130 of the 500 troops were killed.

## WATCHMEN AT MINES.

Goldfield Miners Meet and Discuss Matter But Take no Action.

Goldfield, July 4.—A mass meeting of the miners of the Western Federation of Miners held at the baseball grounds this afternoon to discuss the status of watchmen employed at the mines adjoining without taking any action. The adjournment followed the reading of a communication from the Mine Owners' association asking that a permanent grievance committee be appointed to take up the matter and to settle disputes that may arise in the future.

## WASHINGTON'S PORTRAIT.

Famous One by Gilbert Stuart Acquired by Metropolitan Museum.

New York, July 6.—Announcement is made that the famous likeness of George Washington by Gilbert Stuart, known as the Libb's-Channing-Avery portrait, has been acquired by the Metropolitan Museum of Art. It is believed by many connoisseurs to be the original study from which six or eight replicas were made, and is of unusual interest on account of the opinion of experts that the coat has been from life. This portrait has attracted widely attention on account of the wonderfully complete modeling of the head and it has done much to fix the popular idea of the personal appearance of the father of his country.

## FILIPINOS SIDE WITH AMERICANS.

Manila, July 5.—The reported naval activity is causing much excitement in the Philippines. Leading Filipino independence organs have announced that the Filipino States in the interior of the Philippines are all for the Americans. The Japanese laborers employed in the navy yard at Olangapo have been discharged.

## CAPTAIN CHOSEN.

Lieut. Col. Thurston Will Have Charge of Palma Trophy.

New York, July 6.—Lieut. Col. Thurston of Brooklyn has been selected to captain the rifle team which will represent the United States in the international contest for the Palma trophy, which will be held at Rockville range, Ottawa, Canada, Sept. 7. Col. Thurston is a well qualified sportsman, having captured the victorious New York state team for several years. He is considered to be one of the foremost authorities on rifle shooting in the world. The trophy funds to defray the expenses of the team will be raised by public subscription.

## A GIDDY COUPLE.

Man 86 Years Old and Woman 76 Go and Get Married.

New York, July 6.—William Shinton of Los Angeles, Cal., and Mrs. Eleanor Shinton, 76, who was married in 1895 at the parsonage of the Methodist Episcopal church in Bridgewood, N. Y., yesterday, were formerly a resident of Paterson, N. J. It was here that they were married early this week.

Mrs. Bonk was the widow of the late Henry K. Bonk. She is in her 77th year.

## MARS GETTING NEARER.

Tonight Astronomers World Over Will Look at Planet.

New York, July 6.—Mars is nearer to earth than it has been in many years, only a trifle of 38,000,000 miles in fact, and astronomers the world over tonight will have trained on the planet all the improved telescopic, stereoscopic and photographic apparatus known to science.

It may be that July 6, 1907, will give to earth's people their first formal introduction to the Martians, these creatures of remote and invading. It may be that we shall get positive photographic evidence of engineering work that will make child's play of the Pennsylvania and Belmont tubes and other undertakings that to us are gigantic.

Special preparations have been made at all the important American observatories for the work of tonight and whether or not the great mysteries of Mars are illuminated, it is believed much valuable data will be gathered.

## TO BUY FRANKLIN HOUSE.

Paris, July 6.—A movement is on foot here among Americans to purchase the house in which Benjamin Franklin lived while here and make it a museum. The house is situated not far from the ministry of the interior and the owners declare that it was built for Franklin himself, he preparing even plans for the work of tonight and whether or not the great mysteries of Mars are illuminated, it is believed much valuable data will be gathered.

London, July 6.—A dispatch to the Daily Mail from Berlin, says that Maj. von Gross's dirigible balloon for the German army has made some highly successful trials at a height of 10,000 feet for the purpose of secrecy. The balloon, it is said, easily maintained a speed of 50 miles an hour.

London, July 6.—A dispatch to the Daily Mail from Berlin, says that Maj. von Gross's dirigible balloon for the German army has made some highly successful trials at a height of 10,000 feet for the purpose of secrecy. The balloon, it is said, easily maintained a speed of 50 miles an hour.

London, July 6.—A dispatch to the Daily Mail from Berlin, says that Maj. von Gross's dirigible balloon for the German army has made some highly successful trials at a height of 10,000 feet for the purpose of secrecy. The balloon, it is said, easily maintained a speed of 50 miles an hour.

## WHERE IS H. J. WILSON?

Bank Inspectors Searching for Him to Save Him From Himself.

New York, July 6.—Inspectors of the United States land and survey are searching for H. J. Wilson to redeem him in spite of himself, for Wilson ran away from his responsibilities and let himself be classed as a bank robber. In fact, he was the one robbed. Wilson, described as a plain, plodding man of 45 years, was recently employed by the First National bank of No. 1 Wall street as a messenger. He disappeared last Monday after making collections aggregating a little more than \$30,000. On Tuesday the bank received a lucky envelope containing \$34,718 in checks and drafts. There was no accompanying explanation but the bank soon ascertained that it was the bulk of Wilson's collections.

Then it received a pitiful letter from Wilson, which he recited that after making all his collection and while in a street car pickpockets had relieved him of the bank's checks and money, and that, mortified with shame and possessed with the fear that the bank officials would believe him a thief, he had determined to disappear until he could make up his mind just what he ought to do.

Investigation by the bank revealed the probable truth of Wilson's story and also developed the fact that the pickpocket secured \$1,218 in cash. The thief, as is often done in such cases, had returned the checks and drafts as they were useless to him.

Now that the truth is known the officials hope Wilson will pluck up courage and return.

## KEMP'S BOOKS SHOW SHORTAGE.

Washington, July 6.—The books of J. Arthur Kemp, the missing chief clerk and property clerk of the police department, have been turned over to experts for examination. A shortage of police announced yesterday that there appeared to be a shortage of \$2,000 or more.

## SCIENTIFIC MISCELLANY.

It has been estimated that the combustion of coal in London discharges at least half a million tons of sulphuric acid into the air each year, and the effect upon certain building stones is disastrous. The acid washed down by rains attacks the lime of marbles, limestones and calcareous sandstones, forming gypsum and causing the surface to swell and crumble. A treatment for the decaying stonework is the application of a solution of baryta. The baryta forms an insoluble sulphate with the gypsum and liberates lime, which the carbonic acid of the air converts into the original binding cement of the stone. Referring to the experience of the Chamber of Westminster, Prof. A. H. Church states that carving so soft as to be brought away by the finger, was made sound and harder than the newly quarried stone.

The advantages of the magnetite electrode lamp over the carbon arc, as pointed out by G. E. Little, are longer life, higher efficiency and a pure white light. Instead of mixed blue and white light. The negative electrode, from which the lamp is inaccurately named, is really a mixture of carbon and metallic oxides, each serving a distinct part in forming this novel and promising source of illumination. The titanium oxide renders the arc luminous, the oxide of iron increases conductivity when cold, and the oxide of chromium prevents too rapid consumption.

The transmission of photographs by telegraph has reached the stage of practical results, and actual seeing by wire is expected to follow soon. Kora reproduces photographs after the distance through the wire. The electrical resistance of selenium, the changing current registering the lights and shades of successive points in proper place on a sensitive plate at the receiving end. The telegraph of Berlin, of Nancy, transmits photographs by a different and purely mechanical means, no selenium being used; when the telegrapher presses a key, a small mirror reflects the optical image upon a row of 80 tiny selenium cells, and a collector for successively inserting these cells in circuit, the resulting galvanic current with three local circuits. The principal circuit contains the equilibrators and a telegraph relay, the primary circuit a small induction coil has in turn the second part of the equilibrators, and the secondary circuit of the coil has a gap whose spark controlled by the distributing collector, perforates a paper with very fine holes equally spaced between centers but of size varying to correspond with points on the image. This gives a picture resembling autotype. The equilibrators, the chief part, provides a local current of sufficient intensity to register decidedly every change in the feeble current from the selenium cells.

To give the greatest possible precision to our knowledge of the atomic weights of the elements, an international commission, headed by the late Berzelius, has been organized. The most recent discoveries. Of the 79 elements in the latest list, hydrogen is still the lightest, with an atomic weight of 1.008. The atomic weight of oxygen is 16. The heaviest substance, 238.5; while mercury, thallium, lead, bismuth and thorium are all heavier than gold.

The compressed air spray has been used for a considerable time for painting large surfaces, like the Eiffel tower, and for whitewashing walls. The means of an air-brush seems to have reached its highest development in Germany. Of the two types of apparatus, one is like a pencil and the other is used like a revolver, and the air for spraying is supplied from a cylinder of compressed air or carbonic acid gas, or in a more primitive way by a hand pump. It is capable of a great variety of applications. The air-brush can be used for ordinary industrial painting by any unskilled workman, while an artist of some ability can paint flowers and other designs upon enamel, glass, porcelain, bronze, paper and even upon cloth, carpets and other fabrics. It has proved especially serviceable in retouching photographs.

Among the substances for which a sudden demand has sprung up is the metal cobalt. This has been used only for such purposes as coloring glass, enamel and paints, and the annual requirement has been only about 150 tons. It has the same hardening effect on steel as nickel, but it has not been considered for this purpose on account of its cost. New deposits are now being sought as a supply for storage batteries, for which it has proven an important material.

## EDUCATION IN JAPAN.

So much stress has been laid, and rightly laid, upon education as one of the causes of Japan's advance and of her success in the struggle with Russia that it is interesting to observe the policy of her government concerning education during the war. It was necessary to cut down to the lowest possible limit expenditures for many public purposes. For education, however, appropriations were largely increased. Thus in 1893-94 the national appropriation for education was only \$1,335,000, while in 1904-05 it

# Many of the drug- gists and many of the other dealers insist that they can easily get more than 30 cents and 60 cents, for Mc- Donalds Dutch Choco- lates.

was more than \$7,000,000. That, of course, is only a small part of the school budget. The appropriations by districts, which were \$10,700,000 in 1893-94, increased in 1904-05 to nearly \$45,000,000. Even this is a mere fraction of the whole, for in the year last named the cities, towns and villages expended upon education more than \$170,000,000, so that the school bill of the whole nation was more than \$22,000,000—a most generous allowance for such a country at such a time.

As for the character of Japanese education it is most significant. The stated aim of the University of Tokio is "to teach all things that are necessary to the welfare of the state." That is a high aim of state education. But it is interesting to observe how much, therefore, the Japanese regard as necessary to the welfare of the state. It is in brief the whole of modern science and a simple statement of the Golden Rule. It begins in the elementary schools with precepts of filial piety and brotherly kindness. In the next grade come instruction and exhortation in the duties of friendship, frugality, truthfulness, self-restraint, courage and the like. Finally, in the highest grade, the moral duties of the individual to society and to the state are taught, including principles of the loftiest patriotism. Such was the system adopted 15 years ago, and it will not escape observation that the men who fought so superbly in the late war had been educated under that system, and at a time
